Motorama David Temple, 2015-01-15 In an age of unbridled American enthusiasm and towering industrial might, the GM Motorama was a dazzling and elegant show that was unlike any automotive event before it or since. General Motors staged extravagant and elaborate Motorama shows that rivaled some fashion shows. It showcased some of the most revolutionary and innovative prototype and dream cars ever built. And it captured the imagination of the car-buying public from 1950 to 1961. Motorama expert and experienced author David Temple has comprehensively researched the show, the cars, and the personalities to create a fascinating new story with many new photos of these magnificent cars. Because television was in its infancy, GM's President Alfred Sloan believed that the Motorama was the most effective way to market GM products and design prowess. Legendary stylist Harley Earl led a talented group of designers and engineers to dream up, style, and develop some of the most remarkable prototype cars of all time. While current production Buick, Chevy, Cadillac, and Pontiac cars were showcased, the bold, radical, awe-inspiring prototype and dream cars stole the show. These included the GM Le Sabre, replete with aerospace design and an aluminum engine; the fiberglass-bodied Corvette dream car, which went into production after overwhelmingly positive response; and the jet engine-powered Firebird. Temple goes into fascinating detail on the body, frame, engine, drivetrain, and all the special features of each model. He has also retraced the ownership histories of some of these cars. Within the pages of this volume, you get to relive this glorious era of automotive history and revisit the advanced show cars that inspired so many new models. This book features fascinating period photography of Motorama cars at the show, in development, and at different locales. No other automotive show rivaled the Motorama for stunning productions and awe-inspiring cars, which makes this a must-have book.

GM's Motorama David W. Temple, 2006 The story of the eight GM Motoramas staged between 1949 and 1961, featuring the cars introduced at these extravaganzas—including the Corvette prototype.

The Cars of Harley Earl David W. Temple, 2016-05-16 At 6-foot, 3-inches tall, Harley Earl was an imposing figure, but his true stature lies in his towering talent for automotive design and styling. Over his 50-year career, he created as well as collaborated on the most innovative, bold, technologically advanced cars made by General Motors. As a titan of American auto design, the cars he helped create are still celebrated today. And as an enduring legacy, he inspired a generation of engineers, designers, and stylists. Veteran automotive historian David W. Temple has researched and unearthed the complete story of Harley Earl's cars, his notable design achievements, and many accolades. Working as a coachbuilder at his father's Earl Automotive Works in Hollywood, California, the young Earl learned his trade. After styling the 1927 LaSalle for GM president Alfred P. Sloan, Earl rose to prominence and ran the newly created department of Art and Color. Automobile design stagnated during the Depression and World War II, but the number of his contributions to the automotive world in the 1950s is staggering. When the jet age hit, he fully embraced aviation design and infused it into GM cars. The Buick Y-Job and GM Le Sabre featured many firsts in automotive design and hardware. The Y-Job's fender extensions trailing over the doors, disappearing headlamps, flush door handles, a metal cover over the convertible top were a few innovations. When General Motors needed to show off its cars and technology, Harley Earl-designed cars were the stars of the Motorama show that toured the country from 1949 to 1961. He led the team that created the 1953 Corvette, and this iconic American sports car is still going strong today. He was involved in the creation of the 1955-1957 Chevy Bel Air, otherwise known as the Tri-Five Chevy. Harley Earl's drive toward bold and innovative design spurred American car design during the mid-twentieth century. His distinctive designs defined the 1950s finned cars and set

American automotive design on the path it has followed into the modern era. With this in-depth examination, you learn the inside story of these remarkable cars and the man behind them. It's an essential addition to any automotive library.

