The Great Composers Portrayed on Film, 1913 through 2002 Charles P. Mitchell, 2015-07-11 This book is a comprehensive filmography of biographical films featuring the lives of 65 great classical composers. Performances analyzed include Richard Burton as Richard Wagner, Cornel Wilde as Frederic Chopin, Gary Oldman as Ludwig van Beethoven, Tom Hulce as Mozart, and Katharine Hepburn as Clara Schumann, among others. Arranged alphabetically by composer's name and illustrated with stills and posters, the text provides a brief biography of each composer and analyzes the feature films portraying him or her. Emphasis is given to the factual accuracy of the screenplay, the validity of the portrayal, and the film's presentation of the composer's music.

Portraying Older People in Advertising Thomas E. Robinson II, 2021-11-19 First published in 1998. As society grows and changes, advertisers are faced with the challenge of matching their advertising messages to new and different target audiences. For example, children, adolescents, men, women, and older individuals are all audiences with specific needs, wants, and desires that advertisers must address in their advertising appeals. The purpose of this research is to determine the degree to which certain advertisements in the general interest media portray older individuals differently depending on the target audience. Specifically, this study examines advertisers' attempts, in the electronic and print media, to target and attract the business of the older population.

The Changing Portrayal of Adolescents in the Media Since 1950 Patrick Jamieson, Daniel Romer, 2008-07-22 Scholars analyze the emergence of youth culture in music and powerful trends in gender and ethnic-racial representation, sexuality, substance use, and violence in the media in this text. It shows the evolution of teen portrayal, the potential consequences, and the ways policy-makers and parents can respond.

Portrayal and the Search for Identity Marcia Pointon, 2013-02-15 We are surrounded with portraits: from the cipher-like portrait of a president on a bank note to security pass photos; from images of politicians in the media to Facebook; from galleries exhibiting Titian or Leonardo to contemporary art deploying the self-image, as with Jeff Koons or Cindy Sherman. In antiquity portraiture was of major importance in the exercise of power. Today it remains not only a part of everyday life, but also a crucial way for artists to define themselves in relation to their environment and their contemporaries. In *Portrayal and the Search for Identity*, Marcia Pointon investigates how we view and understand portraiture as a genre and how portraits function as artworks within social and political networks. Likeness is never a straightforward matter, as we rarely have the subject of a portrait as a point of comparison. Featuring familiar canonical works and little-known portraits, *Portrayal* seeks to unsettle notions of portraiture as an art of convention, a reassuring reflection of social realities. Pointon invites readers to consider how identity is produced pictorially and where likeness is registered apart from in a face. In exploring these issues, she addresses wide-ranging problems such as the construction of masculinity in dress, representations of slaves, and self-portraiture in relation to mortality.

Portrayed Crazy Joyce Gibbs, 2019-05 A personal memoir of living with and surviving spousal abuse.

Determinants of Health: Theory, Understanding, Portrayal, Policy Matthew J. Commers, 2013-03-09 For decades, health professionals have asserted the importance of public participation in interventions for health. Medicine has pursued patient participation in clinical decision-making. In the public health realm, target groups have been asked to assist in the design and implementation of initiatives for health. In practice, however, patients and populations expect health professionals to give advice and - in some cases - to make decisions on their behalf. This implies limits to the ideal of participation. In this innovative work, the author contrasts public and professional understandings of health and the best ways to achieve health. The result is a model of lay participation in the structuring of medical and public health activity. The book is unique due to its policy-applicable, quantitative studies and its theoretical analysis of works by René Dubos and Aaron Antonovsky. It will be of value to professionals in health promotion, health education, medical anthropology, and social epidemiology.

Metaphor and the Portrayal of the Cause(s) of Sin and Evil in the Gospel of Matthew Judith V. Stack, 2020-02-25 *Metaphor and the Portrayal of the Cause(s) of Sin and Evil in the Gospel of Matthew* traces the range and significance of metaphors regarding the origin and sin and evil in Matthew and their congruence with texts of his milieu.

Portraying Violence in the Hebrew Bible Matthew J. Lynch, 2020-04-30 Most studies on violence in the Hebrew Bible focus on the question of how modern readers should approach the problem. But they fail to ask how the Hebrew Bible thinks about that problem in the first place. In this work, Matthew J. Lynch examines four key ways that writers of the Hebrew Bible conceptualize and critique acts of violence: violence as an ecological problem; violence as a moral problem; violence as a judicial problem; violence as a purity problem. These four 'grammars of violence' help us interpret crucial biblical texts where violence plays a lead role, like Genesis 4-9. Lynch's volume also offers readers ways to examine cultural continuity and the distinctiveness of biblical conceptions of violence.

