True Story Ty Montague, 2013-06-25 Is your company a storyteller—or a storydoer? The old way to market a business was storytelling. But in today's world, simply communicating your brand's story in the hope that customers will listen is no longer enough. Instead, your authentic brand must be evident in every action the organization undertakes. Today's most successful businesses are storydoers. These companies create products and services that, from the very beginning, are manifestations of an authentic and meaningful story—one told primarily through action, not advertising. In *True Story*, creative executive Ty Montague argues that any business, regardless of size or industry, can embrace the principles of storydoing. Indeed, our best-run companies—from small start-ups to global conglomerates—organize around a coherent narrative that is then broadcast through every action they take (from product design to customer service to marketing). Montague shows why storydoing firms are nimble, more adaptive to change, and more efficiently run businesses. Montague is a founder of the growth consultancy co:collective and the former president and CCO of J. Walter Thompson, the largest advertising agency in North America. He brings his depth of creative business experience to the book and provides a clear framework and proven process for bringing you and your customers together in the creation of your brand story. Montague introduces five critical elements—what he calls the “the four truths and the action map”—that are the foundation of storydoing: • the participants (your customers, partners, and employees) • the protagonist (your company today) • the stage (the world around your business) • the quest (your driving ambition and contribution to the world) • your action map (the actions that will make your story real for participants) The book is filled with examples of how forward-thinking organizations—including Red Bull, Shaklee, Grind, TOMS Shoes, and News Corporation—are effectively using storydoing to transform their organizations and drive extraordinary results.

The Cosmic Microwave Background Júlio C. Fabris, Oliver Piattella, Davi C. Rodrigues, Hermano E.S. Velten, Winfried Zimdahl, 2016-10-07 The series of texts composing this book is based on the lectures presented during the II José Plínio Baptista School of Cosmology, held in Pedra Azul (Espírito Santo, Brazil) between 9 and 14 March 2014. This II JBPCosmo has been entirely devoted to the problem of understanding theoretical and observational aspects of Cosmic Background Radiation (CMB). The CMB is one of the most important phenomena in Physics and a fundamental probe of our Universe when it was only 400,000 years old. It is an extraordinary laboratory where we can learn from particle physics to cosmology; its discovery in 1965 has been a landmark event in the history of physics. The observations of the anisotropy of the cosmic microwave background radiation through the satellites COBE, WMAP and Planck provided a huge amount of data which are being analyzed in order to discover important informations regarding the composition of our universe and the process of structure formation.

Astrophysics and the Evolution of the Universe Leonard S Kisslinger, 2016-08-08 The aim of this book is to teach undergraduate college or university students, and adults interested in astronomy and astrophysics, the basic mathematics and physics concepts needed to understand the evolution of the universe, and based on this to teach the astrophysical theories behind evolution from the very early times to the present. The book does not require extensive knowledge of mathematics, like calculus, and includes material that explains concepts such as velocity, acceleration, and force. Based on this, fascinating topics such as Dark Matter, measuring Dark Energy via supernovae velocities, and the creation of mass via the Higgs mechanism are explained. All college students with an interest in science, especially astronomy, without extensive mathematical backgrounds, should be able to use and learn from this book. Adults interested in topics like Dark Energy, the Higgs boson, and detection of Gravitational Waves, which are in the news, can make use of this book as well.

Questions of Modern Cosmology Mauro D'Onofrio, Carlo Burigana, 2009-07-09 Are we living in the golden age of cosmology? Are we close to understanding the nature of the unknown ingredients of the currently most accepted cosmological model and the physics of the early Universe? Or are

we instead approaching a paradigm shift? What is dark matter and does it exist? How is it distributed around galaxies and clusters? Is the scientific community open to alternative ideas that may prompt a new scientific revolution - as the Copernican revolution did in Galileo's time? Do other types of supernovae exist that can be of interest for cosmology? Why have quasars never been effectively used as standard candles? Can you tell us about the scientific adventure of COBE? How does the extraction of the Cosmic Microwave Background anisotropy depend on the subtraction of the various astrophysical foregrounds? These, among many others, are the astrophysical, philosophical and sociological questions surrounding modern cosmology and the scientific community that Mauro D'Onofrio and Carlo Burigana pose to some of the most prominent cosmologists of our time. Triggered by these questions and in the spirit of Galileo's book Dialogue Concerning the Two Chief World Systems the roughly 40 interview partners reply in the form of essays, with a critical frankness not normally found in reviews, monographs or textbooks.

Unter den Polarlichtern der Antarktis Robert Schwarz,Felicitas Mokler,2022-10-27 Ein einmaliger Bericht über Leben und Alltag am geografischen Südpol Wenn sich der antarktische Sommer dem Ende entgegenneigt und das letzte Flugzeug abhebt, ist die Besatzung der Amundsen-Scott Südpolstation auf sich gestellt. Was man im Eis über den Weltraum lernt, wie sich -80 °C anfühlen und wieso Vanilleeis nach Kerosin schmeckt, weiß niemand besser als Robert Schwarz, der 13,5 Jahre am geografischen Südpol verbracht hat. In seinem fesselnden und einmaligen Bericht aus der Kältekammer der Erde lässt er uns am Alltag in der Antarktis teilhaben, züchtet Salat und einen Zimmergletscher und lauscht dem Echo des Urknalls und den Schneestürmen unter den Polarlichtern des Südpols. Faszinierende Einblicke in die Forschung auf der Amundsen-Scott-Südpolstation Robert Schwarz nimmt uns mit in die erstaunliche Welt auf einer Forschungsstation in mitten der Antarktis, einem Platz den er wie auf einem anderen Planeten beschreibt. Durch seine Augen lässt er uns teilhaben am Leben fernab aller Zivilisation, in extremer Kälte und sechs Monate dauernder Polarnacht – einem idealen Standort für astronomische und teilchenphysikalische Experimente. Wir begleiten ihn bei seiner täglichen Arbeit an den Teleskopen der Forschungsstation und erfahren, wie die neuesten Erkenntnisse von dort die Astronomie weiterbringen. Entdecken Sie in dieser spannenden

Dokumentation zusammen mit Robert Schwarz eine uns unbekannte Welt. Erfahren Sie hautnah, was es heißt, in der Abgeschlossenheit zu leben, was Kameradschaft und Teamwork ausmachen und was Wissenschaft zum Anfassen tatsächlich bedeutet.

Il mio pianeta - Rinascita Marco Raibaldi, 2015-12-18 Corre l'anno 2536, la razza umana è esiliata su Nova, un pianeta alieno inospitale, colmo d'insidie e strane creature dove impervia una furente guerra civile tra le forze armate del Generale e i Ribelli. Vanger è un uomo misterioso che non ricorda nulla del suo passato ed è dotato di uno speciale impianto metallico sulla schiena che gli conferisce poteri straordinari. Alla disperata ricerca dei suoi ricordi, Vanger, si troverà coinvolto in questa guerra che lo porterà a scoprire nuovi tasselli della sua vita passata ed infine, a suo malgrado, imparerà quanto l'essere umano possa essere spietato e senza scrupoli. Marco Raibaldi ha venticinque anni e da sempre è un appassionato lettore di libri Fantasy e di Fantascienza. Vive in provincia di Savona, nel caratteristico borgo medioevale di Villanova d'Albenga e *Il Mio Pianeta - Rinascita* è il suo primo romanzo.
