Multiple Sclerosis Rehabilitation Marcia Finlayson, 2012-08-01 MS is always in the back of your mind. If there is something you want to do, you always wonder if the MS will allow you to do it. —Darlene, living with MS for 22 years Living with multiple sclerosis (MS) is challenging and multidimensional. MS pervades all aspects of life: one's body becomes unpredictable and unreliable, one's identity and sense of self are tested, and relationships with others often change. MS symptoms emerge and remit; limitations evolve and progress. MS rehabilitation is an active, person-centered, and goal-oriented process embedded within a respectful and collaborative partnership between the person with MS and the members of his or her rehabilitation treatment team. Using the International Classification of Functioning, Disability and Health (ICF) as a guiding framework, *Multiple Sclerosis Rehabilitation: From Impairment to Participation* provides a comprehensive and evidence-based resource to inform and guide clinical reasoning and decision making during each phase of the MS rehabilitation process, from initial referral to post-discharge follow-up. With an emphasis on the application of evidence throughout the entire MS rehabilitation process, the specific objectives of the book are to increase the understanding of: The nature and impact of specific impairments, activity limitations, and participation restrictions experienced by people with MS How to select and use valid, reliable, and relevant assessment tools to inform the development of rehabilitation goals and intervention plans, and to evaluate outcomes This book provides information about the nature and impact of MS on the daily lives of people living with the disease, describes evidence-based assessment processes and instruments, and summarizes current knowledge that can inform goal setting and intervention planning. Thoughtful application of the knowledge contained in this book will inform and guide rehabilitation providers to work collaboratively with people with MS and enable them to achieve their goals for participation in everyday life.

What's the Point? Josefine A. Fowler, 2010-02 *What's The Point?* was written to bring to light the many words in the English language that cause some problems for young readers and writers. It's written in rhyme with a humorous tone to stimulate interest and retention.

Multiple Criteria Decision Making Günter Fandel, Tomas Gal, 2012-12-06 The organizers of the 12th International Conference on Multiple Criteria Decision Making (MCDM) held June 19-23, 1995 in Hagen received the second time the opportunity to prepare an international conference on MCDM in Germany; the first opportunity has been the 3rd International Conference on MCDM in Königswinter, 1979. Quite a time elapsed since then and therefore it might be interesting to compare some indicators of the development of the International Society on MCDM, which has been founded in Königswinter. Stanley Zionts has been elected first president and all 44 participants of that Conference became founding members. Today our Society has over 1200 members and its own Journal (MCDM World Scan). In Hagen, 1996, we had 152 participants from 34 countries. It is interesting to mention that also other Groups established their organization, like the European Working Group on Multiple Criteria Decision Aid, the German Working Group on Decision Theory and Applications, the Multi Objective Programming and Goal Programming Group, ESIGMA, and some others. It is also interesting to note that the intersection of members of all these Groups and Societies is not empty and there is quite a cooperation among them.

Binary and Multiple Stars as Tracers of Stellar Evolution Zdenek Kopal, Jürgen H. Rahe, 2012-12-06 Proceedings of the 69th Colloquium of the International Astronomical Union held in Bamberg, F.R.G., August 31-September 3, 1981

Childhood Antecedents of Multiple Personality Richard P. Kluft, 1985 Childhood Antecedents of Multiple Personality Disorder includes topics such as the effect of child abuse on the psyche, the development of multiple personality disorder: predisposing, precipitating, and perpetuating factors, and the relationship among dissociation, hypnosis, and child abuse in the development of multiple personality disorder.