Of Firebirds & Moonmen Norman J. James, 2007-05-22 This is a designer's story from the Golden Age, of Firebirds and Moonmen. It is the author's story of how, through chance and circumstance, he was to live a 13-1/2 year odyssey, working with the most talented people in General Motors, on two of the most exciting projects that anyone could ever dream of. At GM Styling, under Harley Earl, to become responsible for the design of the Firebird III, the gas turbine experimental car that, half a century later, can arguably be considered the arch-typical representation for the concept car. Then, to follow that, to become involved in the earliest serious development of manned and unmanned vehicles for lunar exploration, and for hardware that rests on the moon today. The story is told in three parts. First is the early period, where hardships and family bonds temper and condition a polio survivor to abandon his high school preparation, to become a mechanical engineer, and to accept a college scholarship to study Industrial Design, an art curriculum, at Pratt Institute in Brooklyn, New York. This period continues, almost as a condensed course, on the fundamentals of design. Key elements evolve around the teachings of mentors Alexander Kostellow and Rowena Reed. In the second phase, the author is in Detroit and the methods and politics of General Motors Styling, during the height of the Motoramas, are detailed. The design of the Firebird III is the heart of the book and is its reason for existing. As the last surviving member of the four principals in its design (Harley Earl, Bob McLean and Stefan Habsburg being the others), the author feels obligated to assure that the story behind those closed studio doors is told. The story progresses from the Firebird III's inception, as a Harley Earl vision, through its design and build phase then to its Motorama film production, for presentation in the main ballroom of the Waldorf Astoria. In the third phase, the author makes a career change, transferring to an aerospace organizational structure and accepting his role as a team player, responsible for carrying out his skills in the support of team objectives. Industrial design, conceptual and drawing skills are applied in the Mechanisms Group for the formulation of mechanical systems on manned and unmanned lunar exploration vehicles. The excitement of realizing that the group was "in on the ground-floor" of lunar exploration is only tempered now by a déjà vu feeling: of realizing that NASA is once again at that same point in time, planning for a return to the moon in 2024. During this period, the author served under Sam Romano, who would later become the head the Lunar Roving Vehicle (LRV) program, with Dr. Greg Bekker as the Chief Scientist and Ferenc Pavlics as the mobility expert. These people, and others, are the Moonmen. Of Firebirds & Moonmen is heavily documented with photographs, illustrations and graphics, which were prepared at General Motors as proposal and contract deliverables. They are supplemented with personal photographs and other graphics collected or prepared specifically for the book. All illustrations, corporate and personal, are by the author. ***** The book is a fun read, and many amateurs old enough to remember the early days of spaceflight will relate to the path James followed as a telescope maker and amateur astronomer -Dennis di Cicco- SkyandTelescope.com ***** Excerpts from the book are included in GM's online living history - Generations of GM Wiki, in celebration of their centennial anniversary in 2008. The author's contribution is on the Firebird III, its inception as defined by Harley Earl and its first flight, in filming for the 1959 Motorama in Mesa, Arizona.

Chevrolets of the 1950s David Temple, 2018-06-15 As the 1950s dawned,

General Motors focused its industrial might on producing revolutionary rather than evolutionary cars with the ultimate goal to become the clear market leader in the automotive industry. To accomplish this goal, the company designed, developed, and consistently released innovative automotive technology. During the decade, Chevrolet introduced the small-block V-8, automatic transmission, air-conditioning, power steering, and many other innovations that made the cars faster, more comfortable, and safer. All of the pieces had fallen into place. General Motors had astute leadership, a brilliant engineering team, forward-thinking stylists, a massive manufacturing infrastructure, and the capability to produce cutting-edge technology. With unbridled optimism and exuberance to meet the demands of the booming U.S. economy of the 1950s, the company designed, developed, and delivered an unprecedented number of breakthrough technologies, and established the blueprint for the modern automobile. Automotive historian and veteran author David Temple goes behind the scenes to reveal how these technologies were designed, manufactured, and installed on Chevrolet's fine portfolio of cars: the Corvette, 1955-1957 Bel Air, Nomad, Impala, and many more. Inside General Motors, many dedicated and talented leaders who were determined to make Chevrolet cars the best on the market. Vice President of Styling Harley Earl and his team designed the 1952 Corvette concept car for the Motorama show. After receiving numerous accolades, it was rushed into production. Design chief Bill Mitchell used his design acumen and creative vision as he led his team to style the 1955-1957 Bel-Air. Zora Arkus-Duntov worked tirelessly and transformed the Corvette from a touring car into a genuine sports car. Ed Cole and his engineers overcame many challenges to develop the compact, efficient, and powerful Chevy small-block V-8, which continued in production for decades. Chevrolets of the 1950s retraces the design, development, and production of these cars, but it also covers innovative vital components that were installed in them. If you have been looking for the inside story on GM's arguably greatest decade, the models, and the technology it produced, you have found it.

Hot Rod Empire Matt Stone, 2018-09-25 Hot Rod Empire details Robert E. Petersen's creation of Hot Rod Magazine in the 1940s and the Petersen Publishing empire that grew to the mainstream juggernaut we know today. The end of World War II marked the release of pent-up war-years energy and the desire to live. For many this meant indulging in long-denied purchases, like a new car. For another group, including young vets, it meant a return to car building and racing. Money, exciting new cars, and speed parts all flowed freely in post-war America. Robert Petersen, a young SoCal-based photographer and Army Air Corps vet, noted the rapidly growing hot rod scene in and around Los Angeles. His first move was to organize the Los Angeles Hot Rod Exhibition in 1948. His second, and brilliant, move was to launch at the same event the first edition of Hot Rod magazine. From this launch pad, Petersen Publishing Company would grow to become the most influential enthusiast publisher in America. Petersen's magazines were rallying points for all aspects of the car, truck, and motorcycle hobbies, well as nurturing and promoting all aspects from car building to racing to show events. Hot Rod, Motor Trend, Car Craft, Motorcyclist, Off-Road and Four Wheel Drive and some 75 other enthusiast titles dominated magazine racks and provided substantial influence over transportation and numerous other hobbies. Hot Rod Empire celebrates the birth and explosive growth of the transportation hobby under Petersen's watch.

