Affective Health and Masculinities in South Africa Hans Reihling,2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health

problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Artists Re:thinking the Blockchain Ruth Catlow, Marc Garrett, Nathan Jones, Sam Skinner, 2017 Artists Re:Thinking the Blockchain is the first book of its kind, intersecting artistic, speculative, conceptual and technical engagements with the the technology heralded as 2the new internet3. The book features a range of newly commissioned essays, fictions, illustration and art documentation exploring what the blockchain should and could mean for our collective futures. Imagined as a future-artefact of a time before the blockchain changed the world,

and a protocol by which a community of thinkers can transform what that future might be, *Artists Re:Thinking The Blockchain* acts as a gathering and focusing of contemporary ideas surrounding this still largely mythical technology. The full colour printed first edition includes DOCUMENTATION of artistic projects engaged in the blockchain, including key works *Plantoid*, *Terra0* and *Bittercoin*, THEORISATION of key areas in the global blockchain conversation by writers such as Hito Steyerl, Rachel O'Dwyer, Rob Myers, Ben Vickers and Holly Herndon, and NEW POETRY, ILLUSTRATION and SPECULATIVE FICTION by Theodorios Chiotis, Cecilia Wee, Juhee Hahm and many more. It is edited by Ruth Catlow, Marc Garrett, Nathan Jones and Sam Skinner. Along with a print edition, *Artists Re:Thinking the Blockchain* includes a web-based project in partnership with Design Informatics at University of Edinburgh: Finbook is an interface where readers and bots can trade on the value of chapters included in the book. As such it imagines a new regime for cultural value under blockchain conditions. This book and surrounding events is produced in collaboration between Torque and Furtherfield, connecting Furtherfield's Art Data Money project with Torque's experimental publishing programme. It is supported by an Arts Council England Grants for the Arts, Foundation for Art and Creative Technology and through the State Machines project by the Creative Europe Programme of the European Union.

Focke-Wulf Fw 190 "long Nose" Dietmar Harmann, 2003 This book covers the complete development history of those variants of the Focke-Wulf Fw 190 powered by inline engines. The first Fw 190 equipped with a Daimler Benz liquid-cooled engine took to the air in early 1942, followed six months later by another powered by a Jumo 213. Production of the Fw 190 C, Fw 190 D and Ta 153 was delayed by the German air ministry. Not until 1944, by which time Germany had lost control of the air, did the Fw 190 D-9, an interim fighter powered by the Jumo 213 A, enter production. The Fw 190 D-9 proved an immediate success, largely due to an excellent prototype test program under Dipl. Ing. Hans Sander. The type quickly entered service with the Luftwaffe and more than 1,700 examples were completed by the end of the war. The Fw 190 D-9 gave rise to a number of improved variants with the more powerful Jumo 213 F engine and a heavier armament, however only a handful of the D-11 and D-13 versions were completed. With a maximum speed of 750 km/h, the Fw 190 D-12 powered by the new Jumo 213 EB would have represented the apex of Fw 190 development. The proposed Fw 190 D-14 and D-15, both powered by improved versions of the dive-bombers 603, came too late to see service with the Luftwaffe.

The Numinous Legacy Adair Butchins,2002 Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha
