**The Priority List** David Menasche,2014-01-14 In this poignant and inspiring memoir, a beloved high school English teacher with terminal brain cancer undertakes a cross-country journey to reunite with his former students in order to find out if he made a difference in their lives, discovering along the way what is truly important in life. Based on a beloved teacher's most popular lesson, The Priority List is a bold, inspirational story of learning, love, and legacy that challenges us to ask: What truly matters in life? David Menasche lived for his work as a high school English teacher. His passion inspired his students, and between lessons on Shakespeare and sentence structure, he forged a unique bond with his kids, buoying them through personal struggles while sharing valuable life lessons. When a six-year battle with brain cancer ultimately stole David's vision, memory, mobility, and—most tragically of all—his ability to continue teaching, he was devastated by the thought that he would no longer have the chance to impact his students' lives each day. But teaching is something Menasche just couldn't quit. Undaunted by the difficult road ahead of him, he decided to end his treatments and make life his classroom. Cancer had robbed him of his past and would most certainly take his future; he wouldn't allow it to steal his present. He turned to Facebook with an audacious plan: a journey across America— by bus, by train, by red-tipped cane—in hopes of seeing firsthand how his kids were faring in life. Had he made a difference? Within forty-eight hours of posting, former students in more than fifty cities replied with offers of support and shelter. Traveling more than eight thousand miles from Miami to New York, to America's heartland and San Francisco's Golden Gate, and visiting hundreds of his students, David's fearless journey explores the things we all want and need out of life—family, security, independence, love, adventure—and forces us to stop to consider our own Priority List.

**Priority Areas for National Action** Institute of Medicine,Board on Health Care Services,Committee on Identifying Priority Areas for Quality Improvement,2003-04-10 A new release in the Quality Chasm Series, Priority Areas for National Action recommends a set of 20 priority areas that the U.S. Department of Health and Human Services and other groups in the public and private sectors should focus on to improve the quality of health care delivered to all Americans. The priority areas selected represent the entire spectrum of health care from preventive care to end of life care. They also touch on all age groups, health care settings and health care providers. Collective action in these areas could help transform the entire health care system. In addition, the report identifies criteria and delineates a process that DHHS may adopt to determine future priority areas.

**The Priority of Love** Timothy P. Jackson,2021-06-08 This book explores the relation between agape (or Christian charity) and social justice. Timothy Jackson defines agape as the central virtue in Christian ethical thought and action and applies his insights to three concrete issues: political violence, forgiveness, and abortion. Taking his primary cue from the New Testament while drawing extensively from contemporary theology and philosophy, Jackson identifies three features of Christian charity: unconditional commitment to the good of others, equal regard for others' well-being, and passionate service open to self-sacrifice for the sake of others. Charity, prescribed by Jesus for his disciples and named by Saint Paul as the greatest theological virtue, is contrasted with various accounts of justice. Jackson argues that agape is not trumped by justice or other goods. Rather, agape precedes justice: without the work of love, society would not produce persons capable of merit, demerit, and contract, the elements of most modern conceptions of justice. Jackson then considers the implications of his ideas for several questions: the nature of God, the relation between Christian love and political violence, the place of forgiveness, and the morality of abortion. Arguing that agapic love is to be construed as a gift of grace as well as a divine commandment, Jackson concludes that love is the eternal life that makes temporal existence possible and thus the first Christian virtue. Though foremost a contribution to Christian ethics, Jackson's arguments and the issues he takes up will find a broader readership.

*Planning Isn't My Priority* Julia Cook,2016-02-29 Cletus and Bocephus are back! While working on their science fair project on mealworms, they learn to appreciate and understand each other's strengths and weaknesses. Creativity needs structure and structure needs creativity...and Cletus and Bocephus BOTH need to know how to plan and prioritize! You learn from mistakes and use what you learn, so you don't make those mistakes again. Every time you play a video game, you plan and prioritize to WIN! This storybook is the second in the Functioning Executive book series. It highlights the importance of planning and prioritizing. It also spotlights the unique differences and strengths that live in all of us. This book will help teach children to determine the necessary steps, in order, towards fulfilling a goal which is a vital executive function skill. Children who possess effective prioritizing skills can learn to manage not only daily responsibilities, but also how to prepare for future success. Planning and prioritizing are two of the most difficult executive function skills for people to master. Planning effectively is the thinking skill that helps an individual develop strategies to accomplish goals. It allows a person to think about completing a task before it is started. Life is all about making choices. Prioritizing effectively helps a person make the best choices possible. Time is a limited commodity. To get the most out of your time and accomplish all that you need to do, you have to be able to plan and prioritize both on a long and short-term basis.

*The Priority of Mind* Keith Ward,2021-11-12 Is the mind just a by-product of the brain? Or is mind the fundamental reality, which creates matter? This book is a defense of mind as prior to matter. It is a philosophical work, written in an accessible style, which explains idealism as the teaching of most classical philosophers, and as most consistent with modern science.

