RADIUS Jonathan Hassell, 2003 RADIUS, or Remote Authentication Dial-In User Service, is a widely deployed protocol that enables companies to authenticate, authorize and account for remote users who want access to a system or service from a central network server. RADIUS provides a complete, detailed guide to the underpinnings of the RADIUS protocol. Author Jonathan Hassell brings practical suggestions and advice for implementing RADIUS and provides instructions for using an open-source variation called FreeRADIUS

Ann Hamilton: Sense Ann Hamilton, 2023-02-14 Ann Hamilton believes that projects can be considered, not as artifacts or something to be documented, but as their own material object? in this case, a book. While 'Sense' contains images that Hamilton has accumulated over many years, of people and of objects that conflate touch, light, and surface, the book also becomes an object in hand, a thing felt, an artwork in itself. Mallarmé begins 'The Book: Spiritual Instrument' with, 'Everything in the world exists to end up as a book.' While working on the building-wide project, the common SENSE with Sylvia Wolf, this idea inspired Hamilton: '...maybe the form of the project is not the installation or the exhibition or all the weeks of time and programming? ...maybe the actual form of the project is a book? ...and the installation is the work and the process for generating the book's questions and materials.'

Debi Cornwall: Necessary Fictions, 2020-10-20 From the author of *Welcome to Camp America*, an eerie exploration of America's performance of power and identity in the post-9/11 era What are the stories we tell ourselves, the games we play, to manage unsettling realities? Made on ten military bases across the United States since 2016, *Necessary Fictions* documents mock-village landscapes in the fictional country of Atropia and its denizens, roleplayers who enact versions of their past or future selves in realistic training scenarios. Costumed Afghan and Iraqi civilians, many of whom have fled war, now recreate it in the service of the US military. Real soldiers pose in front of camouflage backdrops, dressed by Hollywood makeup artists in moulage--fake wounds--as they prepare to deploy. Brooklyn-based conceptual documentary artist and former civil rights lawyer Debi Cornwall (born 1973) photographs this meta-reality--the artifice of war--presented in the book with a variety of texts to provoke critical inquiry about America's fantasy industrial complex. The book includes an essay by PEN Award-winning critical theorist Sarah Sentilles.

The Radius of Us Marie Marquardt, 2017-01-17 Told in alternating voices, follows the growing relationship of two teenaged victims of violence who are struggling to overcome trauma and help each other cope.

Rania Matar: She, 2021-11-16 Portraits of American and Middle Eastern young women entering adulthood from Rania Matar, author of *L'Enfant-Femme* As a Lebanese-born American artist and mother, Rania Matar's (born 1964) cross-cultural experiences inform her art. She has dedicated her work to exploring issues of personal and collective identity through photographs of female adolescence and womanhood--both in the United States where she lives, and in the Middle East where she is from. Rania Matar: She focuses on young women in their late teens and early twenties, who are leaving the cocoon of home, entering adulthood and facing a new reality. Depicting women in the United States and the Middle East, this project highlights how female subjectivity develops in parallel forms across cultural lines. Each young woman becomes an active participant in the image-making process, presiding over the environment and making it her own. Matar portrays the raw beauty of her subjects--their age, individuality, physicality and mystery--and photographs them the way she, a woman and a mother, sees them: beautiful, alive.

Radius Yasmin El-Rifae, 2022-10-18 In 2012, the joyful hopes of the democratic Egyptian Revolution were tempered by revelations of mass sexual assault in Tahrir Square in Cairo, the revolution's symbolic birthplace. This is the story of the women and men who formed Opantish - Operation Anti-Sexual Harassment - who deployed hundreds of volunteers, scouts rescue teams, and getaway drivers to intervene in the spiraling cases of sexual violence against women protesters in the square. Organized and led by women during 2012-2013 - the final, chaotic months of Egypt's revolution - teams of volunteers fought their way into circles of men to pull the woman at the center to safety. Often, they risked assault themselves. Journalist Yasmin El-Rifae was one of Opantish's organizers, and this is her evocative, aching account of their work, as they raced to develop new tactics, struggled with a revolution bleeding into counter-revolution, and dealt with the long aftermath of assault and devastation. Told in a daring, hybrid narrative style drawn from years of interviews and her own, intimate experience, it is a story of overlapping circles: the circles of male attackers activists had to break through, the ways sexual violence can be circled off as irrelevant to political struggle, and the endless repetitive loops of living with trauma. Introducing a powerful new voice, a writer whose searchingly beautiful, spare prose cuts to the core of a story ever more urgent and relevant: of women's resistance when all else has failed.

