*The Soul Saver* Dineen Miller, 2020-08-12 ♦♦♦ACFW Carol Award Winner♦♦♦When Trusting God Is the Only Way Out On an average day, God jump-started her missions in her sculpting studio, revealing the face of the person she would soon meet at the grocery store, bank, or playground. The goal was always the same. Reach the lost, bring someone back to God, restore hope. But then came the tough missions-the ones that thrust Lexie Baltimore into real battle. And she had a few scars to show for it. Tormented that she can't reach the one person she loves the most-staunch atheist and husband Hugh-Lexie finds her own hope waning when the battle comes to her doorstep in the shape of a pastor who represents everything she wants and everything her husband is not-a godly man. Then false accusations and rumors spin her husband and family into a precarious position, and the only way out is to trust God. But how can she convince her husband when she's struggling to trust God herself? This time Lexie is the mission.

**The Time-Saver's Workout** John Little, 2019-04-09 There is something terribly wrong with the state of exercise as we know it presently. Sales of treadmills, running shoes, gym memberships, and yoga classes are at an all-time high, but so too are our national levels of obesity and type II diabetes. Ever since the 1960s the exercising public has been told to stretch for flexibility and to perform low-intensity steady-state aerobic exercise for their cardiovascular systems and some form of resistance training to keep their muscles strong. With regard

to diet, they have been told to restrict or omit macronutrients such as fats and carbohydrates and lots of other advice with regard to calorie-counting. Could it be that this information, however well intended, was mistaken? And is it really necessary to devote so much time to the pursuit? Fitness researcher and pioneer John Little has spent more than twelve years researching the actual science underpinning our most prevalent beliefs about exercise and has come away from the enterprise convinced that we need an entirely new paradigm, one that would involve reliance on briefer workouts. He presents this revolutionary new approach in *The Time-Saver's Workout*. Among the fascinating revelations presented in this book: • Certain types of exercise can actually make you less healthy and fatter. • Taking large doses of food supplements might actually shorten your life and put you at greater risk for disease. • Stretching to become more flexible or to recover quicker from injury has been found to do neither of these things. • Resistance training, once considered to be the weak sister of exercise, is now looking like the best form of exercise one should engage in. The new protocols that Little exposes offer a far safer alternative for those looking to become stronger, fitter, and healthier without spending their lives in the gym.

The Seed Garden Lee Buttala, Shanyyn Siegel, 2015-05-04 Winner of the American Horticultural Society Award for Excellence In Garden Book Publishing Winner of the Silver Medal for Best Reference from the Garden Writer's Association Filled with advice for the home gardener and the more seasoned horticulturist alike, *The Seed Garden: The Art and Practice of Seed Saving* provides

straightforward instruction on collecting seed that is true-to-type and ready for sowing in next year's garden. In this comprehensive book, Seed Savers Exchange, one of the foremost American authorities on the subject, and the Organic Seed Alliance bring together decades of knowledge to demystify the time-honored tradition of saving the seed of more than seventy-five coveted vegetable and herb crops—from heirloom tomatoes and long-favored varieties of beans, lettuces, and cabbages to centuries-old varieties of peppers and grains. With clear instructions, lush photographs, and easy-to-comprehend profiles on individual vegetable crops, this book not only teaches us how to go about conserving these important varieties for future generations and for planting out in next year's garden, it also provides a deeper understanding of the importance of saving these genetically valuable varieties of vegetables that have evolved over the centuries through careful selection by farmers and home gardeners. Through simple lessons and master classes on crop selection, pollination, roguing, and the processes of harvesting and storing seeds, this book ensures that these time-honored traditions can continue. Many of these vegetable varieties are treasured for traits that are singular to their strain, whether that is a resistance to disease, an ability to grow well in a region for which that crop is not typically well suited, resistance to early bolting, or simply because it is a great-tasting variety. In an age of genetically modified crops and hybrid seed, a growing appreciation for saving seeds of these time-tested, open-pollinated cultivars has found a new audience from home vegetable gardeners and cooks to restaurant chefs and local farmers. Whether interested in simply saving seeds for home use or working to conserve rare varieties of beloved squashes and tomatoes, this book provides a deeper understanding of the art, the science, and the joy of saving seeds.

When Clare and her brother discover the truth about food, they set off on a journey to find a place where gardens still exist.

*Transform Tomorrow* Stig Nybo, 2013-01-17 A campaign to prepare Americans for their futures Transform Tomorrow investigates why so many Americans are at risk of out-living their savings. Author Stig Nybo draws inspiration from successful behavior change campaigns to identify the drivers of change—context and beliefs—and how they can be successfully employed to boost retirement savings rates. While the retirement savings industry increasingly embraces the contextual drivers of behavior, very little is being done to shape our beliefs to start saving smarter and sooner. Nybo suggests a retirement readiness campaign to inspire and enlist the support of individuals, employers, industry, government, and the media. Explains how society can transition from treating 401(k) as a voluntary benefit to the basis upon which each individual who wants to or needs to can retire comfortably. Details a national, coordinated retirement readiness campaign, along the lines of successful Public Service Advertisements—like The Crying Indian and Rosie the Riveter—that will help change behavior and re-shape the culture of our nation Makes a call to action for such a campaign Retirement in America is endangered, but Transform Tomorrow shows a path back from the brink.

**Gathering** Diane Ott Whealy,2011 Presents the biography of the conservationist who began the Seed Savers Exchange with her ex-husband in order to save seeds passed down through generations and maintain horticultural diversity.

Darry the Life Saver Frank V Webster,2021-03-22 Book Excerpt: en he saw several men carried in, whom he recognized as some of the sailors of the ill-fated brigantine.Eagerly he watched and prayed that his good friend the captain might be one of those who had been snatched from a watery grave; but as time passed this hope gradually

became fainter. The lifeboat had managed to return from the wreck, to report that not a living soul remained aboard; and that the seas were so tremendous that even had it been otherwise there would have been small chance of saving them, since it was next to impossible to approach close to the vessel. How the boy, lying there, looked with almost reverence upon those stalwart fellows who were risking their lives in the effort to save their fellow men. Darry would never forget that hour. The impressions he received then would remain with him through life; and in his eyes the calling of a life saver must always be reckoned the noblest vocation to which a young man could pledge himself.