**Worship** John F. MacArthur,2012-01-20 Nothing is more important than worship. It is the theme of Scripture, the theme of eternity, and the theme of redemptive history— to worship the true and living and glorious God is the purpose of all creation. So why do we treat it as only what is sung or played in church on Sunday morning? Pastor John MacArthur leads you through Scripture texts about true worship. You will learn that worship is any essential expression of service rendered unto God by a soul that loves and extols Him for who He is. Worship is the nonstop role of believers, not merely part of a church service. So get ready to alter your priorities, aiming higher than entertaining worshipers on Sunday mornings. Worship shows that your ultimate priority must always be to worship the true and living God, with a radically different type of living.

**Disease Control Priorities, Third Edition (Volume 9)** Dean T. Jamison,Hellen Gelband,Susan Horton,Prabhat Jha,Charles N. Mock,Rachel Nugent,2017-12-06 As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a highest-priority essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

**Daily Priorities** Dee Phillips,2019-09-14 Every day, there are so many demands on your time and as a result you may feel overwhelmed, inefficient and unproductive. This little notebook helps you keep track of important tasks you have to do enabling you to focus more efficiently. It can help you decide which tasks are of the highest priority on your to-do list and you can give more attention and energy to those given tasks.By identifying which tasks are most important and which you need to complete first makes you more efficient and enables you to feel more accomplished. This thereby reduces your stress levels.This Daily Priorities Tracker enable you to: -Identify important tasks on your to-do list-Stop procrastinating -Feel less overwhelmed by seeing the things you need to do and accomplish-Design your day to give attention to that what is most important and needs to be done-Become more productive-Reduce your stress levels by having a 'game plan' for your dayThis Daily Priorities tracker is not meant to be a daily planner, but gives you insight on important tasks that

need to be completed. Each page has a space for your 3 most important priorities to be accomplished that day, along with space for your action plan to get this done. There is also a space for recording your completion of the task and notes that might be important. This tracker comes in the perfect size ( 8 1/2 x 11) for you to have sufficient space to write in. It is small enough to toss into your briefcase or bag, but large enough for it to be noticeable on your desk. Take charge of your daily task schedule with the perfect tool for your daily priorities. Click above to get this absolutely necessary workbook now. This notebook would make the perfect gift for any secretary too! Give it as a Secret Santa gift at Christmas!

**Disease Control Priorities in Developing Countries** Dean T. Jamison, Joel G. Breman, Anthony R. Measham, George Alleyne, Mariam Claeson, David B. Evans, Prabhat Jha, Anne Mills, Philip Musgrove, 2006-04-02 Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

*Synchronization in Real-Time Systems* Ragunathan Rajkumar, 2012-12-06 Real-time computing systems are vital to a wide range of applications. For example, they are used in the control of nuclear reactors and automated manufacturing facilities, in controlling and tracking air traffic, and in communication systems. In recent years, real-time systems have also grown larger and become more critical. For instance, advanced aircraft such as the space shuttle must depend heavily on computer systems [Carlow 84]. The centralized control of manufacturing facilities and assembly plants operated by robots are other examples at the heart of which lie embedded real-time systems. Military defense systems deployed in the air, on the ocean surface, land and underwater, have also been increasingly relying upon real-time systems for monitoring and operational safety purposes, and for retaliatory and containment measures. In telecommunications and in multi-media applications, real time characteristics are essential to maintain the integrity of transmitted data, audio and video signals. Many of these systems control, monitor or perform critical operations, and must respond quickly to emergency events in a wide range of embedded applications. They are therefore required to process tasks with stringent timing requirements and must perform these tasks in a way that these timing requirements are guaranteed to be met. Real-time scheduling algorithms attempt to ensure that system timing behavior meets its specifications, but typically assume that tasks do not share logical or physical resources. Since resource-sharing cannot be eliminated, synchronization primitives must be used to ensure that resource consistency constraints are not violated.

*Top Priority* Cara Dee, 2019-08-22 In a perfect world, Lucas West would meet someone in one of the BDSM communities he was active in, someone who ached for a Daddy Dom as much as Lucas longed for a Little to care for. They would date, play, build something that was just for them, and share a future together. In a perfect world, Colt Carter would get through his next deployment and then move closer to DC where he could create at least a semblance of a personal life. He wanted something outside of the Air Force, something kinky, something worth leaving everything behind for eventually. For years, he'd kept his inner Sadist and Daddy Dom locked up, only letting him out to play on rare occasions. In a perfect world... In reality, Lucas and Colt met each other. Top Priority is the first novella in The Game Series, a BDSM series where romance meets the reality of kink. Sometimes we fall for someone we don't match with, sometimes vanilla business gets in the way of kinky pleasure, and sometimes we have to compromise and push ourselves to overcome trauma and insecurities. No matter what, two things are certain. This is not a perfect world, and life never turns out the way you planned.

