**The Free Animal** Lee MacLean, 2013-03-13 Free will is a key but contested concept in the work of Jean-Jacques Rousseau: while the famed philosopher is known to have asserted that free will distinguishes human beings from animals, several interpreters have argued that he merely pretends to have this belief for the sake of healthy politics and to avoid persecution by religious authorities. Through careful readings of key texts and letters, *The Free Animal* offers a new and original exploration of Rousseau's views on free will, just in time for the 200th anniversary of his birth. Lee MacLean shows that Rousseau needs and uses the idea of human consciousness of free will to explain the development of morality, convention, and vice. MacLean bases her argument on a broad range of texts, from canonical works to Rousseau's untranslated letters and drafts. Featuring careful analyses and an extensive engagement with the secondary literature, *The Free Animal* offers a novel interpretation of the changing nature and complexity of Rousseau's intention.

*Software Design for Flexibility* Chris Hanson, Gerald Jay Sussman, 2021-03-09 Strategies for building large systems that can be easily adapted for new situations with only minor programming modifications. Time pressures encourage programmers to write code that works well for a narrow purpose, with no room to grow. But the best systems are evolvable; they can be adapted for new situations by adding code, rather than changing the existing code. The authors

describe techniques they have found effective--over their combined 100-plus years of programming experience--that will help programmers avoid programming themselves into corners. The authors explore ways to enhance flexibility by: Organizing systems using combinators to compose mix-and-match parts, ranging from small functions to whole arithmetics, with standardized interfaces Augmenting data with independent annotation layers, such as units of measurement or provenance Combining independent pieces of partial information using unification or propagation Separating control structure from problem domain with domain models, rule systems and pattern matching, propagation, and dependency-directed backtracking Extending the programming language, using dynamically extensible evaluators

*Flag Burning and Free Speech* Robert Justin Goldstein,2000 When Gregory Lee Johnson burned an American flag as part of a political protest, he was convicted for flag desecration under Texas law. But the Supreme Court, by a contentious 5 to margin, overturned that conviction, claiming that Johnson's action constituted symbolic -- and thus protected -- speech. Heated debate continues to swirl around that controversial decision, both hailed as a victory for free speech advocates and reviled as an abomination that erodes the patriotic foundations of American democracy. Such passionate yet contradictory views are at the heart of this landmark case. Book jacket.
