Hovinheimo, 2021-05-27 Data protection has become such an important area for law – and for society at large – that it is important to understand exactly what we are doing when we regulate privacy and personal data. This study analyses European privacy rights focusing especially on the GDPR, and asks what kind of legal personhood is presupposed in privacy regulation today. Looking at the law from a deconstructive angle, the philosophical foundations of this highly topical field of law are uncovered. By analysing key legal cases in detail, this study shows in a comprehensive manner that personhood is constructed in individualised ways. With its clear focus on issues relating to European Union law and how its future development will impact wider issues of privacy, data protection, and individual rights, the book will be of interest to those trying to understand current trends in EU law.

*Labour Law and the Gig Economy* Jo Carby-Hall, Lourdes Mella Méndez, 2020-03-24 This international book analyses the impact of digitisation in labour markets, on labour relationships and also on labour processes. The rapid progress of modern disruptive technologies and AIs and their multiple applications to each phase of the labour production system, are changing the production rules on a global scale with significant impacts in every aspect of work. As new technologies transform work patterns and change the type of jobs available - destroying

some while creating others - and even the nature of the tasks performed, numerous legal problems arise which are challenging to legislators and legal scholars who need to find appropriate solutions to them. Considering the labour law issues which have been created by technological developments and currently affect the work of millions worldwide, this book highlights the full scope of these issues, suggesting solutions to emerging problems and ways to mitigate the risks brought about through technological advancement. Approaching the present debate with perspectives on legal problems with expertise from a wide range of different countries, this book presents informed and scholarly studies which answer the challenges that new technologies present in labour markets, private lives and labour processes.

**Arthur Cox Employment Law Yearbook 2017** Arthur Cox Employment Law Group, 2018-05-10 2015 winner of the Practical Law Book of the Year at the Dublin Solicitors Bar Association Awards This annual Irish publication contains selected cases and materials relevant to Employment Law, specifically the case law and decisions that took place in Ireland throughout 2017. Practitioners need to be up to date and this annual publication provides that service. By being selective, and having that selection carried out by experienced lawyers, practitioners are pointed in the right direction. It will also be of great use to HR professionals and trade union officials who have need to reference this legal area. The title contains analysis and discussions on: - Irish law: decisions of the superior courts, Labour Court,

Equality Tribunal, Employment Appeals Tribunal etc; - Irish legislation (including the Workplace Relations Act 2015) and statutory instruments; - English law so far as relevant e.g. common law decisions; - EU law: decisions of the Court of Justice of the European Communities and relevant Directives/Regulations; - Data protection and freedom of information developments - Other material such as Annual Reports of the EAT, the Labour Court, the Health & Safety Authority, the activities of NERA as well as decisions listed in other complementary areas of the law, including taxation and pensions. These have all been selected by experienced lawyers in the relevant fields. This title is part of a series that is released yearly, to reflect each year's particular case laws and decisions.

**Electronic Monitoring in the Workplace** John Weckert, 2005-01-01 There is rising concern about the rights of employees, especially with respect to their rights to privacy. Contributes to the debate and will point the way toward some solutions.

**Privacy in Practice** Alan Tang, 2023-03-01 1. Equip professionals with holistic and structured knowledge regarding establishing and implementing privacy framework and program. 2. **Internet Law** Michael O'Doherty, 2020-07-30 Shortlisted for DSBA Law Book of the Year Award

2020 The law in Ireland regarding causes of action involving the internet is a rapidly growing area of law and litigation. This book examines issues such as privacy, data protection, defamation, data protection, crime, intellectual property and employment, all through the prism of online behaviour. This book examines key pieces of legislation such as the E-Commerce Directive, GDPR, and Defamation Act 2009; forthcoming legislation such as the Digital Content Directive and proposed Irish legislation to combat harmful online content. With Ireland being the European base of many international IT and tech firms such as Google, Facebook, LinkedIn, Amazon and Twitter, it is anticipated that the Irish courts will be the forum for many important cases in the near future. Internet Law provides a comprehensive overview of the state of the law in Ireland, EU Member States, and other common law countries such as Canada, Australia and New Zealand. And in such a fast-developing area of law, the book also anticipates many of the issues that will face courts in the near future. Key cases that this book considers include: Data protection: Google Spain [2014] – an in depth review of what exactly this case established, and the manner in which it has been interpreted in subsequent case law. Lloyd v Google [2019] – in which the English Court of Appeal made a significant finding about the availability of damages for non-pecuniary loss arising from the breach of a person's data protection rights. Defamation: Monroe v Hopkins [2017] - the first UK case to consider at length defamation on Twitter, with an in-depth analysis

of meaning, identification and how to assess the degree of publication via that medium. *Eva Glawischnig-Piesczek v Facebook* [2019] – a significant recent decision of the CJEU on the liability of social media platforms for content posted by its users. Copyright: *Sony Music v UPC* [2018] - a Court of Appeal judgment on the duties of internet service providers to restrict the illegal downloading of copyright material by its customers. *Land Nordrhein-Westfalen v Renckhoff* [2018] - a recent decision of the CJEU on the nature of copyright protection attaching to photographs which are uploaded to the internet. Trade Marks: *Interflora Inc v Marks and Spencer plc* [2011] - a decision of the CJEU which analyses the rights of an advertiser to use the trade mark of a rival company when promoting its services on the Google Ads service. Employment: *Barbulescu v Romania* [2017] - a significant CJEU decision which sets out the restrictions to an employer's right to monitor the electronic communications of its employees. Privacy/ Harassment: *CG v Facebook* [2016], in which the Northern Ireland Court of Appeal considered the tort of harassment via social media, and the potential liability of Facebook for comments made by a user following notification of the alleged harassment. Evidence: *Martin & Ors v Gabriele Giambrone P/A Giambrone & Law* [2013]- one of several cases to consider the admissibility of evidence taken by a defendant from a plaintiff's social media account in order to question the latter's testimony.

*The Global Community Yearbook of International Law and Jurisprudence 2018* ,2019-08-16 The Global

Community Yearbook is a one-stop resource for all researchers studying international law generally or international tribunals specifically. The Yearbook has established itself as an authoritative source of reference on global legal issues and international jurisprudence. It includes analysis of the most significant global trends in a way that allows readers to monitor the development of the global legal order from several perspectives. The Global Community Yearbook publishes annually in a volume of carefully chosen primary source material and corresponding expert commentary. The general editor, Professor Giuliana Ziccardi Capaldo, employs her vast expertise in international law to select excerpts from important court opinions and to choose experts from around the world to contribute essay-guides, which illuminate those cases. Although the main focus is recent case law from the major international tribunals and regional courts, the first four parts of each year's edition features expert articles by renowned scholars who address broader themes in current and future developments in international law and global policy, themes that appear throughout the case law of the many courts covered by the series as a whole. The Global Community Yearbook has thus become not just an indispensable window to recent jurisprudence: the series now also serves to prepare researchers for the issues facing emerging global law. The 2018 edition both updates readers on the important work of long-standing international tribunals and introduces readers to more novel topics in international law. The Yearbook continues to

provide expert coverage of the Court of Justice of the European Union and diverse tribunals from the International Court of Justice (ICJ) to criminal tribunals such as the International Criminal Court (ICC) and the Tribunals for the Former Yugoslavia and Rwanda, to economically based tribunals such as ICSID and the WTO Dispute Resolution panel. This edition contains original research articles on the development and analysis of the concept of global law and the views of the global law theorists such as: whether the Paris Declaration of 2017 and the Oslo Recommendation of 2018 deals with enhancing their institutions' legitimacy; how to reconcile human rights, trade law, intellectual property, investment and health law with the WTO dispute settlement panel upholding Australia's tobacco plain packaging measure; Israel's acceptance of Palestinian statehood contingent upon prior Palestinian demilitarization is potentially contrary to pertinent international law; and a proposal to strengthen cooperation between the ECJ and National Courts in light of the failure of the dialogue between the ECJ and the Italian Constitutional Court on the interpretation of Article 325 of the Treaty on the Functioning of the European Union. The Yearbook provides students, scholars, and practitioners alike a valuable combination of expert discussion and direct quotes from the court opinions to which that discussion relates, as well as an annual overview of the process of cross-fertilization between international courts and tribunals. The Yearbook provides students, scholars, and practitioners alike a valuable combination of

expert discussion and direct quotes from the court opinions to which that discussion relates, as well as an annual overview of the process of cross-fertilization between international courts and tribunals and a section focusing on the thought of leading international law scholars on the subject of the globalization. This publication can also be purchased on a standing order basis.

*Data Protection in the Internet* Dário Moura Vicente, Sofia de Vasconcelos Casimiro, 2019-12-01  
This book identifies and explains the different national approaches to data protection – the legal regulation of the collection, storage, transmission and use of information concerning identified or identifiable individuals – and determines the extent to which they could be harmonised in the foreseeable future. In recent years, data protection has become a major concern in many countries, as well as at supranational and international levels. In fact, the emergence of computing technologies that allow lower-cost processing of increasing amounts of information, associated with the advent and exponential use of the Internet and other communication networks and the widespread liberalization of the trans-border flow of information have enabled the large-scale collection and processing of personal data, not only for scientific or commercial uses, but also for political uses. A growing number of governmental and private organizations now possess and use data processing in order to determine, predict and influence individual behavior in all fields of human activity. This inevitably entails new risks, from the perspective of individual