Multiple Criteria Problem Solving S. Zionts, 2012-12-06 The objective of this conference was to foster a healthy exchange of ideas and experience in the domain of multiple criteria problem solving. This conference was an outgrowth of an earlier conference I organized with Herve Thiriez at CESA, Jouy-en-Josas, France in 1975 during my stay at the European Institute in Brussels. When I re joined the State University of New York at Buffalo that year, I began to search for potential sponsors for this conference. Approximately one year later when the prospects began to look promising, I contacted several individuals to act as an informal coordinating committee for the conference. I wanted to avoid biasing the conference completely to my way of thinking! The members of this committee were Jim Dyer, Peter Fishburn, Ralph Kenney, Bernard Roy (Universite de Paris IX Dauphine who was unable to participate in the conference), and Milan Zeleny. Though the committee did not meet, per se, their inputs regarding format, possible participants, number of participants, length of the conference, and so on were of great value to me in planning and organizing the conference. I wish to acknowledge the contributions of this group. We were most fortunate in obtaining the financial support of the European Institute for Advanced Studies in Management, Brussels (one of the sponsors of the Jouy-en-Josas conference), the Office of Naval Research, and the State University of New York at Buffalo.

Multiple Muscle Systems Jack M. Winters, Savio L-Y. Woo, 2012-12-06 The picture on the front cover of this book depicts a young man pulling a fishnet, a task of practical relevance for many centuries. It is a complex task, involving load transmission throughout the body, intricate balance, and eye head-hand coordination. The quest toward understanding how we perform such tasks with skill and grace, often in the presence of unpredictable perturbations, has a long history. However, despite a history of magnificent sculptures and drawings of the human body which vividly depict muscle activity and interaction, until more recent times our state of knowledge of human movement was rather primitive. During the past century this has changed; we now have developed a considerable database regarding the composition and basic properties of muscle and nerve tissue and the basic causal relations between neural function and biomechanical movement. Over the last few decades we have also seen an increased appreciation of the importance of musculoskeletal biomechanics: the neuromotor system must control movement within a world governed by mechanical laws. We have now collected quantitative data for a wealth of human movements. Our capacity to understand the data we collect has been enhanced by our continually evolving modeling capabilities and by the availability of computational power. What have we learned? This book is designed to help synthesize our current knowledge regarding the role of muscles in human movement. The study of human movement is not a mature discipline.

Multiple Criteria Decision Analysis: State of the Art Surveys José Figueira, Salvatore Greco, Matthias Ehrgott, 2005 MULTIPLE CRITERIA DECISION ANALYSIS: State of the Art Surveys is the most comprehensive work available to survey the state of the art in MCDA to date. Its 25 chapters are organized in eight parts and are written by 52 international leading experts. Each of these parts covers one of the central streams of multiple criteria decision analysis literature. These literature streams are: MCDA today, Foundations of MCDA, Our Ranking Methods, Multiattribute Utility Theory, Non-Classical MCDA Approaches, Multiobjective Mathematical Programming, Applications, and MCDM Software. The handbook presents the most up-to-date discussions on well-established methodologies and theories in the field, while systematically surveying emerging fields in MCDA such as conjoint measurement, fuzzy preferences, fuzzy integrals, rough sets, etc. MULTIPLE CRITERIA DECISION ANALYSIS: State of the Art Surveys is a valuable reference volume (more than 2000 references) for the field of decision analysis. It provides graduate students, researchers, and practitioners with a sweeping survey of MCDA theory, methodologies, and applications. It is a handbook that is particularly suitable for use in seminars in Decision Analysis, Decision Support, and Decision Theory.

The Multiple Realization Book Thomas W. Polger, Lawrence A. Shapiro, 2016 Thomas W. Polger and Lawrence A. Shapiro provide a full investigation of multiple realisation - the idea that minds can be realised in ways other than the human brain. They cast doubt on the hypothesis and give an alternative framework for understanding explanations in the cognitive sciences, and in chemistry, biology, and related fields.

