*Oracle SQL*Plus* Jonathan Gennick, 1999 This book is the definitive guide to SQL*Plus. If you want to take best advantage of the power and flexibility of this popular Oracle tool, you need this book. SQLPlus is an interactive query tool that is ubiquitous in the Oracle world. It is present in every Oracle installation and is available to almost every Oracle developer and database administrator. SQLPlus has been shipped with Oracle since at least version 6. It continues to be supported and enhanced with each new version of Oracle, including Oracle8 and Oracle8i. It is still the only widely available tool for writing SQL scripts. Despite this wide availability and usage, few developers and DBAs know how powerful SQL*Plus really is. This book introduces SQLPlus, includes a quick reference to all of its syntax options, and, most important, provides chapters that describe, in step-by-step fashion, how to perform all of the tasks that Oracle developers and DBAs want to perform with SQLPlus -- and maybe some they didn't realize they COULD perform with SQLPlus. You will learn how to write and execute script files, generate ad hoc reports, extract data from the database, query the data dictionary tables, customize your SQLPlus environment, and use the SQL*Plus administrative features (new in Oracle8i). This book is an indispensable resource for readers who are new to SQL*Plus, a task-oriented learning tool for those who are already using it, and a quick reference for every user. A table of contents follows: Preface Introduction to SQLPlus Interacting with SQLPlus Generating Reports with SQLPlus Writing SQLPlus Scripts Extracting Data with SQLPlus Exploring Your Database with SQLPlus Advanced Scripting Tuning and Timing The Product User Profile Administration with SQLPlus Customizing Your SQLPlus Environment Appendices A. Max-Plus Methods for Nonlinear Control and Estimation William M. McEneaney,2006-07-25 The central focus of this book is the control of continuous-time/continuous-space nonlinear systems. Using new techniques that employ the max-plus algebra, the author addresses several classes of nonlinear control problems, including nonlinear optimal control problems and nonlinear robust/H-infinity control and estimation problems. Several numerical techniques are employed, including a max-plus eigenvector approach and an approach that avoids the curse-of-dimensionality. The max-plus-based methods examined in this work belong to an entirely new class of numerical methods for the solution of nonlinear control problems and their associated Hamilton–Jacobi–Bellman (HJB) PDEs; these methods are not equivalent to either of the more commonly used finite element or characteristic approaches. Max-Plus Methods for Nonlinear Control and Estimation will be of interest to applied mathematicians, engineers, and graduate students interested in the control of nonlinear systems through the implementation of recently developed numerical methods.

Rice Plus Susan H. Lee,2006-02-14 This book explores the economic coping practices of rural widows in the aftermath of the Cambodian civil war. War produces a preponderance of widows, often young widows with small children in their care. Rural widows must feed their families and educate their children despite rural poverty and the lack of opportunities for women. The economics of widowhood is therefore a significant social problem in less developed countries. The widows' predominant economic plan was to combine rice cultivation with an assortment of microenterprises, a rice plus strategy. Many widows were unable to grow enough rice on their land to feed their families. They filled the hunger gap by raising cash through microenterprises to purchase additional rice. Gender work roles were both permeable and persistent, allowing a flexible sexual division of labor in the short run but maintaining traditional roles in the long run. Most widows called on relatives or exchanged transplanting labor for male plowing services, although a few women took up the plow themselves. The study also explores widows' access to key economic resources such as land, credit, and education. War decimated widows' family support networks, including the loss of children, their social security. The study concludes that Cambodia's gender arrangement offered many economic options to widows but also devalued their labor in a cultural structure of inequality. Gender, poverty, and war interacted to reduce widows' financial resources, accounting for their economic vulnerability.

The Efficiency Savings Programme in Jobcentre Plus Great Britain:

Parliament: House of Commons: Work and Pensions Committee, 2006-03-18 During the past two years Jobcentre Plus has faced considerable upheaval in trying to accommodate both organisational change and meet the DWP target for efficiency savings (which requires the loss of 15,000 staff by March 2008). This report looks at how these changes have affected the ability of the Agency to meet its objectives in relation to: employment and training programmes; the capacity and role of Personal Advisors; the performance of the Customer Management System; the principles behind and the performance of Contact Centres. It concludes that too much was attempted too quickly, the planning and IT processes were not up to the job and service levels suffered. As a result Jobcentre Plus failed one of the tests of the Gershon programme that service quality should not deteriorate as a result of the efficiency process.

Prosthodontics Piers Anthony, 1986-06-15 What's keeping you from your grand tour of the universe? Are you afraid of being caught out in the vastness of space with a painful cavity and no one capable of fixing it? Well fear not-- the galaxy is simply teeming with dentists! For Dr. Dillingham, dentist of Earth, it was the shock of his life--captured by aliens, forced to fix a strange cavity in an even stranger mouth; then whisked off to deep space. But luckily for the good dentist, Dillingham discovered that he liked zooming about the galaxy, solving unprecedented problems and making new and decidedly different acquaintances. And when he was offered the chance to apply to the Galactic University of Dentistry as Earth's first (and only) applicant, Dillingham had a choice to make: go back to his safe little world of bored housewives and miles of braces, or make a mark for mankind among the teeth of the stars. It was really no choice at all.

The Special Data Dissemination Standard Plus: Guide for Adherents and Users International Monetary Fund. Statistics Dept., 2013-10-30 The International Monetary Fund (IMF) launched the Data Standards Initiatives to enhance member countries' data transparency and to promote their development of sound statistical systems. The need for data standards was highlighted by the financial crises of the mid-1990s, in which information deficiencies were seen to play a role. Under the Data Standards Initiatives, the IMF established the Special Data Dissemination Standard (SDDS) in 1996 to provide guidance to countries that have or seek access to capital markets to disseminate key data so that users in general, and financial market

participants in particular, have adequate information to assess the economic situations of individual countries. In 1997, the IMF introduced under the initiatives the General Data Dissemination System (GDDS) to provide a framework for countries that aim to develop their statistical systems, within which they can work toward disseminating comprehensive and reliable data and, eventually, meet SDDS requirements. In February 2012, the IMF Executive Board approved the establishment of the SDDS Plus as a third tier of the Fund's Data Standards Initiatives to address data gaps revealed during the global crisis. The SDDS Plus is open to all SDDS subscribers: those with systemically important financial sectors are encouraged to adhere early to the initiative.
