Discovery Tools: The Next Generation of Library Research John S.

Spencer, Christopher Millson-Martula, 2016-03-16 Discovery tools are now becoming more common in the academic library landscape, and more products are now available from vendors. While librarians are advocating and promoting their use by students and faculty, they are also evaluating their searching capabilities, their usefulness, and on-going maintenance requirements. This work is geared to librarians considering the implementation of a discovery tool. As a result, it addresses the selection and implementation of such a tool, its relationship to information literacy and catalog maintenance, usability testing, and assessment. Issues such as database and catalog searching and the quality of searching queries are also addressed. A comprehensive review of the literature serves as a valuable resource. Librarians will appreciate the highly practical nature of the volume as it is enriched by a number of varied case studies. This book was published as a special triple issue of *College & Undergraduate Libraries*.

Google Search Secrets Christa Burns, Michael P. Sauers, 2014 Google can be an incredibly powerful tool for research, but the top-of-the-page results are seldom the most beneficial to library users and students, and many of the search engine's most useful features are hidden behind its famously simple interface. Burns and Sauers reveal the secrets of effective Google searches in this invaluable resource showing how to get the most out of the service, with An overview of all the tool's search services, including Image, Maps, News, Blogs, Discussions, Scholar, Patents, and Books Ready-to-use instructions on how to go beyond the simple search box and top results to get library users the answers they need, fast Straightforward guidance on using filters to refine search results, with examples of common searches like images with Creative Commons licenses, news searches set for a date range or into an archive, and videos with closed captioning An explanation of the bibliography manager feature of Google Scholar, which allows students and researchers to build bibliographies with ease Tips for configuring Safe Search on workstations in children's departments and schools Copious screenshots walk readers through each topic step by step, making this a true how-to guide for everyone who uses Google.

Building Research Tools with Google For Dummies Harold Davis, 2005-03-11 Google—a funny name for a fabulous tool. You've already used it to look up all sorts of information on the Web almost instantly. Now what if you could use its amazing abilities to turbo-charge your research on a grand scale? *Building Research Tools With Google For Dummies* can help you do just that. In plain English, it shows you easy ways to: Ask Google exactly what you want to know Determine whether what you need can actually be found through Google, and where to look if the answer is "no" Improve your research results Present your findings in a way that makes sense Write your own specialized search applications—if you want to To get the most from Google, you need to understand Google. *Building Research Tools With Google For Dummies* explains how Google works and how you can build more effective queries (hint: it's a lot more than just using the "Advanced Search" techniques!) It even shows you how to think like a researcher and how to package the results of your research so it means something to your audience. You'll be able to: Understand Google research techniques and use the custom search-related syntax Recognize Google's strengths—and limitations Target your search by

using Google operators Use Google to research photos, or even an entire industry Improve the effectiveness of your results by understanding Google's comparative methodology Build custom tools using WDSL and Web Services You don't have to become a programmer to use Google, but if you know a little about software development and want to explore new, more focused search techniques, Building Research Tools With Google For Dummies has a section just for you. It introduces you to the Google API, shows you how to download a developer key, and leads you through building a C# .Net Google application. On the companion Web site, you'll find the source code and software discussed in the book as well as links to lots of other resources for researchers. Before you know it, you'll be Googling your way to research success!

Libraries and Google William Miller, Rita M. Pellen, 2014-04-23 Discover the benefits—and drawbacks—of Google® Google® has become a nearly omnipresent tool of the Internet, with its potential only now beginning to be realized. How can librarians effectively integrate this powerful search engine to provide service to their patrons? Libraries and Google® presents leading authorities discussing the many possibilities of using Google® products as effective, user-friendly tools in libraries. Google Scholar and Print are extensively explored with an eye toward offering an expanded view of what is and may be possible for the future, with practical insights on how to make the most of the product's capabilities. It seems certain that Google® is here to stay. Libraries and Google® comprehensively examines this “disruptive technology” that is seen as both a threat and an opportunity by both librarians and publishers. Both perspectives are explored in depth, along with practical applications of this and other Google® technology that may be new to librarians. Google® products and other more familiar research tools are compared for effectiveness and ease of use. The various unique needs of users and scholars are detailed and considered as a springboard for insightful discussion of the future role of librarians in today's world. Potential problems are closely examined, such as copyright issues of digitization, and privacy concerns sparked by its collection of personal information about its users. The book comprehensively explores the path libraries need to travel to benefit from the search tool, rather than being overwhelmed and destroyed by it. Topics in Libraries and Google® include: the viewpoint that Google® may make libraries obsolete new opportunities for libraries through using Google® products technical aspects of purchasing and implementing Google® search products with proprietary vendor databases testing the performance of Google Scholar and Print practical use of

Google®'s products personal privacy issues making digitized library resources more accessible digitization of copyrighted materials much, much more! Libraries and Google® is horizon-expanding reading for all librarians, library science educators and students, library administrators, publishers, and university presses. Volume 2 of Libraries and Google® is in preparation. Google® is a Registered Service Mark of Google, Inc., Mountain View, California. Libraries and Google® is an independent publication offered by The Haworth Press, Inc., Binghamton, New York, and is not affiliated with, nor has it been authorized, sponsored, endorsed, licensed, or otherwise approved by, Google, Inc.

