**Game Engine Design and Implementation** Alan Thorn,2011-08-24 Part of the new Foundations of Game Development Series! Almost every video game on the market today is powered by a game engine. But, what is a game engine? What does it do? How are they useful to both developers and the game? And how are they made? These, and other important engine related questions, are explored and discussed in this book. In clear and concise language, this book examines through examples and exercises both the design and implementation of a video game engine. Specifically, it focuses on the core components of a game engine, audio and sound systems, file and resource management, graphics and optimization techniques, scripting and physics, and much more. Suitable for students, hobbyists, and independent developers, this no-nonsense book helps fine-tune an understanding of solid engine design and implementation for creating games that sell.

**Creative Management of Small Public Libraries in the 21st Century** Carol Smallwood,2014-12-23 Creative Management of Small Public Libraries in the 21st Century is an anthology on small public libraries as centers of communities serving populations under 25,000 that make up most of the public library systems in the United States. A wide selection of topics was sought from contributors with varied backgrounds reflecting the diversity of small public libraries. The thirty-two chapters are arranged: Staff; Programming; Management; Technology; Networking; Fundraising; User Services and provide tools to lead a local public library with relevant and successful services. This volume shares a common sense approach to providing a small (in staff size or budget) but mighty (in impact and outcome) public library service. The contributors demonstrate that by turning the service delivery team outward to the community with enthusiasm and positive energy, it is possible to achieve significant results. Many chapters summarize best practices that can serve as checklists for the novice library director or as a review for the more seasoned manager working through new responsibilities. Chapters are tactical, focusing on specific issues for managers such as performance evaluations, effective programming, or e-reader services. Time management is crucial in a small or rural public library as well as the challenges associated with managing Friends and volunteers. While most public libraries do not have the resources to satisfy customer expectations for instant gratification, ultra-convenience and state-of-the-art technologies, The authors of this book details strategies and methods for providing top-notch customer service while moving beyond customer service to the creation of meaningful customer relationships. This volume makes an important contribution to the literature by reminding us that public libraries transform communities of every size. In fact, never before has the role of the public library been a more critical thread in the fabric of community life.

**Experimenting the Human** G Douglas Barrett,2023-01-13 An engaging argument about what experimental music can tell us about being human. In *Experimenting the Human*, G Douglas Barrett argues that experimental music speaks to the contemporary posthuman, a condition in which science and technology decenter human agency amid the uneven temporality of postwar global capitalism. Time moves forward for some during this period, while it seems to stand still or even move backward for others. Some say we're already posthuman, while others endure the extended consequences of never having been considered fully human in the first place. Experimental music reflects on this state, Barrett contends, through its interdisciplinary involvements in postwar science, technology, and art movements. Rather than pursuing the human's beyond, experimental music addresses the social and technological conditions that support such a pursuit. Barrett locates this tendency of experimentalism throughout its historical entanglements with cybernetics, and in his intimate analysis of Alvin Lucier's neurofeedback music, Pamela Z's BodySynth performances, Nam June Paik's musical robotics, Pauline Oliveros's experiments with radio astronomy, and work by Laetitia Sonami, Yasunao Tone, and Jerry Hunt. Through a unique meeting of music studies, media theory, and art history, *Experimenting the Human* provides fresh insights into what it means to be human.

*The Lost Plot* Genevieve Cogman,2018-01-09 After being commissioned to find a rare book, Librarian Irene and her assistant, Kai, head to Prohibition-era New York and are thrust into the middle of a political fight with dragons, mobsters, and Fae in this novel in the Invisible Library series. In a 1920s-esque New York, Prohibition is in force; fedoras, flapper dresses, and tommy guns are in fashion: and intrigue is afoot. Intrepid Librarians Irene and Kai find themselves caught in the middle of a dragon political contest. It seems a young Librarian has become tangled in this conflict, and if they can't extricate him, there could be serious repercussions for the mysterious Library. And, as the balance of power across mighty factions hangs in the balance, this could even trigger war. Irene and Kai are locked in a race against time (and dragons) to procure a rare book. They'll face gangsters, blackmail, and the Library's own Internal Affairs department. And if it doesn't end well, it could have dire consequences on Irene's job. And, incidentally, on her life...
