MRI from Picture to Proton Donald W. McRobbie, Elizabeth A. Moore, Martin J. Graves, Martin R. Prince, 2017-04-13 MR is a powerful modality. At its most advanced, it can be used not just to image anatomy and pathology, but to investigate organ function, to probe in vivo chemistry, and even to visualise the brain thinking. However, clinicians, technologists and scientists struggle with the study of the subject. The result is sometimes an obscurity of understanding, or a dilution of scientific truth, resulting in misconceptions. This is why MRI from Picture to Proton has achieved its reputation for practical clarity. MR is introduced as a tool, with coverage starting from the images, equipment and scanning protocols and traced back towards the underlying physics theory. With new content on quantitative MRI, MR safety, multi-band excitation, Dixon imaging, MR elastography and advanced pulse sequences, and with additional supportive materials available on the book's website, this new edition is completely revised and updated to reflect the best use of modern MR technology.

The Book with No Pictures B. J. Novak, 2014-09-30 A #1 New York Times bestseller, this innovative and wildly funny read-aloud by award-winning humorist/actor B.J. Novak will turn any reader into a comedian—a perfect gift for any special occasion! You might think a book with no pictures seems boring and serious. Except . . . here's how books work. Everything written on the page has to be said by the person reading it aloud. Even if the words say . . . BLORK. Or BLUURF. Even if the words are a preposterous song about eating ants for breakfast, or just a list of astonishingly goofy sounds like BLAGGITY BLAGGITY and GLIBBITY GLOBBITY. Cleverly irreverent and irresistibly silly, The Book with No Pictures is one that kids will beg to hear again and again. (And parents will be happy to oblige.)

Picture-based insurance: is it sustainable? Effects on willingness to pay, adverse selection, and moral hazard Robles, Miguel, Karekar, Siddesh, Mishra, Azad, Toor, Mann S., Krupoff, Matthew, Ceballos, Francisco, Kramer, Berber, 2017-09-01 This project note hence describes to what extent picture-based crop insurance is viable from an economic point of view, addressing the following questions: (1) Do farmers strategically reduce crop management efforts (that is, does PBI induce moral hazard) and is there evidence of tampering with pictures in order to receive pay-outs when they have PBI coverage? (2) What is farmers' willingness to pay for PBI compared to willingness to pay for standard weather index-based insurance (WBI)? Is farmers' demand for PBI strong enough to justify its higher costs? (3) To what extent do farmers selectively enroll plots that are more prone to damage? In other words, is PBI prone to adverse selection?

The Language of Pictures in Print Media Advertising Wilfried Pichler, 2002-03-07 Inhaltsangabe: Abstract: Today we observe a development in which the role of language is steadily decreasing whereas the impact of pictures is increasing. This goes hand in hand with a development in which information relies more and more on visual concepts. More and more language takes the part of explaining how to read the visual presentations, more and more language takes the part of providing the background information which is necessary to understand the meaning of the visual foreground. Kress and van Leeuwen (1998) argue that Today, we seem to move towards a decrease of control over language (e.g. the greater variety of accents allowed on the public media, the increasing problems in enforcing normative spelling), and towards an increase in codification and control over the visual (e.g. the use of image banks from which ready-made images can be drawn for the construction of visual texts, and, generally, the effect of computer imaging technology). Although we may be aware of this tendency, we have not been taught in school how to read visual concepts and so most of us share some degree of illiteracy concerning a critical reading of information presented by images. This is remarkable because we all agree about their influence on our lives but at the same time when we do not develop analytical tools for describing what kinds of strategies, what kinds of concepts are working in visual presentations of information. We tend to overlook the importance of visual concepts simply because we generally do not know enough about their code. This paper analyses photos and language which are parts of ads, which have definitely been designed for transferring messages because they have been made to advertise one specific product. Images and the text of advertisements never are casual products like family pictures. Although the photo in the family album is coded its coding is less elaborated than the coding of pictures in ads. We have to keep in mind that many people, experts in advertising, experts in public relations were involved in the process of designing an ad before we can look at the final result. This is why ads are definitely conceptually designed because they are meant to create a specific meaning in the viewer's mind. It is a truism that no visual concept, no photo of an ad was chosen by chance. Photographs and language of ads are more likely to have been carefully constructed and selected according to the meaning they are supposed to create. This is [...]

A Picture for Marc Eric A. Kimmel,2009-07-08 GROWING UP IN Russia in the late 1800s, Marc Chagall doesn't know what art is. He doesn't even know what drawing is until one of his schoolmates shows him how to trace a picture in a magazine. Marc tries it himself, then decides to pull pictures out of his own mind - his Uncle Noah on the roof, giant chickens, flying cows, happy men with fiddles, and women with lambs. Suddenly Marc knows what he wants to do with his life. He wants to be an artist!