privacy, but also other fundamental rights, such as the right not to be discriminated against, fair competition between commercial enterprises and the proper functioning of democratic institutions. These phenomena have not been ignored from a legal point of view: at the national, supranational and international levels, an increasing number of regulatory instruments – including the European Union's General Data Protection Regulation applicable as of 25 May 2018 – have been adopted with the purpose of preventing personal data misuse. Nevertheless, distinct national approaches still prevail in this domain, notably those that separate the comprehensive and detailed protective rules adopted in Europe since the 1995 Directive on the processing of personal data from the more fragmented and liberal attitude of American courts and legislators in this respect. In a globalized world, in which personal data can instantly circulate and be used simultaneously in communications networks that are ubiquitous by nature, these different national and regional approaches are a major source of legal conflict.

**European Media & Communication Law** Elena Poddighe, Pieremilio Sammarco, Vincenzo Zeno-Zencovich, 2023-06-01 This primer presents the legal framework of the extremely complex regulation of legacy and digital media in Europe by the European Union and the Council of Europe. The volume is divided in five chapters which take into account the European Convention of Human Rights and the Charter of Fundamental Rights of the EU; the regulation of broadcasting; digital communication platforms; data protection in the

context of information and communication; and a plurality of other hot topics such as copyright protection, women's dignity, hate speech and fake news. All the chapters are linked to over 70 decisions of the Strasbourg and Luxembourg courts which are collected in a 300-page Appendix.

The Desk and Beyond Sarah K. Steiner, M. Leslie Madden, 2008 *The Desk and Beyond* is intended to provide a thorough exploration of the present and possible future applications of eleven of the most promising new reference delivery methods. In order to reflect the growing role of the digital environment while still respecting the importance of in-person interaction, a balance of physical and virtual methods has been maintained. This collection is intended to provide inspiration for potential reference services at your library; each chapter provides an introduction to an innovative service concept and an annotated list of sources for additional research.

*Arthur Cox Employment Law Yearbook 2016* Arthur Cox Employment Law Group, 2017-04-27 This annual Irish publication contains selected cases and materials relevant to Employment Law, specifically the case law and decisions that took place in Ireland throughout 2016. Practitioners need to be up to date and this annual publication provides that service. This new edition covers the significant reforms under new Workplace Relations Act 2015, along with new chapters including: Employment Litigation: Preliminary Issues and Industrial Relations-A Changing Landscape. Last year's edition was winner of the 2015 Practical Law Book of the Year Award by the Dublin Solicitors Bar Association

**General Principles of the European Convention on Human Rights** Janneke Gerards, 2023-06-30 The European Convention on Human Rights is one of the world's most important and influential human rights documents. It owes its value mainly to the European Court of Human Rights, which applies the Convention rights in individual cases. This book offers insight into the concepts and principles that are key to understanding the European

Convention and the Court's case law. It explains how the Court approaches its cases and its decision-making process, illustrated by numerous examples taken from the Court's judgments. Core issues discussed include types of Convention rights (such as absolute rights); the structure of the Court's Convention rights review; principles and methods of interpretation (such as common-ground interpretation and the use of precedent); positive and negative obligations; vertical and horizontal effect; the margin of appreciation doctrine; and the requirements for the restriction of Convention rights.

**Human Rights and Emerging Technologies** Daniele Ruggiu, 2018-06-26 What is the state of current European governance on new and emerging technologies, and where is it going? What is, and what can be, the role of human rights in governance arrangements? These are the main questions that this book answers for both European and non-European scholars. It provides a wide picture of current European governance, notably in biotechnology, nanotechnology and synthetic biology, and discusses the model of Responsible Research and Innovation, which is gaining popularity within the European Union, under a human rights perspective. It shows how human rights can contribute to governance frameworks without posing obstacles to research and innovation. The theory presented in the book is followed by practical guidelines drawn from human rights law. Starting from the Strasbourg Court jurisprudence, it provides a complete review of the wide range of rights that the European

Convention on Human Rights protects in light of the challenges of techno-scientific advances. This analysis will come in handy for private actors, policymakers, regulators, as well as judges in solving hard cases raised by techno-scientific progress in the future.

