Private Pictures Daniel Angeli, Jean-Paul Dosset, 1980

Sexy Girlfriends Bob Baron, 2017-01-03 Many guys enjoy taking sexy and revealing photographs of their girlfriends - and sometimes of their wives. The motives behind these pictures varies but whatever the reason the result is frequently quite enjoyable. In this book, editor and collector Bob Baron brings together some prime examples of this photographic hobby. The models are all amateur, girl next door types who possess the charm and genuine smiles that the professionals lack. Some are more daring than others but they are all well worth a look.

Prince Afshin Shahidi, 2017-10-24 Featuring a foreword by Beyoncé Knowles-Carter. When Prince wanted to document his One Nite Alone tour in 2002, he turned to Afshin Shahidi. Again in 2004, he went along on Prince's record breaking Musicology Tour. Afshin met Prince in 1989 and became his cinematographer and later his photographer. He was the photographer closest to Prince for the last fifteen years of Prince's life. Afshin is the only photographer to shoot the legendary 3121 private parties in Los Angeles that became the most sought after invitations in Hollywood. *Prince: A Private View* compiles his work into a journey through Prince's extraordinary life. With many never-before-seen photos, this is the ultimate collection of - some intimate, some candid, some in concert - shots of Prince, but all are carefully directed in the artist-as-art style that we associate with him. Deep photo captions are brief, but complete stories about Prince's life at that moment - some are incisive, others are personal and even funny.

TACCLE Graham Attwell, 2009 This book is written for classroom teachers who want to know more about e-learning and who would like to experiment with designing e-learning material to use in their own classrooms. It is primarily targeted at secondary teachers but there is no reason why primary school teachers and adult education teachers should not find it useful too. The other group we had in mind were those of you still undertaking initial teacher training. Although there are some exemplary courses, a depressing number of trainee teachers continue to arrive in the classroom having barely heard the words 'e-learning', still less have hands on experience of it.

Making History Wu Hung, 2008 This volume analyzes the cultural origins, precedents, influences and aspirations of the contemporary Chinese artists.

Exposed Memories Zsófia Bán, Hedvig Turai, 2010-10-30 Within the larger context of cultural memory, family pictures have become one of the most intriguing multi- and interdisciplinary fields of investigation in the past decade. This field brings together artists working in different media (e.g. documentary photography and film, photo-based painting and installations, digital art, collage, montage, comics, etc.) as well as academics, critics, theorists and writers working in a wide range of disciplines including literature, history, art history, sociology, anthropology, psychoanalysis, film and media studies, visual culture studies, gender studies, postcolonial studies, and word and image studies. This volume intends to offer a broad, panoramic view of the topic combining West and East European as well as American perspectives.

Images in Social Media Susanne Ørnager, Haakon Lund, 2022-06-01 This book focuses on the methodologies, organization, and communication of digital image collection research that utilizes social media content. (Image is here understood as a cultural, conventional, and commercial-stock photo-representation.) The lecture offers expert views that provide different interpretations of images and their potential implementations. Linguistic and semiotic methodologies as well as eye-tracking research are employed to both analyze images and comprehend how humans consider them, including which salient features generally attract viewers' attention. This literature review covers image-specifically photographic-research since 2005, when major social media platforms emerged. A citation analysis includes an overview of co-citation maps that demonstrate the nexus of image research literature and the journals in which they appear. Eye tracking tests whether scholarly templates focus on the proper features of an image, such as people, objects, time, etc., and if a prescribed theme affects the eye movements of the observer. The results may point to renewed requirements for building image search engines. As it stands, image management already requires new algorithms and a new understanding that involves text recognition and very large database processing. The aim of this book is to present different image research areas and demonstrate the challenges image research faces. The book's scope is, by necessity, far from comprehensive, since the field of digital image research does not cover fake news, image manipulation, mobile photos, etc.; these issues are very complex and need a publication of their own. This book should primarily be useful for students in library and information science, psychology, and computer science.

Handbook of Autobiography / Autofiction Martina Wagner-Egelhaaf, 2019-01-29 Autobiographical writings have been a major cultural genre from antiquity to the present time. General questions of the literary as, e.g., the relation between literature and reality, truth and fiction, the dependency of author, narrator, and figure, or issues of individual and cultural styles etc., can be studied preeminently in the autobiographical genre. Yet, the tradition of life-writing has, in the course of literary history, developed manifold types and forms. Especially in the globalized age, where the media and other technological / cultural factors contribute to a rapid transformation of lifestyles, autobiographical writing has maintained, even enhanced, its popularity and importance. By conceiving autobiography in a wide sense that includes memoirs, diaries, self-portraits and autofiction as well as media transformations of the genre, this three-volume handbook offers a comprehensive survey of theoretical approaches, systematic aspects, and historical developments in an international and interdisciplinary perspective. While autobiography is usually considered to be a European tradition, special emphasis is placed on the modes of self-representation in non-Western cultures and on inter- and transcultural perspectives of the genre. The individual contributions are closely interconnected by a system of cross-references. The handbook addresses scholars of cultural and literary studies, students as well as non-academic readers.

The Scope of Tolerance Raphael Cohen-Almagor, 2005-12-20 One of the dangers in any political system is that the principles that underlie and characterize it may, through their application, bring about its destruction. Liberal democracy is no exception. Moreover, because democracy is relatively a young phenomenon, it lacks experience in dealing with pitfalls involved in the working of the system - the 'catch' of democracy. This is an interdisciplinary study concerned with the limits of tolerance, this 'democratic catch', and the costs of freedom of expression. Rights are costly, and someone must pay for them. We can and should ask about the justification for bearing the costs, weighing them against the harms inflicted upon society as a result of a wide scope of tolerance. While recognizing that we have the need to express ourselves, we should also inquire about the justifications for tolerating the damaging speech and whether these are weighty enough. This book combines theory and practice, examining issues of contention from philosophical, legal and media perspectives and covers such issues as: media invasion into one's privacy offensive speech incitement hate speech holocaust denial media coverage of terrorism. This book is essential reading for anyone who has research interests in political theory, extremism, and free speech.
