Assessment Strategies for Online Learning Dianne Conrad, Jason Openo, 2018-07-15 Assessment has provided educational institutions with information about student learning outcomes and the quality of education for many decades. But has it informed practice and been fully incorporated into the learning cycle? Conrad and Openo argue that the potential inherent in many of the new learning environments being explored by educators and students has not been fully realized. In this investigation of a variety of assessment methods and learning approaches, the authors aim to discover the tools that engage learners and authentically evaluate education. They insist that moving to new learning environments, specifically those online and at a distance, afford opportunities for educators to adopt only the best practices of traditional face-to-face assessment while exploring evaluation tools made available by a digital learning environment in the hopes of arriving at methods that capture the widest set of learner skills and attributes.

Handbook of Research on Determining the Reliability of Online Assessment and Distance Learning Moura, Ana S.,Reis, Pedro,Cordeiro, M. Natália D. S.,2020-11-13 Though in the past online learning was considered of poorer professional quality than classroom learning, it has become a useful and, in some cases, vital tool for promoting the inclusivity of education. Some of its benefits include allowing greater accessibility to educational resources previously unattainable by those in rural areas, and in current times, it has proven to be a critical asset as universities shut down due to natural disasters and pandemics. Examining the current state of distance learning and determining online assessment tools and processes that can enhance the online learning experience are clearly crucial for the advancement of modern education. The Handbook of Research on Determining the Reliability of Online Assessment and Distance Learning is a collection of pioneering investigations on the methods and applications of digital technologies in the realm of education. It provides a clear and extensive analysis of issues regarding online learning while also offering frameworks to solve these addressed problems. Moreover, the book reviews and evaluates the present and intended future of distance learning, focusing on the societal and employer perspective versus the academic proposals. While highlighting topics including hybrid teaching, blended learning, and telelearning, this book is ideally designed for teachers, academicians, researchers, educational administrators, and students.

Assessing Learners Online Albert Oosterhof,Rita-Marie Conrad,Donald P. Ely,2008 Online assessment and, more broadly, the entire online learning environment provides expanded opportunities to actively and creatively engage the learner. The approach the authors have taken in this book is to work from the established fundamentals of assessment, applying these principles to the online environment. The authors emphasize basic issues of assessment such as establishing the evidence of validity for assessments, but the context of the discussion is always that of an online environment. Written by leading technology experts, this clear and practical text serves as a training guide for assessing online or distance learners. Readers learn how to select what should be assessed, how to use written tests and projects to evaluate the skills learners have achieved, how to provide feedback to learners, and how to efficiently use course management software. The authors believe educators involved with online training and education must have the same

assessment expectations and standards as those in conventional, face-to-face environments. This book is appropriate for instructional designers and educators involved with online training and education as well as for college courses concerned with the design and delivery of distance or other forms of online instruction. It also has utility as a personal reference for instructors of courses that assess students online.

Assessment in Online and Blended Learning Environments Selma Koç,Xiongyi Liu,Patrick Wachira,2015-03-01 Online and blended learning requires the reconstruction of instructor and learner roles, relations, and practices in many aspects. Assessment becomes an important issue in non-traditional learning environments. Assessment literacy, i.e., understanding assessment and assessment strategies, is critical for both instructors and students in creating online and blended environments that are effective for teaching and learning. Instructors need to identify and implement assessment strategies and methods appropriate to online or blended learning. This includes an understanding of the potential of a variety of technology tools for monitoring student learning and improving their teaching effectiveness. From the students' perspective, good assessment practices can show them what is important to learn and how they should approach learning; hence, engaging them in goal-oriented and self-regulatory cognitions and behaviors. The book targets instructors, instructional designers, and educational leaders who are interested in understanding and implementing either summative or formative assessment in online and blended learning environments. This book will assist the relevant audience in the theory and practice of assessment in online and blended learning environments. Providing both a research and practice perspective, this book can help instructors make the connection between pedagogy and technology tools to maximize their teaching and student learning. Among the questions addressed in this book are: • What assessment strategies can be used in online or blended learning? • How can instructors design effective assessment strategies? • What methods or technology tools can be used for assessment in online or blended learning? • How does peer-assessment work in online or blended learning environments?

Emerging Practices for Online Language Assessment, Exams, Evaluation, and Feedback Gokturk-Saglam, Asli Lidice,Sevgi-Sole, Ece,2023-06-29 The advancement of digital tools has enabled the development of online language assessments, exams, evaluations, and feedback. Nonetheless, the language assessment literacy required of a teacher today is of a completely different kind, one that is adapted to the digital environment and altered for the pedagogical approaches of our new norm. There is a scarcity of literature addressing the challenges of in-person to online assessments, exams, evaluations, and feedback, particularly in the time of the COVID-19 education crisis. *Emerging Practices for Online Language Assessment, Exams, Evaluation, and Feedback*

investigates the main challenges of online language assessment when migrating from an in-class to an online environment due to academic integrity, adaptation to the new testing environment, technical problems, and anxiety. Covering key topics such as parental involvement, self-assessment, and language learners, this premier reference source is ideal for administrators, policymakers, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students.

Language Education During the Pandemic Wissia Fiorucci, 2023-11-28 This edited book explores and illustrates successful practices for online assessment and community-building, based on the authors' own classroom practice during and in the immediate aftermath of the pandemic. The authors argue that what has happened during the coronavirus pandemic has fundamentally changed perspectives on language education, and that if the importance of using online teaching tools in the classroom was dimly understood before the crisis, the language teaching establishment has now fully realized their potential and must continue exploring this further, even as the option to return to in-person teaching becomes widespread. Ranging from online activities to course design, the volume presents a comprehensive outlook at distance learning in modern foreign languages. It does so by focusing on those two aspects that, within an emergency scenario, have proven most challenging, namely: how to assess students in a non-controlled environment and how to foster a sense of community from the confinement of our isolated learning spaces. This book will be of interest to academics and practitioners in Language Education, as well as teachers and teacher trainees.

