*Video Conferencing over IP: Configure, Secure, and Troubleshoot* Michael Gough, 2006-06-07 This book de-mystifies the technology behind video conferencing and provides single users and small enterprises with the information they need to deploy video conferencing efficiently and cost effectively. For many years, the promise of high quality, low cost video conferencing has been an attractive solution for businesses interested in cutting travel costs while maintaining the benefits of face-to-face contact. Unfortunately, most solutions never lived up to the promise, due primarily to lack of internet bandwidth and poorly developed protocols. That's no all changed. The capacity has been created, the hardware works, and businesses are more eager than ever to cut down on travel costs. \* Budget conscious methods for deploying Video over IP in small to medium enterprises \* Coverage of Cisco, Microsoft, Skype, AOL, Google, VidiTel and many other products \* How to identify and resolve nagging quality of service issues such as transmission delays and out of synch video-to-voice feeds

*Adolescents and War* Brian K Barber, 2009-10-22 Experts aim to understand and document the intricacies of youth who have been involved in political violence. They argue that the assumption that youth are automatically debilitated by this violence is too simplistic: effective care must include an awareness of motives and beliefs, roles they played in the conflict, relationships, et cetera.

**Finding My Truth** Trina Hert,

*Modern Communications Systems* Donald Chiarella,

*The War of Ideas* Walid Phares, 2007-02-20 From Afghanistan and Iraq to Europe and the United States we are engaged in one of the most heated wars of all time. In this incisive new book, the man that has been called--the only one to understand the mind of the jihadist--shows that the most important battle is actually taking place in the hearts and minds of the world's population. This is the war of ideas, where ideology is the most powerful weapon of all. Phares explores the beliefs of two opposing camps, one standing for democracy and human rights, and the other rejecting the idea of an international community and calling for jihad against the West. He reveals the strategies of both sides, explaining that new technologies and the growing media savvy of the jihadists have raised the stakes in the conflict. And most urgently, he warns that the West is in danger of losing the war, for whereas debate and theorizing rarely translate into action here, ideas and deeds are inextricably linked for the forces of jihad.

**The Future of Fallout, and Other Episodes in Radioactive World-Making** Joseph Masco, 2020-12-18 In *The Future of Fallout, and Other Episodes in Radioactive World-Making* Joseph Masco examines the strange American intimacy with and commitment to existential danger. Tracking the simultaneous production of nuclear emergency and climate disruption since 1945, he focuses on the psychosocial accommodations as well as the technological revolutions that have produced these linked planetary-scale disasters. Masco assesses the memory practices, visual culture, concepts of danger, and toxic practices that, in combination, have generated a U.S. national security culture that promises ever more safety and comfort in everyday life but does so only by generating and deferring a vast range of violences into the collective future. Interrogating how this existential lag (i.e., the material and conceptual fallout of the twentieth century in the form of nuclear weapons and petrochemical capitalism) informs life in the twenty-first century, Masco identifies key moments when other futures were still possible and seeks to activate an alternative, postnational security political imaginary in support of collective life today.

*Building Successful Online Communities* Robert E. Kraut, Paul Resnick, 2012-03-23 How insights from the social sciences, including social psychology and economics, can improve the design of online communities. Online communities are among the most popular destinations on the Internet, but not all online communities are equally successful. For every flourishing Facebook, there is a moribund Friendster—not to mention the scores of smaller social networking sites that never attracted enough members to be viable. This book offers lessons from theory and empirical research in the social sciences that can help improve the design of online communities. The authors draw on the literature in psychology, economics, and other social sciences, as well as their own research, translating general findings into useful design claims. They explain, for example, how to encourage information contributions based on the theory of public goods, and how to build members' commitment based on theories of interpersonal bond formation. For each design claim, they offer supporting evidence from theory, experiments, or observational studies.

*Countering Militant Islamist Radicalisation on the Internet* Johnny Ryan, 2007

*Forbes*, 2003

*Task-Based Instruction in Foreign Language Education* Betty Lou Leaver, Jane R. Willis, 2004-12-30 Task-based language instruction has proven to be highly effective, but surprisingly underutilized. Theory can only go so far and hands-on experience can greatly speed and enhance the learning of a second language. Nineteen talented instructors who have successfully implemented task-based programs explain the principles behind the programs, discuss how problems were resolved, and share details on class activities and program design. Each chapter takes the reader through the different stages in designing and setting up such programs, adjusting them, and appraising and testing them in normal classroom conditions. This book covers TBI syllabus and program design and is based on actual classroom experience. Any one of the courses or programs discussed can serve as models for others. Many of the contributors are highly respected practitioners who are presenting their programs for the first time, while others are regular participants in today's ongoing dialogue about teaching methods. Full of concrete, adaptable models of task-based language teaching drawn from a number of countries and eleven different languages—including Arabic, Chinese, Czech, English, French, German, Korean, Spanish, and Ukrainian—Task-Based Instruction in Foreign Language Education presents proven, real-world, practical courses and programs; and includes web-based activities. It demonstrates useful and practical ways to engage students far beyond what can be learned from reading textbook dialogue. TBI involves the student directly with the language being taught via cognitively engaging activities that reflect authentic and purposeful use of language, resulting in language-learning experiences that are pleasurable and effective. For all instructors seeking to help their learners enhance their understanding and grasp of the foreign language they are learning, Task-Based Instruction in Foreign Language Education is a rich and rewarding hands-on guide to effective and transformative learning.
