MindXpres: Conceptual and Technical Foundations for Next Generation Presentation Solutions Reinout Roels, 2019-05-27

Presentation tools such as PowerPoint were initially created to simulate physical slides and have inherited a lot of their limitations. In this dissertation we identify the shortcomings and unmet user needs in presentation software by means of literature study, observations, a survey and the programmatic analysis of over 12000 PowerPoint documents. The results indicate that user needs are slowly evolving while existing software has hardly changed

over the last 30 years. We motivate the need to rethink the concept of a presentation and we provide conceptual and technical foundations that can enable interoperable and well-integrated solutions for the identified shortcomings. The resulting MindXpres platform consists of a new conceptual framework, content model, information system and presentation engine. We present MindXpres as a presentation platform that enables researchers and developers to build innovative presentation solutions that cannot be implemented in the existing tools. We further demonstrate the flexibility of the MindXpres platform by discussing a wide range of proof-of-concept plug-in solutions for the identified shortcomings and unmet user needs.

The Short Road to Great Presentations Cheryl Reimold, Peter Reimold, 2003-06-19 A practical, readable guide to delivering superior presentations Speakers bear the responsibility for communicating effectively with their audience: presenting a clear message, supporting it with well-structured explanations and examples, and delivering it with ease, grace, and good visuals. Unfortunately, this rarely happens, as anyone who has endured a substandard presentation knows only too well. The key for

developing sound presentation skills need not, however, remain hidden. The Short Road to Great Presentations demystifies the art of public speaking as it shows you how to master the critical principles to make this skill an invaluable asset of your life and career. Drawing on twenty years of experience in helping engineers, scientists, and business people develop powerful communication skills, PERC Communications founders Peter and Cheryl Reimold present an easy-to-follow program for crafting winning presentations. They focus on two principles: 1) find a message that is clearly meaningful and accessible to your audience, and 2) connect strongly with your audience throughout your presentation. In applying these principles to a series of step-by-step preparations and on-stage actions, the authors help speakers focus on their most vital content, strengthen their structure and delivery, and—perhaps, most important—eliminate stress and aggravation. Chapter topics in this reader-friendly guide include: Structuring your message for maximum effect Preparing effective visuals Understanding and using body language and eye contact Handling tough questions and surprises Making smart use of slide shows and presentation software Conducting Web presentations and Web meetings Timeless speaking tips are

combined with up-to-date primers on the latest technology throughout. The Short Road to Great Presentations is a one-stop resource for learning and practicing superior professional communication. An Instructor Support FTP site is available from the Wiley editorial department:
