The heavily illustrated text is rigorous yet readable and offers a single, must-have, reference to anyone interested in information design or any of its related disciplines such as interaction design and information architecture, information graphics, document design, universal design, service design, map-making and wayfinding.

American Buffalo Steven Rinella,2008-12-02 From the host of the Travel Channel's "The Wild Within." A hunt for the American buffalo—an adventurous, fascinating examination of an animal that has haunted the American imagination. In 2005, Steven Rinella won a lottery permit to hunt for a wild buffalo, or American bison, in the Alaskan wilderness. Despite the odds—there's only a 2 percent chance of drawing the permit, and fewer than 20 percent of those hunters are successful—Rinella managed to kill a buffalo on a snow-covered mountainside and then raft the meat back to civilization while being trailed by grizzly bears and suffering from hypothermia. Throughout these adventures, Rinella found himself contemplating his own place among the 14,000 years' worth of buffalo hunters in North America, as well as the buffalo's place in the American experience. At the time of the Revolutionary War, North America was home to approximately 40 million buffalo, the largest herd of big mammals on the planet, but by the mid-1890s only a few hundred remained. Now that the buffalo is on the verge of a dramatic ecological recovery across the West, Americans are faced with the challenge of how, and if, we can dare to share our land with a beast that is the embodiment of the American wilderness. American Buffalo is a narrative tale of Rinella's hunt. But beyond that, it is the story of the many ways in which the buffalo has shaped our national identity. Rinella takes us across the continent in search of the buffalo's past, present, and future: to the Bering Land Bridge, where scientists search for buffalo bones amid artifacts of the New World's earliest human inhabitants; to buffalo jumps where Native Americans once ran buffalo over cliffs by the thousands; to the Detroit Carbon works, a "bone charcoal" plant that made fortunes in the late 1800s by turning millions of tons of buffalo bones into bone meal, black dye, and fine china; and even to an abattoir turned fashion mecca in Manhattan's Meatpacking District, where a depressed buffalo named Black Diamond met his fate after serving as the model for the American nickel. Rinella's erudition and exuberance, combined with his gift for storytelling, make him the perfect guide for a book that combines outdoor adventure with a quirky blend of facts and observations about history, biology, and the natural world. Both a captivating narrative and a book of environmental and historical significance, American Buffalo tells us as much about ourselves as Americans as it does about the creature who perhaps best of all embodies the American ethos.

Searching for Icons in Russia Владимир Солоухин,Vladimir Soloukhin,1972

The Search for a Symbol William R. H. Haughton,2022-03-24 "A New Creed" is, by all accounts, a dominant feature of The United Church of Canada. Since its initial writing in 1968, it has come to be a primary symbol of the denomination in the ancient Christian (baptismal) sense of the word and also in the modern. The Search for a Symbol reveals the fascinating and largely untold story of "A New Creed's" origins. It also engages in an unprecedented historical, literary, and theological analysis of the creed's text. This book offers the provocative argument that though "A New Creed" should continue to have a place in the life and liturgy of Canada's largest Protestant church, it does not take full advantage of the possible benefits that can come from healthy practices of creedal confession—namely teaching people about the biblical story of salvation as well as connecting them in relationship with God and one another. For these purposes, the Apostles' and Nicene Creeds are shown to be better confessional options, and readily available ones within The United Church's tradition.

It is packed with exercises and looks at topics like formatting text, drawing and inserting tables and figures, bibliographies and indexes, equations, slides, and provides valuable explanations to error and warning messages so you can get work done with the least time and effort needed.