Portraying Cicero in Literature, Culture, and Politics Francesca Romana Berno, Giuseppe La Bua, 2022-02-21 Cicero has played a pivotal role in shaping Western

culture. His public persona, his self-portrait as model of Roman prose, philosopher, and statesman, has exerted a durable and profound impact on the educational system and the formation of the ruling class over the centuries. Joining up with recent studies on the reception of Cicero, this volume approaches the figure of Cicero from a 'biographical', more than 'philological', perspective and considers the multiple ways by which different ages reacted to Cicero and created their 'Ciceros'. From Cicero's lifetime to our times, it focuses on how the image of Cicero was revisited and reworked by intellectuals and men of culture, who eulogized his outstanding oratorical and political virtues but, not rarely, questioned the role he had in Roman politics and society. An international group of scholars elaborates on the figure of Cicero, shedding fresh light on his reception in late antiquity, Humanism and Renaissance, Enlightenment and modern centuries. Historians, literary scholars and philosophers, as well as graduate students, will certainly profit from this volume, which contributes enormously to our understanding of the influence of Cicero on Western culture over the times.

Portrayed on the Heart Cynthia Hahn,2001-11-20 Hagiography, or writing about and illustrating the lives of saints, was one of the most creative areas for artistic inspiration in the literature and arts of the Middle Ages. This book explores the sumptuously illustrated saints' lives that were made in medieval Europe. Cynthia Hahn discusses a broad range of manuscripts and other artifacts, many of which are reproduced here, and provides an analysis of their pictorial and narrative structure. Hahn's book is a virtual compendium of images-many rarely published-as well as a learned study that deepens our understanding of the role of various types of saints, the nature of their audience, and the historical moment when individual works were produced. After two informative introductory chapters setting the historical and narrative context of pictorial hagiography, Hahn considers the Lives of Martyrs and Virgins, Bishops, Monks and Abbots, and Kings and Queens, and concludes with an examination of the extraordinary chronicles and illustrations of the lives of saints by the English monk Matthew Paris. She considers such questions as: Why were illustrated saints' lives produced in such great numbers during this period? Why were they illustrated at all given the trouble and expense of such illustration? And to whom did the saints' lives appeal, and how did their readers use them? As she addresses these and other intriguing questions, Hahn traces changes that occurred over time both in the images and the stories, and shows how their creators, mostly the intellectual elite, were finely attuned to audience reception. This important aspect of hagiographic production has received scant attention in the past, and as she considers this issue in light of contemporary narrative theory, Hahn brings us to a fresh appreciation of these intricately illustrated manuscripts and their multiple audiences.

1066 Andrew Bridgeford,2009-05-26 For more than 900 years the Bayeux Tapestry has preserved one of history's greatest dramas: the Norman Conquest of England, culminating in the death of King Harold at the Battle of Hastings in 1066. Historians have held for centuries that the majestic tapestry trumpets the glory of William the Conqueror and the victorious Normans. But is this true? In 1066, a brilliant piece of historical detective work, Andrew Bridgeford reveals a very different story that reinterprets and recasts the most decisive year in English history. Reading the tapestry as if it were a written text, Bridgeford discovers a wealth of new information subversively and ingeniously encoded in the threads, which appears to undermine the Norman point of view while presenting a secret tale undetected for centuries-an account of the final years of Anglo-Saxon England quite different from the Norman version. Bridgeford brings alive the turbulent 11th century in western Europe, a world of ambitious warrior bishops, court dwarfs, ruthless knights, and powerful women. 1066 offers readers a rare surprise-a book that reconsiders a long-accepted masterpiece, and sheds new light on a pivotal chapter of English history.

The Changing Portrayal of Adolescents in the Media Since 1950 Patrick Jamieson,Daniel Romer,2008-07-22 Adolescents are eager consumers of mass media entertainment and are particularly susceptible to various forms of media influence, such as modeling, desensitization, and contagion. These once controversial phenomena are now widely accepted along with the recognition that th media are a major socializer of youth During the economic boom of the post-World War II era, marketers and advertisers identified adolescents as a major audience, which led to the emergence of a pervasive youth culture. Enormous changes ensued in the media's portrayal of adolescents and the behaviors they emulate. These changes were spurred by increased availability and consumption of television, which joined radio, film, and magazines as major influence on youth. Later, the rapid growth of the video game industry and the internet contributed to the encompassing presence of the media. Today, opportunities for youthful expression about to the point where adolescents can easily create and disseminate content with little control by traditional media gatekeepers. In *The Changing Portrayals of Adolescents in the Media since 1950*, leading scholars analyze the emergence of youth culture in music and powerful trends in gender and ethnic-racial representation, sexuality, substance use, violence, and suicide portrayed in the media. This book illuminates the evolution of teen portrayal, the potential consequences of these changes, and the ways policy-makers and parents can respond.
