🔍 *CONTROVERSIES AND INNOVATIONS IN UROLOGICAL SURGERY* J. Clive Gingell,Paul H. Abrams,2012-12-06 The title of this book is a challenge. Anyone with the least knowledge of present day urology will know that there are many very controversial aspects of this subject. Urology is not alone in this unsettled environment for there are similar debates in almost all other aspects of surgery. In addition to the rapid changes in technology, an important part of the explanation for these controversies is simply that more surgeons are prepared to admit that no area of their work is so established that it does not bear further scrutiny and assessment. Argument can be tedious but debate is healthy. This book aims to present material that is debatable: experienced practitioners of each topic explain why an opinion or preference can be sustained. The purist might wish to have these opinions resolved by a well-planned clinical trial, but experience of clinical trials shows that they do not always produce results that are easily translated into a positive change in clinical practice. Would the reader be persuaded more by a statistically significant difference or by an experienced clinician who has reached certain conclusions? Both are risky, but since surgical techniques are often not easily converted into appropriate studies or trials the editors have obtained the best opinion on each controversy and innovation. The media adore controversy for its own sake. The medical profession accepts controversy but knows that few events in medicine are absolute and few procedures can be done only by one method.

🔍 *READING POWER, REVISED & EXPANDED EDITION* Adrienne Gear,2015-10-06 Ten years ago, Reading Power was launched in an elementary school in Vancouver. It has since evolved into a recognized approach to comprehension instruction being implemented across Canada, in the United States, United Kingdom, Sweden, and China. This ground-breaking approach showed teachers how to help students think while they read — connect, question, visualize, infer, and transform. Since the publication of the first edition of Reading Power, Adrienne Gear has continued to reflect on and refine her ideas about metacognition, comprehension instruction, and the Reading Power strategies. This revised and expanded edition shares these new understandings, and offers teachers new ideas, new lessons, and, of course, new anchor books to support the Reading Power principles. An ideal resource for teachers familiar to this strategic approach to teaching reading, or for those looking for new ways to connect thinking with reading.

🔍 *A SUPERINTENSE LASER-PLASMA INTERACTION THEORY PRIMER* Andrea Macchi,2013-01-24 The continuous trend towards higher and higher laser intensities has opened the way to new physical regimes and advanced applications of laser-plasma interactions, thus stimulating novel connections with ultrafast optics, astrophysics, particle physics, and biomedical applications. This book is primarily oriented towards students and young researchers who need to acquire rapidly a basic knowledge of this active and rapidly changing research field. To this aim, the presentation is focused on a selection of basic models and inspiring examples, and includes topics which emerged recently such as ion acceleration, relativistic engineering and radiation friction. The contents are presented in a self-contained way assuming only a basic knowledge of classical electrodynamics, mechanics and relativistic dynamics at the undergraduate (bachelor) level, without requiring any previous knowledge of plasma physics. Hence, the book may serve in several ways: as a compact textbook for lecture courses, as a short and accessible introduction for the newcomer, as a quick reference for the experienced researcher, and also as an introduction to some nonlinear mathematical methods through examples of their application to laser-plasma modeling.

🔍 *WHEN THE FILTER FADES* Janine Jellars,2023-10-16 There’s a hierarchy to fame – from the real celebs who sell their skills as actors and singers, to the professionally pretty (the garnish to any occasion), the hashtag hustlers, who range from influencers to the social media savvy, to the hopeless hangers-on. Everyone has their place in the ecosystem, and knowing your place in that hierarchy is half the fame game won. For three young women in Joburg, the new age of internet celebrity presents them with obstacles, opportunities, opulence and a chance at fame, fortune and fierce fashion. Lin through sheer ambition and force of will, Lin has rebranded her entire existence. She’s shrugged off her past to fully embrace a new identity: Linfluencer, the high-end influencer whose outfits of the day are obsessively followed by every budding fashionista with a blossoming social media addiction. Lebo then there’s Lebo, who has only ever known a life of fame – real fame – as the former child prodigy behind TV phenomenon Sedi Star. Everyone grew up watching her every move, but now, as she’s grown up, the work, roles and offers have evaporated. But her penchant for scandal, controversy and social media squabbles have kept her in the headlines. Mbali and finally there’s South Africa’s reigning queen of gossip: Mbali. The entertainment site she runs with an iron fist is known for breaking the hottest news – and the odd celebrity career. With the hashtag hustle threatening her media empire, how will she continue to keep her readers enthralled? As Lin, Lebo and Mbali jostle to take their places in the fame hierarchy, their ambitions, aspirations and agendas collide. Their wins and woes not only affect one another, but can mean that they either individually rise or collectively crumble. Will Lin’s past threaten her future? Will Lebo’s (self-)sabotage prevent her return to the top? Will Mbali’s reign as the queen of gossip continue – or reach a dead end? The choices they make can balance or break their entire ecosystem. Janine Jellars, the author of When the Filter Fades, is an editor, marketer and entrepreneur. A child of the 1990s, and the ultimate millennial ‘slashie’, she’s seen it all, done it all, and written all about it.

🔍 *A RENDEZVOUS WITH LOVE* Dr Meera,2020-05-01 ‘A Rendezvous with Love’ describes the silent emotions of a woman that has the potential to shake and make or break a woman yet none other than her has any airs about it. The story brings to the limelight the clashes of a woman’s life. Meera and Mahipal, two technophiles coincide at a conference and get addicted to each other beyond technological connections. Both are the responsible heads of their individual families. Hence, there are huge emotional boundaries in between. Meera, shuttling between the worlds of sheer differences battles with her fears and clashes to peace-in with life. The story more than a romantic description reflects on the importance of the real-world decisions of life. That, right or wrong, any empty space in life will eventually fill itself. Thus, every emotion must, as well, be given its due space in life.