Radius - Reaching Across Different Industries Uncovering Solutions Pejman Ghadimi, 2017-06-24 RADIUS, the sequel to the best selling business book *Third Circle Theory* (which since 2013 has sold well over 300,000 copies worldwide) continues on Secret Entourage's mission to bring meaningful business education to the masses. As more and more people embark on the idea that small business ownership and Entrepreneurship may be the only path of finding monetary and personal success in a very crowded and ever evolving global economy, it only made sense for me to create a powerful blueprint that would highlight all aspects of business mastery. Written from a universal lens, RADIUS helps readers understand the powerful 5 entrepreneurial pillars that every business in every industry worldwide falls under. From the idea phase, to the birth of a product or service, to understanding the revenue model of a business, to the start of the brand which eventually when re-used and recycled can lead to a very robust empire. The 5 pillars of RADIUS are the checkpoints that each and every business has an opportunity to cross but very few do. By understanding the mechanics behind each and every one of them, the reader is able to literally understand how far along their business is and how prepared they are to take the next step. This incredible new system breaks down the processes and most important concepts behind each pillar such as how to ensure you are pursuing the correct idea, how to understand the pricing and revenue models of a business, how to penetrate an audience through the REACH model, and how to recycle resources and customers to create multiple profitable verticals as fast as possible, and many more. All of these concepts are presented in the form of processes that can be universally applied across the spectrum of any business, and at any given time in its life cycle. The entire RADIUS concept was created from 20] years of successful business experiences that I accumulated. RADIUS will break down for you not only all these important business concepts, but also give you an inside look into my very own companies and how I effectively used this very same system to scale my businesses to over 50M in revenue across multiple unrelated industries, which today allow me a chance to manage over a dozen companies without working on any logistical aspects of any of my businesses. I am sure that experiencing the RADIUS model will help you tweak and change every aspect of your business that has been silently keeping you from achieving the greater vision that you once knew was possible. I hope you enjoy the journey, and the learning as much as you will one day enjoy the rewards of your business. A special thank you to Fabio Viviani, world famous chef who gracefully wrote the foreword to RADIUS and to all of you who have helped support Secret Entourage, Third Circle Theory and the idea that the best way to re-balance wealth in the world isn't to redistribute it but rather to create more opportunities for people to create their own.

David Maisel: Proving Ground, 2020-02-18 Aerial and on-site photographs made at a classified military site in the Great Salt Lake Desert by David Maisel, author of *Black Maps* David Maisel's (born 1961) *Proving Ground* comprises aerial and on-site photographs made at Dugway Proving Ground, a classified military site covering nearly 800,000 acres in Utah's Great Salt Lake Desert. A primary mission of Dugway is to develop, test and implement chemical and biological weaponry and defense programs. After more than a decade of inquiry, Maisel was granted access to this facility in order to photograph the terrain, the testing facilities and other aspects of the site. Maisel began by photographing at ground level, focusing on structures related to the testing of chemical warfare dispersal patterns. He then moved to an aerial perspective to create images that resemble large-scale minimalist drawings inscribed on the land. Maisel's work at Dugway also includes photographs of the newly minted WSLAT (Whole System Live Agent Test) facility, which is devoted to identification and neutralization of chemical and biological toxins that can be weaponized by terrorists or rogue nations.

Alison Rossiter: Compendium 1898-1919, 2020-05-19 Alison Rossiter's large-format homage to the sculptural properties of photographic paper This volume documents 12 paper works made from the earliest expired photographic papers in the collection of Nova Scotia-based artist Alison Rossiter (born 1953), created in honor of Anna Atkins, the first person to illustrate a book with photographs. The exact expiration dates of these papers pinpoint their location on a timeline and coexist with events in world history. No matter what the light-sensitive materials have endured through dormant years,

they still respond to chemical development, and the resulting photographic tones are evidence of experience. Physical damage, moisture and mold produce tonal changes when developed. This book, a copublication with the New York Public Library and Yossi Milo, includes all 12 works from the series at actual scale, along with close-up details. The reference dates, which cover world events such as World War II, and art historical references such as Picasso's Blue Period, are included at the back.

