The Negro Motorist Green Book Victor H. Green, The idea of The Green Book is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

Solarversia MR Toby Downton,2015-08-18 It's the 29th February 2020 and Nova Negrahnu cannot wait to start playing Solarversia, a year-long game based in a virtual world that's modelled on the real world solar system. Given three lives, three vehicles, and told to master the Science of Solarversia to stand a chance of winning, players compete against 100 million people for the 10m grand prize, and a place in the history books. Solarversia starts three months before Nova's A-levels, the life-changing exams that could see her win a place at Nottingham, the university that Charlie attends, the second-year student she falls for on an open-day visit. As she strains to balance her addiction to the game with her mounting schoolwork, Nova's world is unexpectedly turned upside down when the Holy Order, a mysterious cult-like organisation sets its sights on the game and Spiralwerks, its creator. Told from three different perspectives - Nova the gamer, Artica Kronkite, the CEO of Spiralwerks, and Casey Brown, a newly-initiated member of the Holy Order - Solarversia is a game that author Toby Downton hopes to make for real, to launch in 2020, so that people can actually play it. From the initial press release: The world of virtual reality is about to fundamentally reshape the way in which we live, work and play. The Oculus Rift - the much-lauded and potentially transformational VR headset, which broke crowdfunding records in 2012, and was recently acquired by Facebook for \$2 billion - is scheduled to launch in early 2016. While its most obvious impact will hit the world's 700 million plus gamers, Facebook CEO Mark Zuckerberg believes the potential VR impact to be far more profound: Imagine enjoying a court side seat at a game, studying in a classroom of students and teachers all over the world or consulting with a doctor face-to-face - just by putting on goggles in your home. The relatively new genre of litRPG, or virtual reality inspired science fiction centred around the gaming industry, is booming, with Ernest Cline's bestseller Ready Player One already in production for a major movie adaptation with Spielberg directing. Downton is emerging as a driving force in the VR revolution. His novel Solaversia is just the first step in his thrillingly ambitious multi-platform story-telling experience that will explore the relationships between artificial intelligence, technology and the human spirit. Downton has incorporated his tech-company - Spiralwerks - in the real world, developing Solarversia as a commercially available game, ready to storm the games market in 2020. Accompanying the publication of Solarversia is the Golden Ticket promotion, which will enable readers to win one of a hundred specially reserved places within the Player's Grid, through a series of innovative competitions.

cubic VR, object movies and VR scenes. A companion CD-ROM demonstrates topics covered in the book and provides samples of film prepared for web delivery.
