Objects to Learn about and Objects for Learning 2 Joel Bisault,Roselyne Le Bourgeois,Jean-Francois Themines,Mickael Le Mentec,Celine Chauvet-Chanoine,2022-03-01 Resulting from a conference that took place in Amiens, France, in June 2019, this book examines the place and role of objects centered in teaching practices from kindergarten to university, both in the context of France and elsewhere. These “objects for learning” are considered in their physicality as productions, work or signs that are used for learning. They become “objects to learn about” when the object itself is the learning objective. This book offers a cross-disciplinary perspective, linking the different disciplinary fields studied and the many reference sources used by the authors. This two-volume work offers an overview of current research on the subject, with this second volume focusing on objects in representations of space and time, then on learners’ activities in the making or use of objects, before concluding with different cultural and philosophical perspectives on objects

Tomorrow's Criminals N. Wim Slot,Machteld Hoeve,2016-02-24 It has been acknowledged for some years that the early onset of delinquency can predict a long and serious criminal career. Most resources are targeted at the teenage years but this book argues convincingly that more research and interventions should be aimed at child delinquents aged 12 and under. Tomorrow's Criminals addresses key problems in criminological research and makes studies from the Netherlands more accessible to a wider audience. It provides information and analyses on risk factors and reviews screening tools and risk-focused prevention methods. The contributions increase visibility and accessibility of European policy and practice in the explanation and prevention of child delinquency.

This text explains in depth a step-by-step approach to processing the pathogenic memory structures that are the basis of most depressive disorders and ways to address both depressive and suicidal states. Real-world case studies incorporate the often-co-occurring trauma-based disorders found in depressive patients. These are practical “how-to” chapters, including one devoted to drawing integration with numerous examples of actual patient drawings as clients go through the EMDR process.