Dictionary of Information Technology Ramesh Bangia, 2010

Individual Labour Rights as Human Rights Elena Sychenko, 2017-03-01 In recent years there has been a substantial debate over the interconnection between labour rights and human rights. Consequently, the jurisprudence of the European Court of Human Rights (ECtHR) concerning substantive individual labour rights, or 'rights at work', is coming to greater prominence at the national level throughout the forty-seven Member States of the Council of Europe. This is the first book in English to provide a thorough analysis of the Court's most recent case law – cases considered in the period from 1963 to 2016 – on fundamental employment rights such as the right to wages, protection from discrimination and unfair dismissal, the right to occupational safety at work, and civil liberties such as the freedom of association, the freedom of religion and expression, and the right to privacy. Drawing on close scrutiny of 347 cases since 1963, the author traces the evolutionary development of the Court's positions on labour rights as human rights through case analyses, commentary, and general conclusions in each of several categorical groupings. Recent trends are treated in substantial detail. Among the issues and topics raised are the following: –

interrelation of ECtHR case law and national labour rights protection; – benefits for employees of reference to ECtHR case law in national proceedings; – role of International Labour Organization conventions and of the European Social Charter in the Court's reasoning; – application of balancing and proportionality test in relevant to labour law cases; – public criticism of employer, disclosure of information, and standards of whistle-blowers' protection; and – positive obligations of the State in the field of occupational safety and health. This book offers the most detailed and considered analysis available of how individual labour rights have been referred to in the human rights jurisprudence of the ECtHR. Given that the Court's positions have already changed certain aspects of some national labour laws, this peerless volume will prove indispensable for practitioners and scholars monitoring the growing applicability of human rights law in matters of labour and employment, especially in the areas of protection of wages, unjust dismissal, and occupational safety.

Judicial Protection of Fundamental Rights on the Internet Oreste Pollicino, 2021-04-22 This book explores how the Internet impacts on the protection of fundamental rights, particularly with regard to freedom of speech and privacy. In doing so, it seeks to bridge the gap between Internet Law and European and Constitutional Law. The book aims to emancipate the debate on internet law and jurisprudence from the dominant position, with specific reference to European legal regimes. This approach aims to inject a European and

constitutional “soul” into the topic. Moreover, the book addresses the relationship between new technologies and the protection of fundamental rights within the theoretical debate surrounding the process of European integration, with particular emphasis on judicial dialogue. This innovative book provides a thorough analysis of the forms, models and styles of judicial protection of fundamental rights in the digital era and compares the European vision to that of the United States. The book offers the first comparative analysis in which the notion of (judicial) frame, borrowed from linguistic and cognitive studies, is systematically applied to the theories of interpretation and argumentation. With a Foreword by Robert Spano, President of the European Court of Human Rights.

**GDPR: General Data Protection Regulation (EU) 2016/679** Mariusz Krzysztofek, 2018-11-01 Personal data protection has become one of the central issues in any understanding of the current world system. In this connection, the European Union (EU) has created the most sophisticated regime currently in force with the General Data Protection Regulation (GDPR) of 2016. This book on this major data protection reform offers a comprehensive discussion of all principles of personal data processing, obligations of data controllers and rights of data subjects. This is the core of the personal data protection regime. GDPR is applicable directly in all Member States, providing for a unification of data protection rules within the EU. However, it poses a problem in enabling international trade and data transfers

outside the EU between economies which have different data protection models in place. Among the broad spectrum of aspects of the subject covered are the following: – summary of the changes introduced by the GDPR; – new territorial scope; – key principles of personal data processing; – legal bases for the processing of personal data; – marketing, cookies and profiling; – new information clauses; – new Subject Access Requests (SARs), including the ‘right to be forgotten’ on the Internet, the right to data portability and the right to object to profiling; – new data protection by design and by default; – benefits from implementing a data protection certificate; and – data transfers outside the EU, including BCRs, SCCs and special features of EU–US arrangements. This book references many rulings of European courts, as well as interpretations and guidelines formulated by European data protection authorities, examples and best practices, making it of great practical value to lawyers and business leaders. Because of the increase in legal certainty in this area guaranteed by the GDPR, multinational corporations and their customers and contractors will benefit enormously from consulting and using this book. For practitioners and academics, researching or advising clients on this area, and government policy advisors, this book provides an indispensable source of guidance and information for many years to come.

**Securing IM and P2P Applications for the Enterprise** Marcus Sachs, Paul Piccard, 2005-12-12  
This book is for system administrators and security professionals who need to bring now

ubiquitous IM and P2P applications under their control. Many businesses are now taking advantage of the speed and efficiency offered by both IM and P2P applications, yet are completely ill-equipped to deal with the management and security ramifications. These companies are now finding out the hard way that these applications which have infiltrated their networks are now the prime targets for malicious network traffic. This book will provide specific information for IT professionals to protect themselves from these vulnerabilities at both the network and application layers by identifying and blocking this malicious traffic. \* A recent study by the Yankee group ranked managing and securing IM and P2P applications as the #3 priority for IT managers in 2004 \* The recently updated SANS/FBI top 10 list of vulnerabilities for computers running Microsoft Windows contained both P2P and IM applications for the first time \* The recently released Symantec Threat Assessment report for the first half of 2004 showed that 19 of the top 50 virus threats targeted IM or P2P applications. Despite the prevalence of IM and P2P applications on corporate networks and the risks they pose, there are no other books covering these topics
