Thirty new lessons and new and revised chapters shine a light on children's thinking, curiosity, and questions. Steph and Anne tackle close reading, close listening, text complexity, and critical thinking in a new chapter on building knowledge through thinking-intensive reading and learning. The new edition is organized around three sections: Part I provides readers with a solid introduction to reading comprehension instruction, including the principles that guide practice, suggestions for text selection, and a review of recent research that underlies comprehension instruction. Part II contains lessons to put these principles into practice for all areas of reading comprehension. Part III shows you how to integrate comprehension instruction across the curriculum and the school day, particularly in science and social studies. Updated bibliographies, including the popular Great Books for Teaching Content, are accessible online. Learning Stories Margaret Carr,Wendy Lee,2012-03-19 Margaret Carr's seminal work on Learning Stories was first published by SAGE in 2001, and this widely acclaimed approach to assessment has since gained a huge international following. In this new full-colour book, the authors outline the philosophy behind Learning Stories and refer to the latest findings from the research projects they have led with teachers on learning dispositions and learning power, to argue that Learning Stories can construct learner identities in early childhood settings and schools. By making the connection between sociocultural approaches to pedagogy and assessment, and narrative inquiry, this book contextualizes Learning Stories as a philosophical approach to education, learning and pedagogy. Chapters explore how Learning Stories: - help make connections with families - support the inclusion of children and family voices - tell us stories about babies - allow children to dictate their own stories - can be used to revisit children's learning journeys - can contribute to teaching and learning wisdom This ground-breaking book expands on the concept of Learning Stories and includes examples from practice in both New Zealand and the UK. It outlines the philosophy behind this pedagogical tool for documenting how learning identities are constructed and shows, through research evidence, why the early years is such a critical time in the formation of learning dispositions. Margaret Carr is a Professor of Education at the University of Waikato, New Zealand. Wendy Lee is Director of the Educational Leadership Project, New Zealand.