Research for Writers David Meade, 2013-07-18 Business owners and writers face a common set of problems – how to research, find and investigate topics that can be written about. The Web is a multi-dimensional repository but it can require specialized tools to locate and develop this information. Public records, vital records, research portals, Freedom of Information documents, guides to investigative work and Internet resources for writers and journalists are scattered in a lot of locations – in fact I have found 157 specific ones! I've written a unique compendium which discusses each site by topic name, description and hyperlink. One reference tool alone can make the difference in success or failure in developing a book, an article or a web page. This is a Writer's Intelligence Guide to Internet Resources. It is equally useful for journalists, reporters, copywriters and business owners. Search engines are acquainted primarily with words. When creating a website, the normal procedure is to search for the best designer and then get a professional website with captivating colors and graphics, but watch out! Do most websites optimize website content? Obviously not, and this is the reason why many businesses fail to reach thousands of their customers. SEO copywriting helps your website rank high on search engines. You can phenomenally improve your web copy to achieve search engine optimization and one of the reasons I wrote this guide is that not only is it my specialty but I wanted to provide a resource for the community at large – a tool that can be downloaded to one's desktop or laptop and be an invaluable assistant to creating and optimizing web content. Brainstorming a book or a web page is the first step in the writing process. A significant amount of the content in my e-Book allows creative thinking to develop into specifics. Research For Writers covers: --Search Engines, Databases & Online Information Collections --A Guide to Web Sites for Researchers --Computer-Assisted Research --Directories, Manuals and Library Reference Materials --A searchable, browsable collection of over 157 Web sites which are instrumental in research --Copywriting Tools --Academic Research Tools --Archival Tools --Library Search Engines --Science and Psychology Search Engines --Business Search Engines --Niche Search Engines --Reference Search Engines Extremely important rules: --Rule # 1: The single biggest mistake searchers make is using the wrong search tool! --Rule # 2: Let other people do as much work for you as possible (use their metaguides and expertise to your advantage)! --Rule # 3: Bookmark, constantly organize your bookmarks as though your life depended on it! --Rule # 4: Use more than one search engine resource – use multiple

resources! --Rule # 5: I've included as a bonus a NSA Guide to the Internet – that's right – a link to a PDF copy of a National Security Agency Guide which was only unclassified this year. It's an invaluable reference tool and is Link # 111. It's a sprawling document, clocking in at over 650 pages, and is the product of many years of research and updating by a NSA information specialist whose name is redacted on the official release. Research For Writers is an important tool that can be downloaded to your desktop or laptop and used in the creative writing process.

An Introduction to Search Engines and Web Navigation Mark Levene, 2011-01-14 This book is a second edition, updated and expanded to explain the technologies that help us find information on the web. Search engines and web navigation tools have become ubiquitous in our day to day use of the web as an information source, a tool for commercial transactions and a social computing tool. Moreover, through the mobile web we have access to the web's services when we are on the move. This book demystifies the tools that we use when interacting with the web, and gives the reader a detailed overview of where we are and where we are going in terms of search engine and web navigation technologies.

Computer Corpora and Open Source Software for Language Learning: Emerging Research and Opportunities Posavec, Kristina, 2020-04-03 During the last four decades, a corpus-based approach to language teaching has become very significant. Direct use of corpora in language pedagogy is limited by certain factors: time, the lecturer's knowledge and skills needed to analyze the corpus, access to sources such as computers and appropriate computer tools, or a combination of these factors. The key to a successful corpus-based approach is in the appropriate level of the lecturer's guidance or pedagogical mediation, which depends on student age, experience, and prior knowledge. It is therefore very important that lecturers be equipped with the necessary knowledge and education for using and analyzing corpora on a daily basis. Computer Corpora and Open Source Software for Language Learning: Emerging Research and Opportunities is a cutting-edge research publication that analyzes teacher experiences in implementing computer corpora into their language learning classrooms in order to formulate additional insights as to best strategies for integrating such tools that maximizes language learning efficiency in primary and secondary education. Highlighting topics such as ICT tools, language education, and linguistics, this book is ideal for academicians, educators, computer science teachers, IT professionals, researchers, and students.