The Development of Quality Online Assessment in Vocational Education and Training Robin Booth, Berwyn Clayton, Robert Hartcher, Susan Hungar, Patricia Hyde, Penny Wilson, 2003

Assessing Online Learning Patricia Comeaux, 2005 Students in traditional as well as online classrooms need more than grades from their instructors—they also need meaningful feedback to help bridge their academic knowledge and skills with their daily lives. With the increasing number of online learning classrooms, the question of how to consistently assess online learning has become increasingly pressing. However, providing such feedback through distance education presents complex challenges that instructors must understand in order to successfully teach and dialog with their students. *Assessing Online Learning* focuses on assessment as an integral part of learning. Building upon the paradigms and constructivist learning model established in *Communication and Collaboration in the Online Classroom: Examples and Applications* (2002), this collection offers an assortment of tools and strategies for evaluating learning and instructional design in online classrooms. Both conceptual and practical, this book addresses the salient issues of assessment and offers a variety of assessment tools and strategies for online classrooms and programs, such as self-assessment tools for students to evaluate their progress toward their final products, instruments in which teams can evaluate their progress and contributions, and specific tools and strategies for assessing students' critical thinking and writing skills in electronic discussion boards and in similar reflective writing environments. Written for faculty, administrators, scholars, and researchers in higher education, this book will be a valuable resource to anyone with a particular interest in the topic of assessment and online learning.

Emotional Intelligence 2.0 Travis Bradberry, Jean Greaves, 2009 Presents a step-by-step guide for increasing emotional intelligence through four core principles: self-awareness, self-management, social awareness, and relationship management.

Evaluating Online Teaching Thomas J. Tobin, B. Jean Mandernach, Ann H. Taylor, 2015-05-13 Create a more effective system for evaluating online faculty *Evaluating Online Teaching* is the first comprehensive book to outline strategies for effectively measuring the

quality of online teaching, providing the tools and guidance that faculty members and administrators need. The authors address challenges that colleges and universities face in creating effective online teacher evaluations, including organizational structure, institutional governance, faculty and administrator attitudes, and possible budget constraints. Through the integration of case studies and theory, the text provides practical solutions geared to address challenges and foster effective, efficient evaluations of online teaching. Readers gain access to rubrics, forms, and worksheets that they can customize to fit the needs of their unique institutions. Evaluation methods designed for face-to-face classrooms, from student surveys to administrative observations, are often applied to the online teaching environment, leaving reviewers and instructors with an ill-fitted and incomplete analysis. *Evaluating Online Teaching* shows how strategies for evaluating online teaching differ from those used in traditional classrooms and vary as a function of the nature, purpose, and focus of the evaluation. This book guides faculty members and administrators in crafting an evaluation process specifically suited to online teaching and learning, for more accurate feedback and better results. Readers will:

- Learn how to evaluate online teaching performance
- Examine best practices for student ratings of online teaching
- Discover methods and tools for gathering informal feedback
- Understand the online teaching evaluation life cycle

The book concludes with an examination of strategies for fostering change across campus, as well as structures for creating a climate of assessment that includes online teaching as a component. *Evaluating Online Teaching* helps institutions rethink the evaluation process for online teaching, with the end goal of improving teaching and learning, student success, and institutional results.

Online Student Ratings of Instruction D. Lynn Sorenson, Trav D. Johnson, 2011-09-28 This volume examines the development and growing use of online student ratings and the potential impact online rating systems will have on the future of students' evaluations of teaching. The contributors demonstrate how the preference for online evaluation is growing, even amidst challenges and doubt. Sharing their first-hand experience as researchers and administrators of online systems, they explore major concerns regarding online student ratings and suggest possible solutions. D. Lynn Sorenson and Christian M. Reiner review existing online-rating systems that have been developed independently across the globe. Kevin Hoffman presents the results of a national survey that tracks the increased use of the Internet for student ratings of instruction. At Northwestern University, Nedra Hardy demonstrates how ongoing research about online student evaluations is helping to dispel common misperceptions. Application of online rating systems can present institutions with new challenges and obligations. Trav D. Johnson details a case study based on five years of research in the response rates for one university's online evaluation system and suggests strategies to increase student participation. Reviewing online reporting of results of online student ratings, Donna C. Llewellyn explores the emerging issues of security, logistics, and confidentiality. Other chapters explore existing online systems, highlighting their potential benefits for institution and instructor alike. Beatrice Tucker, Sue Jones, Lean Straker, and Joan Cole analyze Course Evaluation on the Web (CEW), a comprehensive online system for instructional feedback and improvement. Cheryl Davis Bullock reviews the Evaluation Online (EON) system and its successful role in facilitating midcourse student feedback. The fate of online rating may rest in the unique advantages it may - or may not - have over traditional ratings systems. Debbie E. McGhee and Nana Lowell compare online and paper-based methods through mean ratings, inter-rater reliabilities and factor structure of items. Comparing systems from another angle, Timothy W. Bothell and Tom Henderson examine the fiscal costs and benefits of implementing an online evaluation system over paper-based systems. Finally, Christina Ballantyne considers the prominent issues and thought-provoking ideas for the future of online student ratings raised in this volume.

Together, the contributors bring insight and understanding to the processes involved in researching and initiating innovations in online-rating systems. This is the 96th issues of the quarterly journal New Directions for Teaching and Learning.
