Madness Network News Reader Sherry Hirsch, 1974 First person account.

**News** Howard Tumber, 1999 News: A Reader sets out to provide students with an introduction to some of the key theoretical debates within the field of the sociology of news and journalism. It includes many of the accepted classics together with more recent pieces that address contemporary debates. The Reader brings out the diversity of work on the analysis of news and indicates the points at which arguments have led to new directions and paradigms. All the pieces in the book have been carefully edited. The essence of each work has been captured in extracts that maintain their integrity to readers unfamiliar with the evolution of this field of research.

**Stop Reading the News** Rolf Dobelli, 2011-01-07 News is to the mind what sugar is to the body. In 2013 Rolf Dobelli stood in front of a roomful of journalists and proclaimed that he did not read the news. It caused a riot. Now he finally sets down his philosophy in detail. And he practises what he preaches: he hasn't read the news for a decade. Stop Reading the News is Dobelli's manifesto about the dangers of the most toxic form of information - news. He shows the damage it does to our concentration and well-being, and how a misplaced sense of duty can misdirect our behaviour. From the author of the bestselling The Art of Thinking Clearly, Rolf Dobelli's book offers the reader guidance about how to live without news, and the many potential gains to be had: less disruption, more time, less anxiety, more insights. In a world of increasing disruption and division, Stop Reading the News is a welcome voice of calm and wisdom.

**Reading the News** Robert Karl Manoff,Michael

Schudson,1986 We take our news for granted: that it will inform us about the significant people and cite the authoritative ones, reflect the world the way it is, and tell us why something happens as it does. Now, six working journalists, press critics, and scholars at the leading edge of media criticism have been specially commissioned to make the familiar act of reading the news into a fresh and revealing event. Taking the famous five W's and an H (Who, What, When, Where, Why, and How), the authors turn these questions back on journalism for the first time to show us exactly what to make of the press. Leon V. Sigal Who? Sources Make the News Carlin Romano What? Grisly Truth about Bare Facts Michael Schudson When? Deadlines, Datelines, and History Where? Cartography, Community, and the Cold War James W. Carey Why And How? The Dark Continent of American Journalism Robert Karl Manoff Writing the News (By Telling the Story) For everyone who reads the newspaper, for the journalist, and for the media critic alike, these essays offer fresh, provocative insights into a centerpiece of American culture, the news.

**Introduction to Information Systems** R. Kelly Rainer (Jr.),Casey G. Cegielski,Ingrid Splettstoesser-Hogeterp,Cristobal Sanchez-Rodriguez,2013-08-30 The goal of Introduction to Information Systems, 3rd Canadian Edition remains the same: to

teach all business majors, especially undergraduate ones, how to use information technology to master their current or future jobs and to help ensure the success of their organization. To accomplish this goal, this text helps students to become informed users; that is, persons knowledgeable about information systems and information technology. The focus is not on merely learning the concepts of IT but rather on applying those concepts to facilitate business processes. The authors concentrate on placing information systems in the context of business, so that students will more readily grasp the concepts presented in the text. The theme of this book is What's In IT for Me? This question is asked by all students who take this course. The book will show you that IT is the backbone of any business, whether a student is majoring in Accounting, Finance, Marketing, Human Resources, or Production/Operations Management. Information for the Management Information Systems (MIS) major is also included.

**Water in the 21st-century West** Char Miller,2009 Water in the 21st-Century West offers a timely look at the central issue facing the American West—the region's diminishing water supply. It collects the best reporting on the subject, drawn from the pages of High Country News, the newspaper that sets the standard for coverage of environmental issues in the West. This book provides compelling perspectives on the water issues and controversies that roil the region, from the Pacific Northwest to the Great Plains, from the interior mountains to the southwestern deserts. The book's contributors—among them activists, scholars, scientists,

and many of the nation's finest environmental journalists—offer hardhitting analyses of regional dilemmas, including the unpredictable impact of climate change; intense debates over decommissioning dams; emerging Native American water power; toxic threats to groundwater quality; and the escalating urban demands for water in Los Angeles, Las Vegas, Denver, Salt Lake City, and the Bay Area. *Water in the 21st-Century West* captures the range and nature of the arguments that have defined water politics in the region over the past decade. The collection probes the issues and explores creative attempts to find solutions, bringing a focus and clarity to the most contentious environmental issue the West faces. *Water in the 21st-Century West* will be an essential primer in assessing and mapping the West's water future.

*Oxford Handbook of Internet Psychology* Adam Joinson, Katelyn McKenna, Tom Postmes, Ulf-Dietrich Reips, 2009-02-12 Over one billion people use the Internet globally. Psychologists are beginning to understand what people do online, and the impact being online has on behaviour. It's making us re-think many of our existing assumptions about what it means to be a social being. For instance, if we can talk, flirt, meet people and fall in love online, this challenges many of psychology's theories that intimacy or understanding requires physical co-presence. The *Oxford Handbook of Internet Psychology* brings together many of the leading researchers in what can be termed 'Internet Psychology'. Though a very new area of research, it is growing at a phenomenal pace. In addition to well-studied areas of investigation, such as social identity theory, computer-mediated communication and virtual communities, the volume also includes chapters on topics as diverse as deception and misrepresentation, attitude change and persuasion online, Internet addiction, online relationships, privacy and trust, health and leisure use of the Internet, and the nature of interactivity. With over 30 chapters written by experts in the field, the range and depth of coverage is unequalled, and

serves to define this emerging area of research. Uniquely, this content is supported by an entire section covering the use of the Internet as a research tool, including qualitative and quantitative methods, online survey design, personality testing, ethics, and technological and design issues. While it is likely to be a popular research resource to be 'dipped into', as a whole volume it is coherent and compelling enough to act as a single text book. The Oxford Handbook of Internet Psychology is the definitive text on this burgeoning field. It will be an essential resource for anyone interested in the psychological aspects of Internet use, or planning to conduct research using the 'net'.
