Geometric, Algebraic and Topological Methods for Quantum Field Theory Sylvie Payche, 2014 Based on lectures held at the 7th Villa de Leyva summer school, this book presents an introduction to topics of current interest in the interface of geometry, topology and physics. It is aimed at graduate students in physics or mathematics with interests in geometric, algebraic as well as topological methods and their applications to quantum field theory. This volume contains the written notes corresponding to lectures given by experts in the field. They cover current topics of research in a way that is suitable for graduate students of mathematics or physics interested in the recent developments and interactions between geometry, topology and physics. The book also contains contributions by younger participants, displaying the ample range of topics treated in the school. A key feature of the present volume is the provision of a pedagogical presentation of rather advanced topics, in a way which is suitable for both mathematicians and physicists.

Go Figure! New Directions in Advertising Rhetoric Edward F. McQuarrie,Barbara J.

Phillips,2014-12-18 Rhetorical scholarship has found rich source material in the disciplines of  
advertising, communications research, and consumer behavior. Advertising, considered as a kind of  
communication, is distinguished by its focus on causing action. Its goal is not simply to communicate  
ideas, educate, or persuade, but to move a prospect closer to a purchase. The editors of Go Figure!  
New Directions in Advertising Rhetoric have been involved in developing the scholarship of  
advertising rhetoric for many years. In this volume they have assembled the most current and  
authoritative new perspectives on this topic. The chapter authors all present previously unpublished  
concepts that represent advances beyond what is already known about advertising rhetoric. In the  
opening and closing chapters editors Ed McQuarrie and Barbara Phillips provide an integrative view of  
the current state of the art in advertising rhetoric.

*Artificial Intelligence in Advertising* Introbooks,2020-04-06 Technology has changed the world. The technology is also constantly changing. Therefore, the changes that take place affect each and everything. Artificial intelligence can be regarded as the most revolutionary innovation in the technological world. This has changed the way the general public uses technology. Many industries have been affected by the advent of artificial intelligence. The advertising industry is one of them. The creation of ads, content generation, data collection, data analysis, tracking of consumer behavior, all these have been changed completely after the creation of artificial intelligence. The brands are able to track the correct consumer behaviors and personize the ads accordingly. The cost of ad creation has been reduced to a very low level. The virtual assistance and streamlining of ads has opened up new avenues for advertisers to bid up their game. The consumers are also benefitted by the better algorithms that allow them to see relatable ads and eliminate the ones that eat up their time.
