Responding to Polar Questions across Languages and Contexts Galina B. Bolden, John Heritage, Marja-Leena Sorjonen, 2023-12-15 This book is about one of the most fundamental action sequences found across human societies and socio-cultural contexts: polar questions and their responses. Question-answer sequences are among the most basic building blocks for sequences of action in interaction and are ubiquitous among the languages of the world. Among different types of questions, polar questions are the most common, occurring with greater frequency in all studied languages. This volume presents a collection of conversation analytic studies into responses to polar questions across ten different, typologically diverse languages, in a range of action environments and social contexts. The studies explore different ways in which speakers can respond to polar questions, and the relationships between response design, the action implemented by the response, and the context in which it occurs. Taken together, the studies assembled in the volume present a nuanced view of polar responses as a situated social action.

Cognitive Approaches to Tense, Aspect, and Epistemic Modality Adeline Patard, Frank Brisard, 2011 This volume addresses problems of semantics regarding the analysis of tense and aspect (TA) markers in a variety of languages, including Arabic, Croatian, English, French, German, Russian, Thai, and Turkish. Its main interest goes out to epistemic uses of such markers, whereby epistemic modality is understood as indicating "a degree of compatibility between the modal world and the factual world" (Declerck). All contributions, moreover, tackle these problems from a more or less cognitive point of view, with some of them insisting on the need to provide a unifying explanation for all usage types, temporal and non-temporal, and all of them accepting the premise that the semantics of TA categories essentially refers to subjective, rather than objective, concerns. The volume also represents one of the first attempts to gather accounts of TA marking (in various languages) that are explicitly set within the framework of Cognitive Grammar. Ultimately, this volume aims to contribute to establishing an awareness that modal meaning elements are directly relevant to the analysis of the grammar of time.
