31 Murders Alvin A.J. Esau, 2024-02-28 Many decades before Ted Bundy roamed the country there was serial killer Earle Nelson. During the 1920s, this geographically mobile killer went from city to city. His modus operandi involved getting into a house by pretending to be a person looking for a room to rent or inspecting a house that was for sale, and then strangling the landlady, often followed by having sex with the dead body. Robbery was frequently a secondary motive. After Nelson was captured in Canada in 1927, it was commonly reported that he had killed 21 women and a baby during the 1926-27 period. But were these the only cases linked to him? The author examines an additional nine unsolved murders of landladies, two of which have never been dealt with in previous literature. Based on decades of archival research, the author examines all 31 murders, relying on primary sources when available and a wide variety of secondary sources. For each murder, the book provides biographical sketches of the victim, outlines the police investigation and the various suspects, and covers any subsequent attempts to link Nelson to the crime by identification evidence of witnesses or by fingerprints.

China in Oceania Terence Wesley-Smith, Edgar A. Porter, 2010-03-01 It is important to see China's activities in the Pacific Islands, not just in terms of a specific set of interests, but in the context of Beijing's recent efforts to develop a comprehensive and global foreign policy. China's policy towards Oceania is part of a much larger outreach to the developing world, a major work in progress that involves similar initiatives in Asia, Africa, Latin America, and the Middle East. This groundbreaking study of China's "soft power" initiatives in these countries offers, for the first time, the diverse perspectives of

scholars and diplomats from Oceania, North American, China, and Japan. It explores such issues as regional competition for diplomatic and economic ties between Taiwan and China, the role of overseas Chinese in developing these relationships, and various analyses of the benefits and drawbacks of China's growing presence in Oceania. In addition, the reader obtains a rare review of the Japanese response to China's role in Oceania, presented by Japan's leading scholar of the Pacific region.

Assessing Learners Online Albert Oosterhof, Rita-Marie Conrad, Donald P. Ely, 2008 Online assessment and, more broadly, the entire online learning environment provides expanded opportunities to actively and creatively engage the learner. The approach the authors have taken in this book is to work from the established fundamentals of assessment, applying these principles to the online environment. The authors emphasize basic issues of assessment such as establishing the evidence of validity for assessments, but the context of the discussion is always that of an online environment. Written by leading technology experts, this clear and practical text serves as a training guide for assessing online or distance learners. Readers learn how to select what should be assessed, how to use written

tests and projects to evaluate the skills learners have achieved, how to provide feedback to learners, and how to efficiently use course management software. The authors believe educators involved with online training and education must have the same assessment expectations and standards as those in conventional, face-to-face environments. This book is appropriate for instructional designers and educators involved with online training and education as well as for college courses concerned with the design and delivery of distance or other forms of online instruction. It also has utility as a personal reference for instructors of courses that assess students online.

Politics and State Building in Solomon Islands Sinclair Dinnen, Stewart Firth, 2008-05-01 Politics and State Building in Solomon Islands examines a crisis moment in recent Solomon Islands history. Contributors examine what happened when unrest engulfed the capital of the small Melanesian country in the aftermath of the 2006 national elections, and consider what these events show about the Solomon Islands political system, the influence of Asian interests in business and politics, and why the crisis is best understood in the context of the country's volatile blend of traditional and modern politics. Until the disturbances of April 2006 and subsequent deterioration in bilateral relations between Australia and Solomon Islands under the Sogavare government, experts had hailed the Regional Assistance Mission to Solomon Islands (RAMSI) as an unqualified success. Some saw it as a model for 'cooperative intervention' in 'failing states' worldwide. Following these developments success seems less certain and aspects of the RAMSI model appear flawed. Using the case of Solomon Islands, this book raises fundamental questions about the nature of 'cooperative intervention' as a vehicle for state building, asking whether it should be construed as a mainly technical endeavour or whether it is unavoidably a political undertaking with political consequences. Providing a critical but balanced analysis, Politics and State Building in Solomon Islands

has important implications for the wider debate about international state-building interventions in 'failed' and 'failing' states.

The Public Value of the Humanities Jonathan Bate, 2011-01-27 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. Recession is a time for asking

fundamental questions about value. At a time when governments are being forced to make swingeing savings in public expenditure, why should they continue to invest public money funding research into ancient Greek tragedy, literary value, philosophical conundrums or the aesthetics of design? Does such research deliver 'value for money' and 'public benefit'? Such questions have become especially pertinent in the UK in recent years, in the context of the drive by government to instrumentalize research across the disciplines and the prominence of discussions about 'economic impact' and 'knowledge transfer'. In this book a group of distinguished humanities researchers, all working in Britain, but publishing research of international importance, reflect on the public value of their discipline, using particular research projects as case-studies. Their essays are passionate, sometimes polemical, often witty and consistently thought-provoking, covering a range of humanities disciplines from theology to architecture and from media studies to anthropology.

Policy Analysis in South Korea T.J. Lah, Thomas R. Klassen, 2023-02-14 The industrialisation and modernisation in South Korea that followed the Second World War resulted in rapid progress in economic development, public administration, social service provision and the establishment of modern public policy. Bringing together outstanding researchers, this book is the first to examine the theory and practice of policy analysis in South Korea. The volume explores the historical development of policy analysis, and procedures for decision making at different levels of government. Drawing on case studies, contributors consider the issues and players that affect executive and legislative branch policy analysis, as well as policy design and analysis in the public arena and the shifting role of policy and research institutes, think tanks and post-secondary institutions.

Global Climate Change and U.S. Law Michael Gerrard,2007 This comprehensive, current examination of U.S. law as it relates to global climate change begins with a summary of the factual and scientific background of climate change based on governmental statistics and other official sources. Subsequent chapters address the international and national frameworks of climate change law, including the Kyoto Protocol, state programs affected in the absence of a mandatory federal program, issues of disclosure and corporate governance, and the insurance industry. Also covered are the legal aspects of other efforts, including voluntary programs, emissions trading programs, and carbon sequestration.

Building a New Economy D. Hugh Whittaker,2024-01-23 Japan is attempting to build a new economy. It goes by various

names, such as 'Society 5.0', 'sustainable capitalism', and 'new form of capitalism'. It is to be constructed through digital and green transformation, and a 'virtuous cycle of growth and distribution'. The effort faces strong headwinds, including demographic decline and ageing, Japan's external energy dependence and geopolitical turbulence, and the legacies of Japan's 'lost decades'. Nonetheless, since 2015 a path has been identified that steers between Big Tech market oligopoly on the one hand, and an overbearing state on the other. For others facing the same post-neoliberal, sustainability transformation challenges as Japan, this public-private coordinated building effort is noteworthy. Building a New Economy uses an evolutionary conceptual framework of states-and-markets, organizations-and-technology, and institutional change. It shows how the institutional coherence of the manufacturing-centred postwar model broke down, and was followed by the ideological and institutional dissonance of the 'lost decades'. However, new institutional building blocks have been identified and (partially) assembled which could lead Japan towards a new model which is more open and adaptive. These blocks include a reconfigured developmental state, and new forms of coordination with and within the corporate sector, at times encompassing civil society. Importantly, for a country that has favoured social stability over creative destruction, and has struggled with change, the path forward may require 'controlled dis-equilibrium' of institutions rather than tight coherence. 'Society 5.0' and the 'new form of capitalism' claim to be people-centred; making them so will be the crucial challenge.