Corvette 70 Years Richard Prince, 2022-10-18 The richly illustrated Corvette 70 Years is a complete history of America's only sports car, detailing engineering, design, and key players.

Corvette Concept Cars Scott Kolecki, 2022-05-15 For more than a half century, the Corvette has been celebrated as "America's sports car" by owners and enthusiasts. Since the first model rolled off the assembly line on June 29, 1953, it has been transformed time and again from a well-intentioned-but-underpowered boulevard cruiser into one of the most iconic sports cars of all time! How did Harley Earl's original vision for a two-seat sports car progress through eight distinct generations to become the car that we know and love today? Who were the visionaries responsible for advancing its form and function over the last 70 years? Also, why has the Corvette continued to find commercial success in an ever-changing marketplace when so many other automobiles have come and gone since its creation? Corvette Concept Cars: Developing America's Favorite Sports Car answers these questions by delving into the origins of the Chevrolet Corvette and of the countless designers, engineers, drivers, and dreamers responsible for its creation. It explores the personal histories of Corvette's greatest visionaries (Harley Earl, Zora Arkus-Duntov, and Bill Mitchell) and tells how each of their fates were indelibly intertwined with the rich (and sometimes volatile) history of Chevrolet's flagship sports car. This book is an exploration of the Corvette concept cars from the earliest turnstile dream cars and purpose-built racers to the many unique mid-engined concept and research vehicles that preceded the creation of the current production model: the eighth-generation mid-engine Stingray. Painstakingly researched and written by Corvette historian Scott Kolecki and packed with more than 400 incredible photographs, Corvette Concept Cars: Developing America's Favorite Sports Car is the quintessential history of the evolution of the Chevrolet Corvette!

Motor City Barn Finds Tom Cotter, 2017-06-01 Tom Cotter returns to troll through Detroit and discover long forgotten classics in Motor City Barn Finds. You won't believe some of the rides he finds. Detroit has been America's Motor City for decades. It's home to Ford, General Motors, and Chrysler, as well as numerous auto industry companies and specialty and speed shops. At the same time, it's the poster child for urban blight and dysfunction. It's truly a city of contrasts, which presented challenges and opportunities in equal measure to barn finder Tom Cotter. In Motor City Barn Finds, Cotter plies his trade in a locale rich with automotive history. Detroit's lost cars are abandoned in empty lots, resident in decrepit buildings, squirreled away in garages, and stashed in historic wrecking yards. Behind the wheel of his classic 1939 Ford Woodie, Cotter trolls the back streets and neighborhoods of this historic city looking for lost automotive gems accompanied by photographer Michael Alan Ross. As America's Motor City, Detroit is an emotional and historical mecca for car enthusiasts, capable of drawing hundreds of thousands of car people for events like Woodward Dream Cruise and attracting design-forward companies like Shinola. At the same time, it's intimidating to navigate, with numerous dodgy neighborhoods and risky abandoned factory sites. Add it all together and you have fascinating and intriguing opportunities to dig for barn-find gold.

Quarter-Mile Corvettes 1953-1975 Steve Holmes, 2024-04-15 Re-live Corvette's early years at the drag strip! Famously known as "America's sports car," the Chevrolet Corvette came to market in 1953. That same year, the newly

established National Hot Rod Association (NHRA) hosted its first event. The Corvette was never intended for quarter-mile drag racing, and it appeared to be completely at odds with the sport. Early equipment included an underpowered Blue Flame 6-cylinder motor and automatic transmission. But somehow, the two have become forever entwined. The Corvette brought an element of class and style to drag racing. On the showroom and on the street, it has always been unique. It is truly American. Likewise, the uniqueness that sets it apart from everything else also meant that it had no natural competition on the drag strip. However, that fact didn't dampen enthusiasm. Indeed, the NHRA and other governing bodies introduced Sports Car divisions in the late 1950s, catering to both stock and modified vehicles. Naturally, these classes were packed with Corvettes. Racing historian Steve Holmes breaks new ground by unearthing the complete early history of the Corvette in drag racing. Quarter-Mile Corvettes focuses on the period from 1955 to 1975, which spans the first 20 years of Corvette V-8 production. Fittingly, this was also the era considered by many to be the greatest in drag racing's history, and Corvettes encapsulated the vibrancy of the period in a way that will never be repeated. Certainly, Chevrolet never intended for the Corvette to become a quarter-mile terror, but today, its nameplate has become one of the longest running in all of drag racing.