Search Engine Optimization Harold Davis, 2006-05-23 SEO--short for Search Engine Optimization--is the art, craft, and science of driving web traffic to web sites. Web traffic is food, drink, and oxygen--in short, life itself--to any web-based business. Whether your web site depends on broad, general traffic, or high-quality, targeted traffic, this PDF has the tools and information you need to draw more traffic to your site. You'll learn how to effectively use PageRank (and Google itself); how to get listed, get links, and get syndicated; and much more. The field of SEO is expanding into all the possible ways of promoting web traffic. This breadth requires a range of understanding. In this PDF you'll find topics that cover that range, so you can use SEO to your benefit. Those topics include: Understanding how to best organize your web pages and websites. Understanding technologic and business tools available that you can use to achieve your SEO goals. Understanding how

Google works. (Since Google is far and away the most important search engine, effectively using SEO means effectively using Google. This PDF covers how to boost placement in Google search results, how not to offend Google, how best to use paid Google programs, and more.) Understanding best SEO practices (whether your organization is small and entrepreneurial, or whether you have responsibility for a large web presence). When you approach SEO, you must take some time to understand the characteristics of the traffic that you need to drive your business. Then go out and use the techniques explained in this PDF to grab some traffic--and bring life to your business.

Seo Toolbook Jason McDonald, 2015-11-22 Free Tools for SEO in a Comprehensive Directory REVISED for 2016 - to cover new topics such as content marketing, Google+, and the new link-building! Why buy PAID TOOLS when you can use the many FREE TOOLS available on the Internet? You just have to know where to look. Used by Jason McDonald in his online SEO classes as well as classes at Stanford Continuing Studies and classes at San Francisco's Bay Area Video Coalition and AcademyX, the SEO Toolbook is a MUST HAVE for anyone who wants to dominate Google, Bing, or Yahoo. Here's what you get: Tools for every aspect of SEO, starting at Keywords proceeding through Page Tags, Link-building, and Diagnostics and ending up at rank measurement and Google Analytics. Web links to each and every free tool. A description of the tool plus a relevancy score. In addition to tools, pointers to tutorials, blogs, and trade shows on Search Engine Optimization as well as official free Google resources and even funny Easter Eggs. Access to the online edition, including

Jason's dashboard of clickable tool links. **IMPORTANT ALERTS** The SEO Toolbook is available FREE in PDF format (not hard copy!) to folks who take any of Jason's classes (both online and in San Francisco), as well as subscribers to the JM INTERNET GROUP email lists. Buy this book ONLY if you want a hard copy, printed version of this important search engine optimization tools directory. The SEO Toolbook is a wonderful companion to all books on SEO such as SEO For Dummies, SEO an Hour a Day, Search engine optimization 2016, etc. Understand How the SEO Toolbook Works First and foremost, the SEO Toolbook assumes a working knowledge of SEO. This toolbook has many wonderful free tools, but the tools alone are useless without a knowledge of how the game is played! (If you need that knowledge, we recommend you check out my SEO Fitness Workbook (on Amazon), online courses a, or call 800-298-4065 to learn more about my SEO one-on-one training and consulting services). Second, this book emphasizes only free tools. Despite the fact that there are quite a few paid SEO tools out there, none are any better than the free tools identified in this Toolbook. Indeed, in today's tight economy, why pay when you can get them for free? Not to mention, why pay when the most important element, i.e. a knowledge of how SEO is played to win, can't be obtained from any tool? Third, we have reviewed each tool in the Toolbook for relevance and ease of use. Almost without exception, the tools in the Toolbook require nothing more than a Web browser and active connection to the Internet. Easy is just as important as free. Generally speaking, if a tool requires registration or has only a trial period, it has been excluded.

The AltaVista Search Revolution Eric J. Ray, Deborah S. Ray, Richard Seltzer, 1998 Experience the revolutionary search powers of AltaVista.

7001 Resumes-Plus Second Edition Ferris E. Merhish, 2010 In this second chronicle about Deborah, she faces an enemy whose sole purpose is to kill every human being in the universe. The location of the enemy's home planets is unknown. This enemy has unlimited ships and no concern about the high losses to their personnel. The initial evaluation is that the enemy may not even be human. They are given the name, Grays. A creature like the Grays seems rather harmless compared to what fiction shows you. The Grays went unchallenged only because they looked so weak and fragile. No one saw them as a serious threat. I can only think of the army ants on the march. No one takes an ant seriously; however, an army of ants will devastate an area and kill every living creature. The Grays are the same type of threat to mankind. As the Grays are building up their fleets and personnel, Deborah desperately searches the known universe for additional personnel; in this search she even goes to primitive nations. The United States strips its military forces to provide as many personnel as possible. Despite this effort, there are still not enough personnel. Deborah's scientists are working around the clock to not only upgrade her weapons, but also provide her with new types of weapons. Ramah and the United States are making a maximum effort to prepare for the upcoming battle with the Grays. In this battle either the humans or the Grays will become extinct.
