Pluto Rocket: Joe Pidge Flips a Lid (Pluto Rocket #2) Paul Gilligan, 2023-10-24 Pluto Rocket and Joe Pidge are back, with more hats and hijinks than ever before, in the second book of this hilarious new early graphic novel series, for fans of Narwhal and Jelly and Pizza and Taco! Joe Pidge, king of the neighborhood, and Pluto Rocket, an alien who's new in town, have become fast friends, with Joe acting as Pluto's guide on her secret mission to discover what life in the neighborhood is really like. But on Joe's tour (where he shows Pluto the best fire escape and the best garbage can in the world!), it becomes clear that Joe has never actually left his tiny slice of the planet . . . Pluto encourages Joe to get out of his comfort zone, but Joe delays by creating an outlandish list of supplies they'll need to get before they go! Is Joe Pidge afraid of leaving his safe little neighborhood? And if that's tough, imagine how Joe feels when his hat, his trademark super-flavio look that helps him stand out from the other pigeons, goes missing. Thankfully, Pluto is here to help save the day in the second book of this hilarious graphic novel series from Paul Gilligan, creator of the syndicated comic strip Pooch Cafe!

Spaceport Earth Joe Pappalardo, 2019-03-26 “Tackles the ever-changing, twenty-first-century

space industry and what privately funded projects like Elon Musk's SpaceX mean for the future of space travel." —Foreign Policy Creating a seismic shift in today's space industry, private sector companies including Elon Musk's SpaceX and Jeff Bezos's Blue Origin are building a dizzying array of new spacecraft and rockets, not just for government use, but for any paying customer. At the heart of this space revolution are spaceports, the center and literal launching pads of spaceflight. Spaceports cost hundreds of millions of dollars, face extreme competition, and host operations that do not tolerate failures—which can often be fatal. Aerospace journalist Joe Pappalardo has witnessed space rocket launches around the world, from the jungle of French Guiana to the coastline of California. In his comprehensive work *Spaceport Earth*, Pappalardo describes the rise of private companies and how they are reshaping the way the world is using space for industry and science. *Spaceport Earth* is a travelogue through modern space history as it is being made, offering space enthusiasts, futurists, and technology buffs a close perspective of rockets and launch sites, and chronicling the stories of industrial titans, engineers, government officials, billionaires, schemers, and politicians who are

redefining what it means for humans to be a spacefaring species. “Private companies and rich people like Elon Musk and Jeff Bezos have taken over the exploration of space. Pappalardo explores this new sort of spacefaring at the outer reaches of business and technology.” –The New York Times “For anyone obsessed with how spaceflight grew into what it is today, this book is a must-have.” –Popular Mechanics

Space Oddities Joe Cuhaj, 2022-08-15 Nothing captivates the human imagination like the vast unknowns of space. Ancient petroglyphs present renderings of the heavens, proof that we have been gazing up at the stars with wonder for thousands of years. Since then, mankind has systematically expanded our cosmic possibilities. What were once flights of fancy and dreams of science fiction writers have become nearly routine – a continuous human presence orbiting the Earth, probes flying

beyond our solar system, and men walking on the moon. NASA and the Russian space program make traveling to the stars look easy, but it has been far from that. Space travel is a sometimes heroic, sometimes humorous, and always dangerous journey fraught with perils around every corner that most of us have never heard of or have long since forgotten. Space Oddities brings these unknown, offbeat, and obscure stories of space to life. From the showmanship and bravado of the earliest known space fatality, German Max Valier, to the first ever indictment under the Espionage Act on an Army officer who leaked secrets concerning the development of early U.S. rockets; and the story of a single loose bolt that defeated the Soviet Union's attempt to beat America to the moon. Author Joe Cuhaj also sheds light on the human aspects of space travel that have remained industry secrets – until now: how the tradition of using a musical playlist to wake astronauts up began, fascinating tales about inventions like the Fischer Space Pen, Omega watches, and even Tang breakfast drink. In addition to fun and entertaining space trivia, Space Oddities also features stories of the profound impact that space travel has had on challenges right here at home, like the effort by civil rights leaders and activists in the

1960s to bring the money from the space program back home to those in need on Earth; NASA's FLATs (First Lady Astronaut Training) program and the 13 women who were selected to become astronauts in 1960, but were denied a chance at flying even after successfully completing the rigorous astronaut training program; and, the animals who many times sacrificed their lives to prove that man could fly in space. Filled with rare and little-known stories, *Space Oddities* will bring the final frontier to the homes of diehard space readers and armchair astronauts alike.
