Moonshot Brian Floca,2019-04-09 “An extraordinary delight for a reader of any age.” —The New York Times Book Review Brian Floca explores Apollo 11’s famed moon landing with this newly expanded edition of Moonshot! Simply told, grandly shown, and now with eight additional pages of brand-new art and more in-depth information about the historic moon landing, here is the flight of Apollo 11. Here for a new generation of readers and explorers are the steady astronauts clicking themselves into gloves and helmets, strapping themselves into sideways seats. Here are their great machines in all their detail and monumentality, the ROAR of rockets, and the silence of the Moon. Here is a story of adventure and discovery—a story of leaving and returning during the summer of 1969, and a story of home, seen whole, from far away.

Red Thunder John Varley,2020-09-22 “The heart-pounding space race is on . . . in this riveting SF thriller” from the Hugo and Nebula Award-winning author of Red Lightning and Rolling Thunder (Publishers Weekly, starred review). As Chinese and US spacecraft compete to be the first to land on Mars, a former astronaut, his cousin, and four teens from Florida decide to take matters into their own hands. If they can quickly build their own space-worthy ship using scrap metal, appliances, and power tools, they have a chance to come from behind—thanks to an inventive new power source that can propel them to the Red Planet within three days. No guts, no glory . . . “Varley’s great strength is in his characterizations, but in Red Thunder he also shows a strong sense of place. . . . If you are

willing to simply fantasize about fleeing your office cubicle and becoming a heroic space explorer, this novel will fulfill your wishes.” —The Washington Post “Fast paced . . . Engaging characters.” —Rocky Mountain News “Full of little gems of wit and intelligence.” —Booklist “[A] fun-filled adventure. Varley matches a serious literary style with an outrageous plot, and he’s one of the few writers in the field who could make it work.” —Chronicle

Biz'nss Magic Roy Staszak, 2019-03-12 Success is the feeling that you get from helping others. Our book is a compilation of successes and failures that start with the founding of this nation. You travel through centuries and experience the effects that US presidents can have on your business. Review success factors of several business leaders and learn how to share traits that make them

successful. Readers are challenged to find and implement ideas that will return profits to their business, making this a valuable investment of your time and money. Experience teaches that we often make our own luck. Fifty percent of net profits are donated to St. Jude's Children's Hospital. We thank you for your purchase. You will find the key to success under the alarm clock. (Benjamin Franklin) One hundred percent of the shots you don't take don't go in. (Wayne Gretzky) Keep away from people who try to belittle your ambitions. (Mark Twain) I don't measure a man's success by how high he climbs, but how high he bounces when he hits bottom. (Gen. George S. Patton) The way to get started is to quit talking and begin doing. (Walt Disney) Obstacles are those frightful things you see when you take your eyes off the goal. (Henry Ford) You only have to do a very few things right in your life, so long as you don't do too many things wrong. (Warren Buffett) Listen to your gut, no matter how good something sounds on paper. (Donald Trump)

A National Security Strategy in Plaid: The NSS as a Political Document, 1998 The Clinton Administration's National Security Strategy for a New Century of May 1997, hereafter referred to as the NSS, is an artful political document, sweeping in its objectives and attuned to the public sentiment of what constitutes the national interest. Whether it qualifies as a viable and rigorous national security strategy in the classic sense is another question. One could argue that it meets a number of the criteria for a successful strategy as defined by Professor Terry Diebel in his September 4 lecture to the War College: it is broad-gauged, long range, and most certainly purposeful. Indeed, in its breadth and its sense of purpose lies its political appeal. But ultimately this is a political document for public consumption, issued by an Administration that is, after all, elected. Its objectives are only slightly more controversial than love for mom and apple pie. By invoking the preamble of the Constitution in its opening lines, the Administration reassures the American people

that we are setting out to do what our forefathers had in mind, much as good Muslims turn to the hadith, the stories and sayings associated with the Prophet Mohammed, to justify their current actions. At the same time, there are no tough choices for the American people, no fixed priorities against which limited resources must be weighed. But can or should we expect anything different, given our democratic system?