Scott B. Davis: Sonora ,2021-12-21 Landscape photography between representation and abstraction: new adventures in print and tonality from scott b. davis Californian photographer scott b. davis' (born 1971) recent work uses combinations of in-camera palladium paper negatives and traditional film-based platinum/palladium prints. The images explore the boundaries of visibility in the darkness and overwhelming light of the Sonoran Desert, creating pictures of landscapes that are both literal and abstract. The light and space found in the open desert are felt in these uniquely rendered images comprised of diptychs, triptychs and occasional works that include as many as 10 or 12 unique images in a series. By using exposure to intense UV light, davis has pioneered a process that captures images invisible to the naked eye, creating prints rich in contrast to push the boundaries of the visible spectrum and the perceptual limits of human vision. His prints invite closer, deeper looking at landscapes that seem familiar to us in the daylight but evolve into something altogether different when rendered as abstract records of place. The aim is not to represent the desert as we think we know it, but to evoke an intimate connection with the desert through new perspectives.

Fractures and Injuries of the Distal Radius and Carpus David J. Slutsky,A. Lee Osterman,2009 Recognized experts from around the world offer guidance on the treatment of distal radius fractures and carpal injuries. Practical and comprehensive, this user-friendly format features practical tips and potential pitfalls to optimize outcomes. The DVD contains videos of 44 techniques.

Jim Isermann: Works 1980-2020 ,2021-06 From functional installations to discrete objects, Jim Isermann has chronicled the conflation of postwar industrial design and fine art through popular culture A comprehensive monograph spanning the 40-year career of Palm Springs-based artist Jim Isermann (born 1955), this title shows the artist's first 20 years of extensive, chronological research of postwar art and design filtered through popular culture and consumerism, followed by 20 years of site-specific public projects and a studio practice of labor-intensive painting, sculpture and the occasional product design project. In 1980, there were no guidebooks to California design or what we now call Midcentury Modern. Isermann constructed his own timeline, object by object, from thrift stores, flea markets and swap meets, making bodies of work that included latch hook rugs paired with painting, stained glass window panels and handsewn fabric wall hangings. By 1999, Isermann had his first computer, and so began the second 20 years of his career, with complex digitally designed patterns that found their form in commercially manufactured modules. Isermann continues to be inspired by the unpredictable, serendipitous moments that breathe life into his work.

American Geography Sandra S. Phillips,Sally Martin Katz,2021-05-25 Drawing from the vast photography collection at the San Francisco Museum of Modern Art, American Geography charts a visual history of land use in the United States From the earliest photographic records of human habitation to the latest aerial and digital pictures, from almost uninhabited desert and isolated mountainous territories to suburban sprawl and densely populated cities, this compilation offers an increasingly nuanced perspective on the American landscape. Divided by region, these photographs address ways in which different histories and traditions of land use have given rise to different cultural transitions: from the Midwestern prairies and agricultural traditions of the South, to the riverine systems in the Northeast, and the environmental challenges and riches of the far West. American Geography also looks at the evidence of older habitation from the adobe dwellings and ancient cultures of the Southwest to the Midwestern mounds, many of them prehistoric. SFMOMA's last photography exhibition to consider land use, Crossing the Frontier (1996), examined only the American West. At the time, this focus offered a different way to think about landscape, and a useful way to reconsider pictures of the region. American Geography expands upon the groundwork laid by Crossing the Frontier, providing a complex, thought-provoking survey. Photographers include: Carleton E. Watkins, Barbara Bosworth, Lee Friedlander, Stephen Shore, Debbie Fleming Caffery, Mitch Epstein, An-My Lê, William Eggleston, Alec Soth, Mishka Henner, Trevor Paglen, Victoria Sambunaris, Emmet Gowin, Robert Adams, Terry Evans, Dorothea Lange and Mark Ruwedel, among others.

LAND/ART New Mexico ,2009 Introduction by Bill Gilbert, Kathleen Shields. Text by Lucy Lippard, William L. Fox.

The Joint Spectral Radius Raphaël Jungers,2009-05-15 This monograph is based on the Ph.D. Thesis of the author [58]. Its goal is twofold: First, it presents most researchwork that has been done during his Ph.D., or at least the part of the work that is related with the joint spectral radius. This work was concerned with theoretical developments (part I) as well as the study of some applications (part II). As a second goal, it was the author's feeling that a survey on the state of the art on the joint spectral radius was really missing in the literature, so that the first two chapters of part I present such a survey. The other chapters mainly report personal research, except Chapter 5 which presents an important application of the joint spectral radius: the continuity of wavelet functions. The first part of this monograph is dedicated to theoretical results. The first two chapters present the above mentioned survey on the joint spectral radius. Its minimum-growth counterpart, the joint spectral subradius, is also considered. The next two chapters point out two specific theoretical topics, that are important in practical applications: the particular case of nonnegative matrices, and the Finiteness Property. The second part considers applications involving the joint spectral radius.

