Remembering World War II Anastasia Glawion, 2023-03-31 The book demonstrates an evidence-based approach to online memory practices of World War II. Network analysis is applied to reduce a massive and unreadable dataset of forum texts and user relations. Further, the results are combined with other text analysis methods, such as topic modeling and contrastive stylometric analyses. A sample of discussions from each group is read and categorized. Based on the results, the forum users' memory practices are labelled as empirical, conversational and conservational practices, whereby recent theoretical developments in Memory Studies are considered.

**Play Like a Man** Rose Marshack,2023-02-28 As a member of Poster Children, Rose Marshack took part in entwined revolutions. Marshack and other women seized a much-elevated profile in music during the indie rock breakthrough while the advent of new digital technologies transformed the recording and marketing of music. Touring in a van, meeting your idols, juggling a programming job with music, keeping control and credibility, the perils of an independent record label (and the greater perils of a major)—Marshack chronicles the band's day-to-day life and punctuates her account with excerpts from her tour reports and hard-learned lessons on how to rock, program, and teach while female. She also details the ways Poster Children applied punk's DIY ethos to digital tech as a way to connect with fans via then-new media like pkids listservs, internet radio, and enhanced CDs. An inside look at a scene and a career, Play Like a Man is the evocative and humorous tale of one woman's life in the trenches and online.

**The Feed Zone Cookbook** Biju K. Thomas,Allen Lim, PhD,2011-11-01 The Feed Zone Cookbook offers 150 athlete-friendly recipes that are simple, delicious, and easy to prepare. When Dr. Allen Lim left the lab to work with pro cyclists, he found a peloton weary of food. For years the sport's elite athletes had been underperforming on bland fare and processed bars and gels. Science held few easy answers for nutrition in the real world, where hungry athletes must buy ingredients; make meals; and enjoy eating before, during, and after each workout, day after day. So Lim set out to make

eating delicious and practical. His journey began with his mom, took him inside the kitchens of the Tour de France, and delivered him to a dinner party where he met celebrated chef Biju Thomas. Chef Biju and Dr. Lim vetted countless meals with the world's best endurance athletes in the most demanding test kitchens. In *The Feed Zone Cookbook: Fast and Flavorful Food for Athletes*, Thomas and Lim share their energy-packed, wholesome recipes to make meals easy to prepare, delicious to eat, and better for performance. The *Feed Zone Cookbook* provides 150 delicious recipes that even the busiest athletes can prepare in less time than it takes to warm up for a workout. With simple recipes requiring just a handful of ingredients, Biju and Allen show how easy it is for athletes to prepare their own food, whether at home or on the go. The *Feed Zone Cookbook* strikes the perfect balance between science and practice so that athletes will change the way they think about food, replacing highly processed food substitutes with real, nourishing foods that will satisfy every athlete's cravings. The *Feed Zone Cookbook* includes 150 delicious recipes illustrated with full-color photographs. Breakfasts, lunches, recovery meals, dinners, snacks, desserts. Dr. Allen Lim's take on the science and practice of food. Portable real food snacks, including Lim's famous rice cakes. Dozens of quick-prep meals for before and after workouts. Shortcuts, substitutions, and techniques to save time in the kitchen. Over 100 gluten-free and vegetarian alternatives to favorite dishes.

Computing and Philosophy in Asia Soraj Hongladarom, 2009-03-26 This volume is a collection of selected papers presented at the Second Asia-Pacific Computing and Philosophy Conference, which was held in Bangkok, Thailand in January 2005. The conference was organized by the Center for Ethics of Science and Technology, Chulalongkorn University on behalf of the International Association of Computing and Philosophy ([www.ia-cap.org](http://www.ia-cap.org)). Computing has had a long relationship with philosophy, starting from the problem of how symbols being manipulated in computing bear a relation to the outside world, to those of artificial intelligence, robotics, computer simulation, and so on. Moreover, as computer technologies have become thoroughly pervasive in today's environment, there are also issues concerning social and ethical impacts brought about by them. The papers in the volume represent a wide variety of concerns and various dimensions within which computing and philosophy are related. Furthermore, it also represents some of the first attempts to highlight cultural dimensions of computing and philosophy, which became prominent when the conference was held for the first time within the milieu of an Asian culture. (The First Asia-Pacific Computing and Philosophy was held in Canberra, Australia.) Hence, many of the papers in the volume address this added dimension. Apart from the usual problems of how computers and human lives are interconnected, the papers

here also discuss how computers are related to human lives as lived in a specific culture. Thus the book breaks a new ground and should be of interest to a wide range of scholars and students who are interested, not only on computing and philosophy generally construed, but also on this exciting new dimension of how the cultures of Asia, the West, and others bear upon the traditional issues in computing and philosophy, and on how this dimension raises some new concerns and agenda. Among the topics discussed in this volume are: political online forums in Saudi Arabia, e-democracy and structural transformation of public sphere, the Buddhist informational person, a glance into the lives of computerized generation in Thailand, technology and journalism in the market, local approaches and global potential (?) of information ethics, computer-enhanced good life, computer teaching ethics, and many others.
