🔍 TREATMENT OF MOBILE PHONE LICENCES IN THE NATIONAL ACCOUNTS Mr.ROBERT DIPPELSMAN,Mr.NILS 📧 yvind M📧 hle,2001-05-01 The treatment of license payments in the national accounts has become increasingly important in recent years; with mobile phone licenses being auctioned for substantial values in several countries. Because the text of the System of National Accounts 1993 does not provide specific guidance on these licenses, their treatment needs to be decided on general principles. This paper concludes that there are usually two assets involved with mobile phone licenses, namely, the spectrum which is owned by the government, and the license which is an intangible nonproduced asset sold by the government to the licenseholder. The values of these two assets are linked complementarily. Alternative treatments of recording the license payments as sale of the spectrum itself, other taxes on production, production of a service, or rent, are considered and rejected. Methods of amortization of the license over its life are considered. An annex raises issues concerning the recognition of rights and obligations as assets and liabilities in national accounting.

🔍 FAKE ACCOUNTS Lauren Oyler,2022-02-08 A NATIONAL BESTSELLER * A NEW YORK TIMES BOOK REVIEW EDITORS’ CHOICE * A WASHINGTON POST BEST BOOK OF THE YEAR An invigorating work, deadly precise in its skewering of people, places and things . . . Stylish, despairing and very funny, Fake Accounts . . . adroitly maps the dwindling gap between the individual and the world. —Katie Kitamura, The New York Times Book Review A woman in a tailspin discovers that her boyfriend is an anonymous online conspiracy theorist in this “absolutely brilliant take on the bizarre and despicable ways the internet has warped our perception of reality” (Elle, One of the Most Anticipated Books of the Year). On the eve of Donald Trump’s inauguration, a young woman snoops through her boyfriend’s phone and makes a startling discovery: he’s an anonymous internet conspiracy theorist, and a popular one at that. Already fluent in internet fakery, irony, and outrage, she’s not exactly shocked by the revelation. Actually, she’s relieved—he was always a little distant—and she plots to end their floundering relationship while on a trip to the Women’s March in DC. But this is only the first in a series of bizarre twists that expose a world whose truths are shaped by online lies. Suddenly left with no reason to stay in New York and increasingly alienated from her friends and colleagues, our unnamed narrator flees to Berlin, embarking on her own cycles of manipulation in the deceptive spaces of her daily life, from dating apps to expat meetups, open-plan offices to bureaucratic waiting rooms. She begins to think she can’t trust anyone—shouldn’t the feeling be mutual? Narrated with seductive confidence and subversive wit, Fake Accounts challenges the way current conversations about the self and community, delusions and gaslighting, and fiction and reality play out in the internet age.

🔍 MOBILE CRAMMING Heather Allen,2014-11-28 The widespread adoption of mobile devices provides the convenience of paying for goods and services using a phone. One mobile payment option is carrier billing -- the ability to charge a good or service directly to a mobile phone account. However, fraud has become a significant problem for consumers, notably, mobile cramming -- the unlawful practice of placing unauthorized third-party charges on mobile phone accounts. Mobile cramming occurs when consumers are signed up and billed for third-party services, such as ringtones and recurring text messages containing trivia or horoscopes, without their knowledge or consent. Such practices have cost consumers many millions of dollars. This report examines mobile cramming and recommends strategies to reduce this fraud. Figures. This is a print on demand report.

🔍 BUSINESS AND MANAGEMENT PRACTICES IN SOUTH ASIA Arijit Sikdar,Vijay Pereira,2018-09-04 This book presents case studies of South Asian companies that have strategic business implications, highlighting the complex interplay of business and social dynamics in South Asia. This region is a wide agglomeration of very different countries that share somewhat common cultures and issues and yet it is torn apart by religion and politics. There is an abundance of local entrepreneurship but a widespread institutional void. The book investigates how local companies survive and thrive in this environment and discusses those companies that have withstood the competitive pressure of MNCs, depicting their management and business practices. In today’s world, where multinationals are so omnipresent that their management and business practices are considered as the de facto recipe for success, there is a need to have an alternative view that challenges the ubiquitousness of multinational management practices. The case studies in this book focus on the business and management practices of local organizations in South Asia and thus provide that alternative viewpoint of how to achieve success in South Asia. Exposing readers to a local perspective on doing business in South Asia, it is a valuable resource for students and practitioners of management.

🔍 THE GLOBAL FINDEX DATABASE 2017 Asli Demircuc-Kunt,Leora Klapper,Dorothe Singer,Saniya Ansar,2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world’s most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of universal financial access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.
