Registry of Toxic Effects of Chemical Substances: A-G Doris V. Sweet,1986

Registry of Toxic Effects of Chemical Substances (RTECS) National Institute for Occupational Safety and Health,1997

Registry of Toxic Effects of Chemical Substances Doris V. Sweet,1993 Describes the types of data, and their format, in the 1993 edition of RTECS. Includes detailed file description: computer tape, on-line and CD-ROM.

The database has expanded to include primary skin and eye irritation, mutagenic effects, reproductive effects, tumorigenic effects, and acute toxicity data. A most important recent addition is other toxic effects data from multiple dose studies.

Global Perspectives in Ocular Oncology Bhavna V. Chawla,Mary E. Aronow,2023-01-03 Eye cancers vary in presentation depending upon geographic location and access to healthcare. Global Perspectives in Ocular Oncology offers an international platform for leading ocular oncologists and multidisciplinary specialists to highlight worldwide strengths and solutions to the challenges in treating eye cancer. The goal of the book is to provide a universal view on the management of adult and pediatric tumors affecting the eye and ocular adnexa. A range of topics pertinent to the global community have been included. Organized into seven distinct sections, this book covers international collaborations and initiatives, technology and innovations, and novel treatment strategies. In addition, it provides a glimpse into the future of the specialty. The emphasis on sharing perspectives as well as the global and multidisciplinary framework of the book are unique to the market. This work will appeal to a variety of audiences including ocular oncologists and ophthalmic subspecialists, oncologists and other specialists, optometrists, geneticists, allied medical professionals, and trainees entering these disciplines.

Operating Room Leadership and Perioperative Practice Management Alan David Kaye,Richard D. Urman,Charles J. Fox, III,2018-12-06 Effective leadership is critical to ensuring safety, efficiency and maximum productivity in the operating room (OR). This practical, evidence-based book unpicks the dynamics of a successful OR environment to underline the key techniques for management of policies, systems, staff members and teams. Fully updated to include recent clinical guidelines, the book provides the 'A-Z' of OR management, including sections on metrics, scheduling, human resource management, leadership principles, economics, quality assurance, recovery and ambulatory practice. New chapters include future healthcare models, emergency preparedness and budgets amongst other topics. Written by authors with unrivalled experience in the field, chapters are laid out in an easy and clinically helpful format to assist learning, and real-life case studies cover seventy-three different clinically relevant pain topics. This book is an essential guide for anyone working in the OR including anaesthesiologists, surgeons, nurses, and administrators.

Registries for Evaluating Patient Outcomes Agency for Healthcare Research and Quality/AHRQ,2014-04-01 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

Integrating Behavioral Health and Primary Care Dr. Robert Feinstein,Dr. Joseph Connelly,Marilyn Feinstein,2017-04-13 Integrated care incorporates behavioral and physical health services into primary care and specialty medical environments. Integrated care models are patient-centered; delivered by teams of medical professionals, utilize care coordination, and a population-based approach. This book is practical, office-based, and comfortably accessible to students, residents, faculty, and all mental health professionals, primary care and medical specialists. We examine and recommend applying collaborative care and other existing models of integrated care based on existing literature. When there is no literature supporting a specific approach, our experts offer their ideas and take an aspirational approach about how to manage and treat specific behavioral disorder or problems We assume the use of integrated team staffing including a primary care or specialist provider(s), front desk staff, medical assistant(s), nurse(s), nurse practitioners, behavioral health specialist(s), health coaches, consulting psychiatrist, and care coordinator(s)/manager(s).

Intelligent Patient Management Sally McClean,Peter Millard,Elia El-Darzi,Chris D. Nugent,2009-03-04 Arguably medicine is either an arts-based science or a science-based art. In medieval times, clinical decisions were based on simple measures, such as the temperature of the body, the rhythm of the pulse, the consistency of the stool and the colour of the urine. Nowadays, thanks partly to modern technology, medical science has improved in many ways, as has healthcare. In particular, approaches which have their origins in Artificial Intelligence and Operational Research have a significant contribution to make in terms of improving not only diagnosis and treatment of patients, but also providing ways of managing patients in a more effective, more efficient, and more patient-friendly manner. This book focuses on the use of such Intelligent Patient Management to the benefit of clinicians, other healthcare and community practitioners and managers, patients and carers.

Human Activity Recognition and Behaviour Analysis Liming Chen,Chris D. Nugent,2019-06-11 The book first defines the problems, various concepts and notions related to activity recognition, and introduces the

fundamental rationale and state-of-the-art methodologies and approaches. It then describes the use of artificial intelligence techniques and advanced knowledge technologies for the modelling and lifecycle analysis of human activities and behaviours based on real-time sensing observations from sensor networks and the Internet of Things. It also covers inference and decision-support methods and mechanisms, as well as personalization and adaptation techniques, which are required for emerging smart human-machine pervasive systems, such as self-management and assistive technologies in smart healthcare. Each chapter includes theoretical background, technological underpinnings and practical implementation, and step-by-step information on how to address and solve specific problems in topical areas. This monograph can be used as a textbook for postgraduate and PhD students on courses such as computer systems, pervasive computing, data analytics and digital health. It is also a valuable research reference resource for postdoctoral candidates and academics in relevant research and application domains, such as data analytics, smart cities, smart energy, and smart healthcare, to name but a few. Moreover, it offers smart technology and application developers practical insights into the use of activity recognition and behaviour analysis in state-of-the-art cyber-physical systems. Lastly, it provides healthcare solution developers and providers with information about the opportunities and possible innovative solutions for personalized healthcare and stratified medicine.
