U.S. Data Breach Notification Law John P. Hutchins,Anne P. Caiola,2007 In 2005, 20 different states and the City of New York followed California's lead and passed laws seeking to require entities collecting or storing personally identifiable information to notify the subjects of the information if that information allows unauthorized third parties access to that information. There are now 21 different state laws on the subject, many with very different requirements. Federal legislation is hoped for, but passage of broadly preemptive federal legislation is far from certain. This book provides comprehensive guidance to all 21 state (and one local) legislative efforts at breach notification statutes, categorizes the various aspects of such statutes and specifically describes how each different state deals with each aspect. It points out the similarities and differences of each state law. The approach is simply a detailed summary of each different legislative scheme.

Worldwide Merger Notification Requirements George L. Paul,J. Mark Gidley,2008-01-01 Although international mergers continue to become more common, merger control regimes are wildly diverse, and there is no procedurally harmonized international system of merger notification. Instead, any one of the plethora of inconsistent regulations can hold up your transaction. The current edition of Worldwide Merger Notification Requirements evaluates the merger notification requirements of over 215 jurisdictions. In this book, the leading authorities at White & Case provide a complete road map for parties contemplating a multinational transaction by highlighting the disparate ways in which competition authorities treat mergers, including differences in notification timing; filing fees; turnover, size, and post-merger market share thresholds; potential penalties; volume and type of required filing information; and the multitude of standards and definitions that pervade every multinational transaction. This is an easy way for you to avoid time-consuming and costly bureaucratic obstacles! Wherever you may be advising on a merger, Worldwide Merger Notification Requirements will let you immediately determine: Where do I have to seek regulatory approval? When am I required to request approval: pre-merger, post-merger or is notification voluntary? Which countries do not require regulatory approval? How long does the approval process take? What key substantive issues will the agency examine? How much will it cost? And more!

Intelligent Notification Systems Abhinav Mehrotra,Mirco Musolesi,2020-01-03 Notifications provide a unique mechanism for increasing the effectiveness of real-time information delivery systems. However, notifications that demand users' attention at inopportune moments are more likely to have adverse effects and might become a cause of potential disruption rather than proving beneficial to users. In order to address these challenges a variety of intelligent notification mechanisms based on monitoring and learning users' behavior have been proposed. The goal of such mechanisms is maximizing users' receptivity to the delivered information by automatically inferring the right time and the right context for sending a certain type of information. This book presents an overview of the current state of the art in the area of intelligent notification mechanisms that rely on the awareness of users' context and preferences. We first present a survey of studies focusing on understanding and modeling users' interruptibility and receptivity to notifications from desktops and mobile devices. Then, we discuss the existing challenges and opportunities in developing mechanisms for intelligent notification systems in a variety of application scenarios.