**Priority Queues by N K Jaiswal** Anatoli Torokhti, Phil Howlett, 1968-02-12 In this book, we study theoretical and practical aspects of computing methods for mathematical modelling of nonlinear systems. A number of computing techniques are considered, such as methods of operator approximation with any given accuracy; operator interpolation techniques including a non-Lagrange interpolation; methods of system representation subject to constraints associated with concepts of causality, memory and stationarity; methods of system representation with an accuracy that is the best within a given class of models; methods of covariance matrix estimation; methods for low-rank matrix approximations; hybrid methods based on a combination of iterative procedures and best operator approximation; and methods for information compression and filtering under condition that a filter model should satisfy restrictions associated with causality and different types of memory. As a result, the book represents a blend of new methods in general computational analysis, and specific, but also generic, techniques for study of systems theory and its particular branches, such as optimal filtering and information compression. - Best operator approximation, - Non-Lagrange interpolation, - Generic Karhunen-Loeve transform - Generalised low-rank matrix approximation - Optimal data compression - Optimal nonlinear filtering

Priority in Aristotle's Metaphysics Michail Peramatzis, Michail M. Peramatzis, 2011-08-11 The idea that some parts of reality are fundamental and others derivative was an important one in Aristotle's philosophical system, and is now again of great current interest in philosophy. Michail Peramatzis presents a new account of priority relations in Aristotle's metaphysics, and draws out their continuing philosophical significance.

The Priority of John John A. T. Robinson, 2011-03-01 It has been the fate of many books on John to be left unfinished, for its interpretation naturally forms the crowning of a lifetime. I have myself been intending to write a book on the Fourth Gospel since the 'fifties, before I broke off (reluctantly) to be Bishop of Woolwich, though I am grateful now that I did not produce it prematurely at that time. It means however that I shall be compelled to refer to and often recapitulate material directly or indirectly related to the Johannine literature, which I have written over the years (some of it indeed while I was bishop). Many scholars in fact, if not most now, think that the author of the Gospel himself never lived to finish it and have seen the work as the product of numerous hands and redactors. As will become clear, I prefer to believe that the ancient testimony of the church is correct that John wrote it 'while still in the body' and that its roughnesses, self-corrections and failures of connection, real or imagined, are the result of its not having been smoothly or finally edited. If so I am in good company. At any rate who could wish for a better last testimony from his friends than that 'his witness is true' (John 21.24)? In other words, he got it right--historically and theologically. --from the Introduction At the time of his death in December 1983, John Robinson had completed the text of the book on which his 1984 Bampton lectures were to be based, so that it is possible to see the full details of his extremely controversial argument that the Gospel of John was the first Gospel to be written. Dr. Robinson himself once described the dawning of his conviction that this was the case as a 'Damascus Road experience', and his presentation of the evidence is made with all the customary vigor with which he would argue for something in which he deeply believed. The objections which need to be overcome to stand on its head what has long been one of the fundamental assumptions of New Testament scholarship are substantial, but here once again Dr. Robinson shows that so much of what is taken as established fact in that area is no more than preference and presumption. Certainly he will provoke rethinking on a whole series of topics, from the chronology of Jesus' ministry to the nature of his teaching. As The Listener said of the equally controversial Redating the New Testament: The greatest pleasure Dr. Robinson gives is purely intellectual. His book is a prodigious virtuoso exercise in inductive reasoning and an object lesson in the nature of historical argument and historical

knowledge. This sequel equals, if not excels, its predecessor in those respects and is a fitting tribute to a brilliant New Testament scholar. The manuscript was prepared for publication by Dr. Chip Coakley, Dr Robinson's pupil, now Lecturer in Religious Studies in the University of Lancaster.

*Initial National Priorities for Comparative Effectiveness Research* Institute of Medicine,Board on Health Care Services,Committee on Comparative Effectiveness Research Prioritization,2009-11-14 Clinical research presents health care providers with information on the natural history and clinical presentations of disease as well as diagnostic and treatment options. In today's healthcare system, patients, physicians, clinicians and family caregivers often lack the sufficient scientific data and evidence they need to determine the best course of treatment for the patients' medical conditions. Initial National Priorities for Comparative Effectiveness Research(CER) is designed to fill this knowledge gap by assisting patients and healthcare providers across diverse settings in making more informed decisions. In this 2009 report, the Institute of Medicine's Committee on Comparative Effectiveness Research Prioritization establishes a working definition of CER, develops a priority list of research topics, and identifies the necessary requirements to support a robust and sustainable CER enterprise. As part of the 2009 American Recovery and Reinvestment Act, Congress appropriated \$1.1 billion in federal support of CER, reflecting legislators' belief that better decisions about the use of health care could improve the public's health and reduce the cost of care. The Committee on Comparative Effectiveness Research Prioritization was successful in preparing a list 100 top priority CER topics and 10 recommendations for best practices in the field.