Brad Temkin: The State of Water ,2019-05-21 Chicago photographer Brad Temkin (born 1956) brings attention to the visual and ecological beauty of the transformation of water, by showing the structures and processes that most people do not even think about. Most storm water runoff is considered waste, yet more than 700 cities reclaim and reuse wastewater and storm water with combined sewer systems, recycling it for agricultural uses and even drinking water. As we mimic nature and separate the impurities like sludge, salt or chemicals, a transformation occurs. Temkin believes it matters less what each structure really is used for, or whether the water pictured is pure or waste. He is drawn to the strangeness of these forms and the distorted sense of scale. Moving beyond mere description, he embraces the abstract and surreal landscape of water transformation. Temkin has received a Guggenheim Fellowship for his work, which is collected in museums throughout the United States.

Expired Paper ,2017 Divided into sections that represent the breadth of Alison Rossiter's (born 1953) process and vision, 'Expired Paper' offers a comprehensive look at the artist's body of cameraless photo-art?Latent, Landscapes, Pools, Pours, Dips, Blurs, Fours and Collages. Art critic Leah Ollman has been contemplating Rossiter's work for years, and her accompanying text serves as an ideal complement to the images: 'All of the works pay homage to the rich idiosyncrasies of photographic papers across history, and restore a sanctity to the photograph as object. Made without cameras, lenses or film, the works are nothing but process and materiality.' The book also includes a selection of early 20th-century photographic paper packages (which the artist has collected for over 10 years) in a separate booklet.

Transcendental Concord ,2018 Transcendental Concord documents the spirit of Transcendentalism, the literary, social, and philosophical movement that arose in the mid-19th century. While the circle of Transcendentalists in New England was wide, at its center was a core group that lived in Concord, Massachusetts. Bronson Alcott and daughter Louisa May Alcott, Ralph Waldo Emerson, Nathaniel Hawthorne, and Henry David Thoreau lived within a few miles of each other for nearly 20 years, regularly meeting in each other's homes and on the paths of Walden Woods to discuss their writings and beliefs. In the course of a year and in every season North-Carolina based photographer Lisa McCarty photographed the sites where these Transcendentalists lived and wrote in Concord. McCarty's parallel reverence for the natural world is evident in her photographs which point to large and small variations in environment, season and light. McCarty uses long exposures and camera movement in order to capture these variations. Transcendental Concord pays homage to Transcendentalism not only in capturing a shared landscape, but in McCarty's technique: her keen observation of natural phenomena and openness to experimentation and chance.

How to be a Champion Every Day Joe Theismann,2020-06-16 Overachiever Joe Theismann had reached the pinnacle of success as an elite NFL quarterback, with a Super Bowl victory and NFL MVP award. But the memory that sticks with many fans is the gruesome injury—his leg was shattered on Monday Night Football—that ended his career. The end of his days on the gridiron wasn't the end of life for Theismann, though. In How to Be a Champion Every Day, Theismann recounts stories from his impressive career, providing an inspirational guide for how to succeed on a team, in your career, and in your everyday life. Theismann draws on the people who have inspired and motivated him over the years, like head coach Ron Rivera, San Francisco 49ers safety Ronnie Lott, and his own mother. These amazing stories all emphasize a simple yet profound message that with hard work,

focus, and belief in yourself, you can achieve greatness. Organized by themes such as Attitude, Teamwork, and Motivation, Theismann’s wise anecdotes highlight his firm belief that positive-thinking, goal-oriented people can achieve anything they set their minds to. See how Theismann’s advice can change your life.

Distal Radius Fractures Leiv M. Hove,Tommy Lindau,Per Hølmer,2014-07-14 This textbook aims to provide the reader with a complete understanding of distal radius fractures, their inherent problems, and how to manage them successfully. It is written by widely published experts from a part of the globe where distal radius fractures are very common, especially during the winter months. Clear guidance is provided on diagnostic imaging, classification, and assessment of fracture instability. The complete spectrum of operative and nonoperative treatment options are then clearly explained with the aid of step-by-step illustrations. Extensive information is also provided on complications and their treatment. Both students and experienced practitioners will find this book to be an enlightening, practice-oriented reference on the management of these challenging fractures.
