*Nine Algorithms That Changed the Future* John MacCormick, 2020-09-15 Nine revolutionary algorithms that power our computers and smartphones Every day, we use our computers to perform remarkable feats. A simple web search picks out a handful of relevant needles from the world's biggest haystack. Uploading a photo to Facebook transmits millions of pieces of information over numerous error-prone network links, yet somehow a perfect copy of the photo arrives intact. Without even knowing it, we use public-key cryptography to transmit secret information like credit card numbers, and we use digital signatures to verify the identity of the websites we visit. How do our computers perform these tasks with such ease? John MacCormick answers this question in language anyone can understand, using vivid examples to explain the fundamental tricks behind nine computer algorithms that power our PCs, tablets, and smartphones.

*The History of Code Breaking* Nigel Cawthorne,2017-12-15 This intriguing and revelatory history of cryptology ranges from the early days of code-making and code-breaking in ancient Egypt, Sparta, and Rome to the present day when it has slipped beyond the tight control of governments and now affects all our lives whenever we use our cell phones or connect to the internet. Subjects covered here include Mary Queen of Scots' cryptic messages when she was plotting against her cousin Elizabeth I; the codes used by George Washington for military and political purposes; and code-breaking during World Wars I and II, including the Enigma Machine. Those who invent codes and those who break them are fascinating characters. This is their story.

**Revenge Without Remorse** Alex Salaiz, 2018-10-26 The terrorist leaders from the Middle East were upset their jihadist sleeper in the United States had failed miserably to eliminate FBI Special Agent Chad Winters, a recurring thorn on their side. After having financed numerous failures, the ISIS leader, Abu Bakr al-Baghdadi, decided to go after Winters' family instead, emulating the words of the Republican presidential candidate that said, if elected, he would have the families of the terrorists kill. A Canadian sleeper received the ISIS leader's assignment and set out to execute the holy mission in the United States. The sleeper found out Winters had no immediate family, only the Knights, a retired Army couple. The elderly Knights were the parents of Nora Knight, Chad's lovely fiancé, but she was killed before their planned wedding many years before. Chad became extremely angered after the appalling murders of the elderly Knights, whom he considered family, and now

vow to seek revenge to its fullness. But, his revenge plan was impeded by someone else also trying to kill the murderer, but for other unknown reasons. Chad was not going to let that happen; seeking revenge against the Knight's murderer was his and only his. The race between Chad and the unknown tracker to find the killer of the Knights was on. Who would get to kill the murderer first, Chad or the unknown tracker, as a path of death was left behind from Toronto, Canada to Denver, Colorado. Following both, the Knight's killer and the unknown tracker, Chad had to use all of his experience and even resort to some unorthodox methods to accomplish his goal. But, would Chad get the tracker first before the tracker would kill the Knight's killer? This is the exciting and final book of FBI Special Agent Chad Winters' trilogy, 'Revenge Without Remorse', by author Alex Salaiz.
