Planetarium, Window to the Universe Charles F. Hagar, 1980

Star Theatre William Firebrace, 2017-12-30 Most of us can recall a childhood visit to a planetarium: the sense of anticipation as the room darkens. The stars begin to appear as the voice of an astronomer is heard. In the planetarium, where the audience is transported to distant galaxies, the wondrous complexity of the cosmos combines with entertainment to become a theater of the night. *Star Theatre* explores the history of the planetarium's mix of science and spectacle. William Firebrace reveals how in the planetarium, the solar system and universe is demonstrated on an ever-expanding scale. He traces the origins of the building through history, from its antecedents to its invention in Germany in the 1920s, developments in the USSR and the United States, to its expansion across the globe at the time of the space race, and finally to the evolution of the contemporary planetarium in a time of startling astronomical and cosmological discoveries. This concise and well-illustrated history will appeal to astronomy lovers and those interested in architecture, theater, and cinema.

Theaters of Time and Space Jordan D. Marché, 2005 Every year, millions of Americans visit planetariums and are captivated by their strikingly realistic portrayal of the night sky. Today, it is indeed difficult to imagine astronomy education without these magnificent celestial theaters. But projection planetariums, first developed in Germany, have been a part of American museum pedagogy only since the early twentieth century and were not widespread until the 1960s. In this unique social history, former planetarium director and historian of science Jordan D. Marché II offers the first complete account of the community of individuals and institutions that, during the period between 1930 and 1970, made planetariums the popular teaching aids they are today. Marché addresses issues such as the role of gender and social developments within the planetarium community, institutional patronage, and the popularization of science. He reveals how, at different times, various

groups, including financial donors, amateur scientists, and government officials, viewed the planetarium as an instrument through which they could shape public understanding and perceptions of astronomy and space science. Offering an insightful, wide-ranging look into the origins of an institution that has fascinated millions, *Theaters of Time and Space* brings new perspectives to how one educational community changed the cultural complexion of science, helped shape public attitudes toward the U.S. space program, and even contributed to policy decisions regarding allocations for future space research.

The Man Who Painted the Universe Ron Legro, Avi Lank, 2015-04-15 As a young boy Frank Kovac Jr. fell deeply in love with stargazing, painting glow-in-the-dark constellations on his bedroom wall and inviting friends to an observatory he built in his Chicago backyard. As he reached adulthood, Kovac did not let go of his childhood dreams of reaching the stars. He began scheming to bring the universe home. While working at a paper mill as a young man, Kovac tirelessly built a 22-foot rotating globe planetarium in the woods. Despite failures and collapses,

the amateur astronomer singlehandedly built a North Woods treasure, painting more than 5,000 glowing stars—dot by dot in glowing paints. Today, Kovac and his unique planetarium take visitors to the stars every day. The *Man Who Painted the Universe: The Story of a Planetarium in the Heart of the North Woods* introduces readers to the mild-mannered astronomy enthusiast whose creativity, ingenuity, fervor, and endurance realized a dream of galactic proportions. The story of this stargazer from Wisconsin's North Woods so inspired two newspapermen, authors Ron Legro and Avi Lank, that they sought to document the story of the Kovac Planetarium for a new generation of stargazers and dreamers.

My Night in the Planetarium Innosanto Nagara, 2017-12-05 7-year-old Innosanto spends an

exciting night with his mom sleeping under the stars in the Jakarta Planetarium. Innosanto's father is a playwright and the boy memorizes lines during the actors' rehearsals, so they invite him to join the performance, which tours the country. The play is about a General, who doesn't treat people very well, so they decided to do a play about how that was wrong. Fact: Indonesia aka The Spice Islands is the place Christopher Columbus was looking for when he crashed in the New World. Fact: Indonesia is made up of 17000 islands where people speak over 750 different languages. Fact: when Inno was a child, speaking out against the government could land you in jail. On the last night of the performance Inno packs a toothbrush (they figured if you're going to go to jail for a long time, you may as well have your toothbrush with you so you can keep your teeth clean. (true story).), the curtains go down, and with soldiers on the way, the actors scatter into hiding. On its surface, *My Night in the Planetarium* is a modern Indonesian children's story about one night in the late '70s that the author got to spend in the Jakarta planetarium. But it's actually much more than that. It's an introduction to the history and culture of Indonesia. It's about colonialism, revolution, how power corrupts, and how through art and solidarity liberation can be won.
