Mathematics of Keno and Lotteries Mark Bollman, 2018-04-17

Mathematics of Keno and Lotteries is an elementary treatment of the mathematics, primarily probability and simple combinatorics, involved in lotteries and keno. Keno has a long history as a high-advantage, high-payoff casino game, and state lottery games such as Powerball are mathematically similar. MKL also considers such lottery games as passive tickets, daily number drawings, and specialized games offered around the world. In addition, there is a section on financial mathematics that explains the connection between lump-sum lottery prizes (as with Powerball) and their multi-year annuity options. So-called winning systems for keno and lotteries are examined mathematically and their flaws identified.

The Keno Master Edward Newell, 2017-09-16 There are books, Internet websites and word of mouth instructions on how to succeed at keno. I would have no more chance winning annually with these systems than my acquiring a seasonal suntan on Pluto. Truth is, it is difficult to win when over 20% of play returns zero cents, and over 90% of the returns are less than the initial wager. Despite the teeniest of return, too many players remain glued to their console committed to pattern and to the habitual. Some players believe machines have tendencies to pay only after hours of continued use. Other players believe a machine must cycle through to a given point before a return is generated. In waiting for tendencies and cycling the player is waiting for the machine to make an adjustment for them. Practically every day I am found contesting a keno machine. I am a good player who does well. I

enjoy the keno game because I am capable of winning over the long haul. My success rate is twenty plus percent. Starting with 2012 and continuing forward, I have had 65, 131, 208, and 109 seven spots respectively. Conversely, my failure rate is eighty percent. The odds in keno are staggering and beyond comprehension. Winning regularly is as opportunistic as to finding a copper penny on the ocean floor. I succeed because I recognize the cold machine and move on from it. To recognize is to sample performance. Sampling leads to extended play and prolonged play produced 513 seven spots over forty eight months. They were undone, destroyed, after all of man's weapons and devices had failed, by the tiniest creatures. - H. G. Wells, War of the Worlds

Comparative to the quotation, it is the tiniest of numbers and their corresponding payout that fabricates a substantial impact on any given session. The truancy of the lesser payout makes absent from the greater. The machine, the game and its play will unfurl a story. The question is, are you reading the story? Too many participants keep trudging along; unawares the outcome of their session was set into motion within the first few dollars of play. Sampling will change all that. Machine sampling is akin to dipping a toe into water to judge suitability. Machine sampling determines performance. Performance determines playability. Playability determines staying or leaving. I would rather leave early than endure the agony of prolonged punishment. If, as a dedicated player, you are predisposed to a method, The Keno Master will enhance your standard game. If, accustomed to scant success, The Keno Master will elevate your game with a complete strategy. You will understand and learn the usefulness of pattern grouping, overlap and board coverage. Furthermore, you will gain knowledge of in-game adjustments and its significance for extended play. Ultimately, you shall acquire the daring for exploitive wagering with what the house stingingly gives you as token return.
