New Zealand Ways of Speaking English Allan Bell, Janet Holmes, 1990 This is a collection of research papers on the sociolinguistics and pragmatics of New Zealand English. Style Nikolas Coupland, 2007-08-09 Style refers to ways of speaking - how speakers use the resource of language variation to make meaning in social encounters. This 2007 book develops a coherent theoretical approach to style in sociolinguistics, illustrated with copious examples. It explains how speakers project different social identities and create different social relationships through their style choices, and how speech-style and social context inter-relate. Style therefore refers to the wide range of strategic actions and performances that speakers engage in, to construct themselves and their social lives. Coupland draws on and integrates a wide variety of contemporary sociolinguistic research as well as his own extensive research in this field. The emphasis is on how social meanings are made locally, in specific relationships, genres, groups and cultures, and on studying language variation as part of the analysis of spoken discourse.

Personality Presenters Frances Bonner, 2016-05-06 Television presenters are key to the sociability of the medium, speaking directly to viewers as intermediaries between audiences and those who are interviewed, perform or compete on screen. As targets of both great affection and derision from viewers and the subjects of radio, internet, magazine and newspaper coverage, many have careers that have lasted almost as long as post-war television itself. Nevertheless, as a profession, television presenting has received little scholarly attention. Personality Presenters explores the role of the television presenter, analysing the distinct skills possessed by different categories of host and the expectations and difficulties that exist with regard to the promotion of the various films, books, consumer and cultural products with which they are associated. The close involvement of presenters with the content that they present is examined, while the impact of the presenters' own celebrity on the tasks that they perform is scrutinised. With a focus on non-fiction entertainment shows such as game shows, lifestyle and reality shows, chat, daytime and talk shows, this book explores issues of consumer culture, advertising and celebrity, as well as the connection of presenters with ethical issues. Offering detailed case studies of internationally recognised presenters, as well comparisons between national presenters from the UK and Australia, Personality Presenters provides a rich discussion of television presenters as significant conduits in the movement of ideas. As such, it will appeal to sociologists as well as those working in the fields of popular culture, cultural and media studies and cultural theory.

Inventing Television Culture Janet Thumim, 2004-12-16 During the fertile decade 1955-65 the television institution emerged in a form which would be familiar for the next half century: this book attends to two aspects of its formation. The first entails the production strategies, programmes, schedules, and emergent generic modes as these were invented through a process of trial and error, allied to a close attention to building the mass audience - in short the question of how television invented itself. The second aspect concerns the place of women and the concept 'feminine' in the new institution. Television offered women access to the public sphere in ways that were potentially disruptive of the order prevailing in mid-1950s Britain. Apart from new employment opportunities, images of women and definitions of the feminine were purveyed nightly to an heterogeneous audience of millions, an audience that was itself under construction throughout the period. Through close attention to three discrete areas of programming (women's programmes, news and current affairs, and popular drama), the book aims to convey a sense of the excitement entailed in establishing the institution and to ask where and how it may have posed challenges to the prevailing patriarchal hegemony. Hence the productive interplay of two terms, television and the feminine, both of which were evolving rapidly during the period, is explored in the context of the contemporary discursive climate.

The News Is Read Charlotte Green, 2014-10-07 For twenty-seven years Charlotte Green was one of the most iconic newsreaders on Radio 4. Her rich, velvety voice was a staple on the radio and a treat for millions of listeners. After leaving Radio 4 in 2013, Charlotte joined Classic FM, where she now presents an arts and culture programme, Charlotte Green's Culture Club. In this highly

entertaining and touching autobiography, Charlotte tells the story of the woman behind the voice, with all the endearing qualities that have delighted her listeners for years and gained her various prestigious accolades. *The News is Read* is a must-have for anyone wanting to spend a few hours in the company of this warm, charming and wonderfully modest woman whose writing is as engaging as her voice.

Cybersociety 2.0 Steve Jones, 1998-07-15 *Cybersociety 2.0*, the new edition of Steven G. Jones's *Cybersociety*, is also rooted in criticism and analysis of computer-mediated technologies to assist readers in becoming critically aware of the hype and hopes pinned on computer-mediated communication and the cultures that are emerging among Internet users. Both books are products of a particular moment in time and serve as snapshots of the concerns and issues that surround the burgeoning new technologies of communication. After a brief introduction to the history of computer-mediated communication, each chapter in this volume specifically highlights specific cyber societies and how computer-mediated communication effects the notion of self and its relationship to the community. Contributors probe issues of community, standards of conduct, communication, the means of fixing identity, knowledge, information, and the exercise of power in social relations. They also question how traditional sociological inquiry can adapt itself to most effectively study computer-mediated social formations. Both timely and thought-provoking, *Cybersociety 2.0* belongs on the bookshelf of students and scholars in fields of communication, popular culture, American studies, and mass communication.

Introducing Language and Society Rodney H. Jones, Christiana Themistocleous, 2022-02-03 This accessible and entertaining textbook introduces students to both traditional and more contemporary approaches to sociolinguistics in a real-world context, addressing current social problems that students are likely to care about, such as racism, inequality, political conflict, belonging, and issues around gender and sexuality. Each chapter includes exercises, case studies and ideas for small-scale research projects, encouraging students to think critically about the different theories and approaches to language and society, and to interrogate their own beliefs about language and communication. The book gives students a grounding in the traditional concepts and techniques upon which sociolinguistics is built, while also introducing new developments from the last decade, such as translanguaging, multimodality, superdiversity, linguistic landscapes and language and digital media. Students will also have online

access to more detailed examples, links to video and audio files, and more challenging exercises to strengthen their skills and confidence as sociolinguists.

Information Technology Digest ,1994

Tajik Linguistics Shinji Ido,Behrooz Mahmoodi-Bakhtiari,2023-01-30 It is hardly an overstatement to say that Soviet linguists had a monopoly over Tajik linguistics before the dissolution of the Soviet Union, when most studies on the language were accessible exclusively through Russian and Tajik. Today, however, linguists dealing with Tajik are diverse not only in terms of their location but also in terms of their disciplinary orientation within linguistics, making it difficult for the general linguist to work out the state of the art of the linguistic study of Tajik. This volume aims to address this difficulty by collecting in a handbook format recent (post-Soviet) developments in the study of Tajik that now lie scattered in different subdisciplines of linguistics. The volume thus showcases the state of the art of post-Soviet Tajik linguistics and can be used as a guide for linguists interested in the language.
