**Virtual Music** Shara Rambarran, 2021-04-08 Virtuality has entered our lives making anything we desire possible. We are, as Gorillaz once sang, in an exciting age where 'the digital won't let [us] go...' Technology has revolutionized music, especially in the 21st century where the traditional rules and conventions of music creation, consumption, distribution, promotion, and performance have been erased and substituted with unthinkable and exciting methods in which absolutely anyone can explore, enjoy, and participate in creating and listening to music. Virtual Music explores the interactive relationship of sound, music, and image, and its users

(creators/musicians/performers/audience/consumers). Areas involving the historical, technological, and creative practices of virtual music are surveyed including its connection with creators, musicians, performers, audience, and consumers. Shara Rambarran looks at the fascination and innovations surrounding virtual music, and illustrates key artists (such as Grace Jones, The Weeknd), creators (such as King Tubby, Kraftwerk, MadVillain, Danger Mouse), audiovisuals in video games and performances (such as Cuphead and Gorillaz), audiences, and consumers that contribute in making this musical experience a phenomenon. Whether it is interrogating the (un)realness of performers, modified identities of artists, technological manipulation of the Internet, music industry and music production, or accessible opportunities in creativity, the book offers a fresh understanding of virtual music and appeals to readers who have an interest in this digital revolution.

**Household Goods Moving Industry** Susan A.

Fleming,2010-06 Each year, the Federal Motor Carrier Safety Admin. (FMCSA) receives about 3,000 consumer complaints regarding interstate moving companies: some involve egregious offenses, such as holding goods hostage. Over the years, Congress has raised concerns about the adequacy of FMCSA's oversight of the industry. This report reviewed the: (1) extent to which states have used authority in the Safe, Accountable, Flexible, Efficient Transportation Equity Act to take federal enforcement action against interstate movers and challenges in using that authority; (2) extent and timeliness of FMCSA's progress in its consumer protection efforts; and (3) advantages and disadvantages of options for enhancing consumer protection in the industry. *The Governance of British Higher Education* Ted

Tapper,2007-05-05 How has the system of governance changed? Do British higher education institutions still exercise autonomous control over their development? In this book, these questions are pursued through a three-pronged strategy. This book will have lessons for those examining higher education on a comparative/international basis. It is a serious piece of analysis i.e. it is purposefully non-polemical, and it is well-written, non-jargonised and accessible.

Europe on the move Peter Gatrell,Lyubov

Zhvanko,2017-06-26 Mass population displacement affected millions of Europe's civilians across the different theatres of war in 1914-18. At the end of the war, a senior Red Cross official wrote 'there were refugees everywhere. It was as if the entire world had to move or was waiting to move'. Europe on the move: refugees in the era of the Great War, 1912-23 is the first attempt to understand their experiences as a whole and to establish the political, social and cultural significance and ramifications of the wartime refugee crisis. Drawing on original research by leading specialists from more than a dozen countries, it will become the definitive work on the subject and will appeal to anyone who wishes to understand how governments and public opinion responded to refugees a century ago.

**Journal of Character Education** Jacques S.

Benninga,Marvin W Berkowitz,2017-11-01 The Journal of Character Education is the only professional journal in education devoted to character education. It is designed to cover the field—from the latest research to applied best practices. We

include original research reports, editorials and conceptual articles by the best minds in our field, reviews of latest books, and other relevant strategies and manuscripts by educators that describe best practices in teaching and learning related to character education. The Journal of Character Education has for over a decade been the sole scholarly journal focused on research, theory, measurement, and practice of character education. This issue includes four empirical articles and a practitioner's voice section. Topics covered in this issue include different approaches to character education in the classroom (e.g., after school, reading strategies), applications to cheating, and teacher preparation.

**The Birds of Turkey** Guy Kirwan, Barbaros Demirci, Hilary Welch, Kerem Boyla, Metehan Özen, Peter Castell, Tim Marlow, 2010-06-30 Turkey is a popular destination for birders and tourists, and although there has been much published on its birds over the past 40 years, there has never been a comprehensive avifauna. The Birds of Turkey redresses this. It contains a detailed account of every species on the Turkish list, with a full breakdown of records and status, distribution in Turkey, and taxonomy. There are also authoritative introductory chapters on geography, climate, habitats, history of ornithology and conservation.

**Exclusive Use in an Inclusive Environment** Philip De Man, 2016-07-25 This book aims to find a workable interpretation of the non-appropriation principle that is compatible with both

the existing international space law framework and the move of the private space industry towards the mining of asteroids and other celestial bodies. It does so by analysing the rules on the use of orbits as limited natural resources as a concrete indication of how space resources can be exploited by one user while respecting the non-appropriation principle and the interests of other users in space. This analysis is complemented by a thorough review of the meaning of property rights in the context of the existing international space law regime. This allows the author to distinguish between the lawful exploitation and unlawful appropriation of resources in a manner that could pave the way for a workable asteroid mining regime that takes into account the needs of individual companies and the international community. Exclusive use in an inclusive environment frames the legal regime of the exploitation of natural resources in outer space as the most pressing example to date of the tension that arises between the rights of a single spacefaring actor and the interests of the broader international community. Though academic in its approach in dealing with one of the most fundamental issues of space law to date, the book has very practical ambitions. By offering a pragmatic interpretation of the space law principles that are likely to remain the legal foundations of asteroid mining for the foreseeable future, *Exclusive use in an inclusive environment* hopes to inform academics, practitioners and policymakers alike in their future attempts at working out a fair, equitable and effective management regime for the exploitation of natural resources in outer space.

*The Neumann Compendium* F Bródy, T Vámos, 1995-06-30

After three decades since the first nearly complete edition of John von Neumann's papers, this book is a valuable selection of those papers and excerpts of his books that are most characteristic of his activity, and reveal that of his continuous influence. The results receiving the 1994 Nobel Prizes in economy deeply rooted in Neumann's game theory are only minor traces of his

exceptionally broad spectrum of creativity and stimulation. The book is organized by the specific subjects-quantum mechanics, ergodic theory, operator algebra, hydrodynamics, economics, computers, science and society. In addition, one paper which was written in German will be translated and published in English for the first time. The sections are introduced by short explanatory notes with an emphasis on recent developments based on von Neumann's contributions. An overall picture is provided by Ulam's, one of his most intimate partners in thinking, 1958 memorial lecture. Facsimilae and translations of some of his personal letters and a newly completed bibliography based on von Neumann's own careful compilation are added.

Science and Heritage Great Britain: Parliament: House of Lords: Science and Technology Committee,2006-11-16 The conservation of cultural artefacts, such as buildings, works of art

and books presents a fascinating, rich and diverse range of scientific challenges, and the UK has a high reputation in the field, based in large part on past achievements. However, the Committee's report finds that our national standing is now under threat as the sector is fragmented and under-valued, and the DCMS has completely failed to grasp the threat to heritage science, and thus to conservation. The Department's emphasis on widening public access to our cultural heritage is a laudable objective, but this policy needs to be balanced by effective conservation, based on sound science, if we are to leave a sustainable cultural heritage for the benefit of future generations. The Committee also calls on the heritage sector to come together in developing a broad-based national strategy for heritage science, to be championed at departmental level by the newly appointed DCMS Chief Scientific Adviser, and co-ordinated administratively by English Heritage, drawing on input from all bodies active in the sector including those in Scotland, Wales and Northern Ireland.