Red Lightning John Varley, 2020-09-22 The sequel to *Red Thunder* is “a cosmic coming-of-age novel . . . [with] enthralling everyday heroics” from a Hugo and Nebula Award-winning author (Paul Di Filippo, SciFi.com). It doesn’t matter that Ray Garcia-Strickland’s father was one of the first men on Mars. The now overdeveloped planet has lost its hip factor, its luxurious hotels—like the one Ray’s father manages—overrun with gravity-dependent tourists from Earth. Ray is over the Red Planet. Soon he gets his own chance at interplanetary adventure, when an unknown object hits Earth and causes a massive tsunami. Ray heads back to Florida to help family and friends who’ve survived the devastation—and soon learns the so-called natural disaster could have unnatural consequences . . . “The book Robert A. Heinlein would have written if he lived in George Bush’s America.” —Cory Doctorow, Boing Boing “A highly satisfying sequel to *Red Thunder* . . . Much more than a simple adventure story, full of poignant moments and relevant social commentary.” —Kirkus Reviews, starred review “Drawing unabashedly on current events from 9/11 to Hurricane Katrina, the author mixes space opera-esque adventure and merriment with uncensored images of disaster areas and teenage sex. At his Heinlein-channeling best, Varley preaches the gospel of individual responsibility with all the fervor of a space-age libertarian revival preacher.” —Publishers Weekly “John Varley blends past fiction, current events and future tech to create a story all his own, but with classic roots in at least a half dozen of Heinlein’s juveniles.” —SF Site

The Engines Of God Jack McDevitt, 1995-12-01 The first Priscilla Hutchins novel from Jack McDevitt, hailed by Stephen King as “the logical heir to Isaac Asimov and Arthur C. Clarke.” Humans call them the Monument-Makers. An unknown race, they left stunning alien statues on distant planets in the galaxy. Each relic is different. Each inscription defies translation. Yet all are heartbreakingly beautiful. And for planet Earth, on the brink of disaster, they may hold the only key to survival for the entire human race.

Women Spacefarers Umberto Cavallaro, 2017-03-02 This book tells the fascinating stories of the valiant women who broke down barriers to join the space program. Beginning with the orbital flight of USSR cosmonaut Valentina Tereshkova in 1963, they became players in the greatest adventure of our time. The author contextualizes their accomplishments in light of the political and cultural climate, from the Cold War in the background to the changing status of women in society at large during the Seventies. The book includes the biographies of, and in some cases interviews with, the sixty women who flew in space in the first half century of space history. It reports their

achievements and some little known details. The result is a gallery of pioneering women who reached for the stars: women who, with exceptional skill, hard work, and dedication, reached impressive careers as accomplished pilots, researchers, and engineers; many are now in high level managerial positions both at NASA or in public and private organizations, and all left a legacy of strength.

Lunar Settlements Haym Benaroya, 2010-02-12 Bringing together some of the most recognized and influential researchers and scientists in various space-related disciplines, Lunar Settlements addresses the many issues that surround the permanent human return to the Moon. Numerous international contributors offer their insights into how certain technological, physiological, and psychological challenges must be met to make permanent lunar settlements possible. The book first looks to the past, covering the Apollo and Saturn legacies. In addition, former astronaut and U.S. Senator Harrison H. Schmitt discusses how to maintain deep space exploration and settlement. The book then discusses economic aspects, such as funding for lunar commerce, managing human resources, and commercial transportation logistics. After examining how cultural elements will fit into habitat design, the text explores the physiological, psychological, and ethical impact of living on a lunar settlement. It also describes the planning/technical requirements of lunar habitation, the design of both manned and modular lunar bases, and the protection of lunar habitats against meteoroids. Focusing on lunar soil mechanics, the book concludes with discussions on lunar concrete, terraforming, and using greenhouses for agricultural purposes. Drawing from the lunar experiences of the six Apollo landing missions to the many American and Soviet robotic missions to current space activities and research, this volume summarizes the problems, prospects, and practicality of enduring lunar settlements. It reflects the key disciplines, including engineering,

physics, architecture, psychology, biology, and anthropology, that will play significant roles in establishing these settlements.

Leviathans of Jupiter Ben Bova,2011-02-01 In Ben Bova's novel JUPITER, physicist Grant Archer led an expedition into Jupiter's hostile planetwide ocean, attempting to study the unusual and massive creatures that call the planet their home. Unprepared for the hostile environment and crushing pressures, Grant's team faced certain death as their ship malfunctioned and slowly sank to the planet's depths. However one of Jupiter's native creatures--a city-sized leviathan--saved the doomed ship. This creature's act convinced Grant that the huge creatures were intelligent, but he lacked scientific proof. Now, several years later, Grant prepares a new expedition to prove once and for all that the huge creatures are intelligent. The new team faces dangers from both the hostile environment and from humans who will do anything to make sure the mission is a failure, even if it means murdering the entire crew. One of Library Journal's Best SF/Fantasy Books of 2011 At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Scramble for the Skies Namrata Goswami,Peter A. Garretson,2020-10-06 With a focus on China, the United States, and India, this book examines the economic ambitions of the second space race. The authors argue that space ambitions are informed by a combination of factors, including available resources, capability, elite preferences, and talent pool. The authors demonstrate how these influences affect the development of national space programs as well as policy and law.
