Samuel Morse, That's Who! Tracy Nelson Maurer,2019-06-25 Writer Tracy Nelson Maurer and illustrator El Primo Ramón present a lively picture book biography of Samuel Morse that highlights how he revolutionized modern technology. Back in the 1800s, information traveled slowly. Who would dream of instant messages? Samuel Morse, that's who! Who traveled to France, where the famous telegraph towers relayed 10,000 possible codes for messages depending on the signal arm positions—only if the weather was clear? Who imagined a system that would use electric pulses to instantly carry coded messages between two machines, rain or shine? Long before the first telephone, who changed communication forever? Samuel Morse, that's who! This dynamic and substantive biography celebrates an early technology pioneer.

White Dog Fell from the Sky Eleanor Morse,2013-01-03 An extraordinary novel of love, friendship, and betrayal for admirers of Abraham Verghese and Edwidge Danticat Eleanor Morse's rich and intimate portrait of Botswana, and of three people whose intertwined lives are at once tragic and remarkable, is an absorbing and deeply moving story. In apartheid South Africa in 1977, medical student Isaac Muthethe is forced to flee his country after witnessing a friend murdered by white members of the South African Defense Force. He is smuggled into Botswana, where he is hired as a gardener by a young American woman, Alice Mendelssohn, who has abandoned her Ph.D. studies to follow her husband to Africa. When Isaac goes missing and Alice goes searching for him, what she finds will change her life and inextricably bind her to this sunburned, beautiful land. Like the African terrain that Alice loves, Morse's novel is alternately austere and lush, spare and lyrical. She is a writer of great and wide-ranging gifts.

Lawman John Boessenecker, 1998 Harry Morse - gunfighter, manhunter, sleuth - was among the West's most famous lawmen. Elected sheriff of Alameda County, California, in 1864, he went on to become San Francisco's foremost private detective. His career spanned five decades. In this biography, John Boessenecker brings Morse's now-forgotten story to light, chronicling not only the lawman's remarkable adventures but also the turbulent times in which he lived. Armed only with raw courage and a Colt revolver, Morse squared off against a small army of desperadoes and beat them at their own game. He shot to death the notorious banditos Narato Ponce and Juan Soto, outgunned the vicious Narciso Bojorques, and pursued the Tiburcio Vasquez gang for two months in one of the West's longest and most tenacious manhunts. Later, Morse captured Black Bart, America's greatest stagecoach robber. Fortunately, Harry Morse loved to tell of his feats. Drawing on Morse's diaries, memoirs, and correspondence, Boessenecker weaves the lawman's colorful accounts into his narrative. Rare photographs of outlaws and lawmen and of the sites of Morse's exploits further enliven the story. A significant contribution to both western history and the history of law enforcement, *Lawman* is also an in-depth treatment of Hispanic crime and its causes, immigration, racial prejudice, and police brutality - issues with which California, and the nation, still grapple today.

The Best Gun in the World Robert S. Seigler, 2017-10-31 A thoroughly researched account of weapons innovation and industrialization in South Carolina during the Civil War and the man who made it happen. A year after seceding from the Union, South Carolina and the Confederate States government faced the daunting challenge of equipping soldiers with weapons, ammunition, and other military implements during the American Civil War. In *The Best Gun in the World*, Robert S. Seigler explains how South Carolina created its own armory and then enlisted the help of a weapons technology inventor to meet the demand. Seigler mined state and federal factory records, national and state archives, and US patents for detailed information on weapons production, the salaries and status of free and enslaved employees, and other financial records to reveal an interesting, distinctive story of technological innovation and industrialization in South Carolina. George Woodward Morse, originally from New Hampshire, was a machinist and firearms innovator, who settled in Louisiana in the 1840s. He invented a reliable breechloading firearm in the mid-1850s to replace muzzleloaders that were ubiquitous throughout the world. Essential to the successful operation of any breechloader was its ammunition, and Morse perfected the first metallic, center-fire, pre-primed cartridge, his most notable contribution to the development of modern firearms. The US War Department tested Morse rifles and cartridges prior to the beginning of the Civil War and contracted with the inventor to produce the weapons at Harpers Ferry Armory. However, when the war began, Morse, a slave-holding plantation owner, determined that he could sell more of his guns in the South. The South Carolina State Military Works originally designed to cast cannon, produced Morse's carbine and modified muskets, brass cartridges, cartridge boxes, and other military accoutrements. The armory ultimately produced only about 1,350 Morse firearms. For the next twenty years, Morse sought to regain his legacy as the inventor of the center-fire brass cartridges that are today standard ammunition for military and sporting firearms. "Does justice to one of the greatest stories in American firearms history. If George Woodward Morse had not sided with the Confederacy, his name might be as famous today as Colt or Winchester." —Gordon L. Jones, Atlanta History Center "Excellent and well-researched." —Patrick McCawley, South Carolina Department of Archives and History "For connoisseurs and scholars of military history (especially Civil War), history of

technology, or Southern/South Carolina history, this is a must-read and reference volume pertaining to a previously little-known aspect of the nineteenth century that had a far-reaching impact in the manner wars would be fought by soldiers decades later.” —Barry L. Stiefel, College of Charleston

Discrete Morse Theory Nicholas A. Scoville, 2019-09-27 Discrete Morse theory is a powerful tool combining ideas in both topology and combinatorics. Invented by Robin Forman in the mid 1990s, discrete Morse theory is a combinatorial analogue of Marston Morse's classical Morse theory. Its applications are vast, including applications to topological data analysis, combinatorics, and computer science. This book, the first one devoted solely to discrete Morse theory, serves as an introduction to the subject. Since the book restricts the study of discrete Morse theory to abstract simplicial complexes, a course in mathematical proof writing is the only prerequisite needed. Topics covered include simplicial complexes, simple homotopy, collapsibility, gradient vector fields, Hasse diagrams, simplicial homology, persistent homology, discrete Morse inequalities, the Morse complex, discrete Morse homology, and strong discrete Morse functions. Students of computer science will also find the book beneficial as it includes topics such as Boolean functions, evasiveness, and has a chapter devoted to some computational aspects of discrete Morse theory. The book is appropriate for a course in discrete Morse theory, a supplemental text to a course in algebraic topology or topological combinatorics, or an independent study.

Perturbed Gradient Flow Trees and A_∞ -algebra Structures in Morse Cohomology Stephan Mescher, 2018-04-25 This book elaborates on an idea put forward by M. Abouzaid on equipping the Morse cochain complex of a smooth Morse function on a closed oriented manifold with the structure of an A_∞ -algebra by means of perturbed gradient flow trajectories. This approach is a variation on K. Fukaya's definition of Morse- A_∞ -categories for closed oriented manifolds involving families of Morse functions. To make A_∞ -structures in Morse theory accessible to a broader audience, this book provides a coherent and detailed treatment of Abouzaid's approach, including a discussion of all relevant analytic notions and results, requiring only a basic grasp of Morse theory. In particular, no advanced algebra skills are required, and the perturbation theory for Morse trajectories is completely self-contained. In addition to its relevance for finite-dimensional Morse homology, this book may be used as a preparation for the study of Fukaya categories in symplectic geometry. It will be of interest to researchers in mathematics (geometry and topology), and to graduate students in mathematics with a basic command of the Morse theory.