Multiple Intelligences Howard E Gardner, 2008-07-31 The most complete account of the theory and application of Multiple Intelligences available anywhere. Howard Gardner's brilliant conception of individual competence, known as Multiple Intelligences theory, has changed the face of education. Tens of thousands of educators, parents, and researchers have explored the practical implications and applications of this powerful notion, that there is not one type of intelligence but several, ranging from musical intelligence to the intelligence involved in self-understanding. Multiple Intelligences distills nearly three decades of research on Multiple Intelligences theory and practice, covering its central arguments and numerous developments since its introduction in 1983. Gardner includes discussions of global applications, Multiple Intelligences in the workplace, an assessment of Multiple Intelligences practice in the current conservative educational climate, new evidence about brain functioning, and much more.

Multiple Personality, Allied Disorders, and Hypnosis Eugene L. Bliss,1986 Since the time of Mesmer, in the late eighteenth century, spectacular feats of hypnosis have been documented by respected scientific researchers, yet hypnosis has remained divorced from the main body of science. In this groundbreaking work, Dr. Eugene Bliss shows that the hypnotic capability of the mind is important to the theory and practice of psychiatry, and suggests that it deserves much more attention and research. In *Multiple Personality, Allied Disorders and Hypnosis*, Bliss explores both the nature of multiple personality and hypnosis, and discusses how an understanding of the latter can provide insight into the nature of certain psychiatric disorders. For instance, he views multiple personality as a form of self-hypnosis, an instance of learned schizophrenia rather than an organic disorder, as is generally thought. He outlines the trace elements involved in multiple personality and other psychiatric disorders, provides a fascinating history of the origins and current ideas about hypnosis, and gives a detailed account of the use of hypnosis in the treatment of multiple personality. Based on thirty years of clinical experience, and filled with insightful personal observations, *Multiple Personality, Allied Disorders and Hypnosis* is an informative, fascinating book for psychiatrists, psychologists, and anyone intrigued by hypnosis and its possible beneficial use.

Multiples J. Melvin Smith,2009-09-21 Health insurance can be dangerous to your life. Richard Moore, a former army special operations officer, Captain of the Boston Police Department anti-terrorist department and Chief of Police in the little town of Winchendon, MA learned how dangerous first hand. Follow Richard and Stephanie Lynn, a Boston Globe investigative reporter, as they form a loose alliance and pursue a string of deaths in and around Boston. They barely survive a harrowing series of encounters with corporate felons, hired thugs, and an assassin named Ghost. Ultimately, they come face-to-face with Rob Lee, an outlawed rogue CIA operative and Richard's former covert operations handler. Lee reveals that he is behind the health insurance company's scheme to manipulate multiples, factors that influence its stock values, by killing policyholders who need expensive care. Richard's wife was one of those killed.

On Multiple Selves David Lester,2017-09-08 On *Multiple Selves* refutes the idea that a human being has a single unified self. Instead, David Lester argues, the mind is made up of multiple selves, and this is a normal psychological phenomenon. Lester expands on his earlier work on the phenomenon, illuminating how a multiple-self theory of the mind is critically necessary to understanding human behavior. Most of us are aware that we have multiple selves. We adopt different facade selves depending on whom we are with. Lester argues that contrary to the popular psychological term, false self, these presentations of self are all part of us, not false; they simply cover layers of identity. He asserts that at any given moment in time, one or another of our subselves is in control and determines how we think and act. Lester covers situations that may encourage the development of multiple selves, ranging from post-traumatic stress resulting from combat to bilinguals who speak two (or more) languages fluently. Lester's views of multiple selves will resonate with readers' individual subjective experience. On *Multiple Selves* is an essential read for psychologists, philosophers, and social scientists and will fascinate general readers as well.

Multiple Case Study Analysis Robert E. Stake,2013-04-29 Examining situational complexity is a vital part of social and behavioral science research. This engaging text provides an effective process for studying multiple cases--such as sets of teachers, staff development sessions, or clinics operating in different locations--within one complex program. The process also can be used to investigate broadly occurring phenomena without programmatic links, such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that balance common issues across the group of cases with the unique features and context of each case. Three actual case reports from a transnational early childhood program illustrate the author's approach, and helpful reproducible worksheets facilitate multicase recording and analysis.
