Flash Video for Professionals Lisa Larson, Renee Costantini, 2007-10-01 More than just a programming guide, this book takes you step by step through the process of gathering and preparing content, asking the right questions, determining the scope of the project and writing the project proposal. The authors cull from their professional experience of running their own digital media company to explain the special considerations in

deploying Flash video applications, presenting ideas for solutions as well as tips for avoiding the most common pitfalls.

Flash MX Video Kristian Besley, Brian Monnone, Hoss Gifford, Todd Marks, 2013-11-09
Let's make movies! Interactive movies, totally integrated into your Flash interface! With Macromedia Flash MX you have the power to import digital video and sound, and manipulate them just like any other media object. That's a whole world of design possibilities. This book hopes to take you through all you'll need to know about producing such wonderful sites. The first section will give you a thorough grounding in how best to import your video and sound into Flash and the many different ways that you can manipulate it once it's in there. Then, in the second section, we'll go through a complete real-world case study from pre-production on the video to final output on the web and CD-ROM. Finally, we'll see how you can apply use some advanced ActionScripting with video, and create a fully object-orientated sound and video playing Flash component that you'll be able to use time and time again. The inclusion of video support is the most noticeable and exciting feature in Flash MX - viewers who have the tiny Flash plug-in installed can now see video material that would otherwise necessitate the lengthy downloads and clunky interfaces of other web video plug-ins. This book is the guide you need for this exciting new universe, offering inspiration and technical guidance in equal measures. This book assumes no knowledge beyond an ability to work with Flash MX's interface, and is not intended for those with substantial digital video experience. As such, this book does not assume that the reader has access to expensive video-editing software. All you need for this book is access to Flash MX, and some imagination.

Video with Adobe Flash CS4 Professional Studio Techniques Robert

Reinhardt, 2010-04-26 The definitive guide to creating video for the Web In Video with Adobe Flash CS4 Professional Studio Techniques, Robert Reinhardt goes beyond the entry-level coverage found in other books to bring you a comprehensive look at what you really need to know to produce, host, and distribute Flash-compatible video on the Web, including FLV and AVC/H.264 content. Real world examples and hands-on projects with sample video files provide the expert training you need with tips and insights that everyone can benefit from. You'll learn: Basic methods, from preproduction through delivery, including capturing, processing, and compressing your video. Production essentials for sharing your footage on the Web, including setting up your Web page and server for seamless video playback and how to create your own video player. Advanced techniques, including building an index and play list, adding captions and banner ads, and designing a comprehensive video experience for your audience. Includes complete sample Flash files as shown throughout the book. More than 2 GB of source files are provided, including High Definition (HD) clips, which you can use to perfect your video compression skills. The source files for each chapter are found in the corresponding Lessons folder on the disc. Robert Reinhardt is a highly respected authority on Flash and Flash video. He has authored or co-authored numerous books on Flash, including the Flash Bible and the Flash ActionScript Bible, and his blog and other online articles draw a wide audience. He has developed multimedia courses for educational facilities in Canada and the United States and is an Adobe Certified Instructor for Flash courses at Portland State University. He is a former Vice President of the Multimedia Platforms Group at Schematic and now

works with a wide range of clients from his base in Portland, Oregon. A frequent presenter at conferences such as Flashforward, FITC, Flashbelt, and NAB, he is also a contributor at DesignProVideo.com. Forums and updates for this book can be found at FlashSupport.com, where you can share questions and answers with Robert and other readers. All of Peachpit's eBooks contain the same content as the print edition. You will find a link in the last few pages of your eBook that directs you to the media files. Helpful tips:

- If you are able to search the book, search for Where are the lesson files?
- Go to the very last page of the book and scroll backwards.
- You will need a web-enabled device or computer in order to access the media files that accompany this ebook. Entering the URL supplied into a computer with web access will allow you to get to the files.
- Depending on your device, it is possible that your display settings will cut off part of the URL. To make sure this is not the case, try reducing your font size and turning your device to a landscape view. This should cause the full URL to appear.

Flash Video Creativity Murat Bodur,Hoss Gifford,Diana Johnson,Leonhard Lass,Anthony Onumonu,Kristian Besley,Neal Boyd,Jerome Turner,Ken Jokol,Tim Hawkins,2013-11-21 by Bruce Herbert and Diana Johnson ofSorenson Media Creative boundaries are being blown apart as Macromedia Flash MX ushers in a new era of moving images on the Internet. At its launch, analysts predicted that the Flash Player would transform itself from being a lightweight animation tool to the de facto technology for simple web interactivity^{5*} (Randy Souza, Forrester). Since then though, Flash developers combining vector animation and video have proven that it's capable of much, much more than simple web interactivity. We're still just beginning to scratch the surface of the

possibilities it opens up to us, but already it looks like Flash MX is becoming the key technology for pushing video creativity on the Web to a new whole level. Understandably, many people look at Flash as just another way to deliver video on the Web, one more program for showing movies on your desktop. Well, it can certainly do that - but there's a whole lot more it can do besides! You can use ActionScript to add custom controls, determine a video playback sequence, or mask your video with a custom shape. You can use layering to create special effects, design custom templates for e-learning applications, and use lightweight video streams along with Flash animation in rich media e-mail campaigns.

FLASH MX VIDEO, BESLEY,2002-06-24 Flash MX gives everyone the opportunity to use the dramatic impact of video in their site design, sure in the knowledge that the ubiquitous Flash player will allow their audience to view the results of their work..
