Soft City David Sim,2019-08-20 Imagine waking up to the gentle noises of the city, and moving through your day with complete confidence that you will get where you need to go quickly and efficiently. *Soft City* is about ease and comfort, where density has a human dimension, adapting to our ever-changing needs, nurturing relationships, and accommodating the pleasures of everyday life. How do we move from the current reality in most cities—separated uses and lengthy commutes in single-occupancy vehicles that drain human, environmental, and community resources—to support a soft city approach? In *Soft City* David Sim, partner and creative director at Gehl, shows how this is possible, presenting ideas and graphic examples from around the globe. He draws from his vast design experience to make a case for a dense and diverse built environment at a human scale, which he presents through a series of observations of older and newer places, and a range of simple built phenomena, some traditional and some totally new inventions. Sim shows that increasing density is not enough. The soft city must consider the organization and layout of the built environment for more fluid movement and comfort, a diversity of building types, and thoughtful design to ensure a sustainable urban environment and society. *Soft City* begins with the big ideas of happiness and quality of life, and then shows how they are tied to the way we live. The heart of the book is highly visual and shows the building blocks for neighborhoods: building types and their organization and orientation; how we can get along as we get around a city; and living with the weather. As every citizen deals with the reality of a changing climate, *Soft City* explores how the built environment can adapt and respond. *Soft City* offers inspiration, ideas, and guidance for anyone interested in city building. Sim shows how to make any city more efficient, more livable, and better connected to the environment.

SIM'S LESSEE v. IRVINE, 3 U.S. 425 (1799) ,1799 File No. 58

Dave Sim Eric Hoffman,Dominick Grace,2013-03-01 In 1977, Dave Sim (b. 1956) began to self-publish Cerebus, one of the earliest and most significant independent comics, which ran for 300 issues and ended, as Sim had planned from early on, in 2004. Over the run of the comic, Sim used it as a springboard to explore not only the potential of the comics medium but also many of the core assumptions of Western society. Through it he analyzed politics, the dynamics of love, religion, and, most controversially, the influence of feminism—which Sim believes has had a negative impact on society. Moreover, Sim inserted himself squarely into the comic as Cerebus's creator, thereby inviting criticism not only of the creation, but also of the creator. What few interviews Sim gave often pushed the limits of what an interview might be in much the same way that Cerebus pushed the limits of what a comic might be. In interviews Sim is generous, expansive, provocative, and sometimes even antagonistic. Regardless of mood, he is always insightful and fascinating. His discursive style is not conducive to the sound bite or to easy summary. Many of these interviews have been out of print for years. And, while the interviews range from very general, career-spanning explorations of his complex work and ideas, to tightly focused discussions on specific details of Cerebus, all the interviews contained herein are engaging and revealing.

Sims F. Paul Wilson,2004-09 This new science thriller takes place in the very near future--in a world where genetically transmitted diseases are being eliminated and manual labor is gradually being transferred to sims, genetically altered chimps who occupy a gray zone between simian and human.

Here Comes Sim Sim Fryson,2017-05-10 Here Comes Sim! That sign adorned the front of an old, beat-up pickup truck belonging to Sim Fryson, Sr., a black man born in the Deep South of Reform, Alabama, in 1896. There Goes Sim! read the sign on the back of the truck that Sim used to haul manure, dirt, and coal to help support his large family. Sim Fryson Jr., or Simmy, as his mother called him, was often teased as a child about that battered old truck. But he knew that his father, despite the persecution and prejudice he faced every day, was a man of extreme integrity. Sim Sr. treated everyone with respect and dignity and expected the same in return. That positive influence created in young Sim a burning desire to grow up to be a man his father would be proud of. This book is the story of the younger Sim's life and how he rose from humble beginnings to be a successful college-educated businessman, athlete, musician, family man, and community leader. He was the first black American to own multiple car dealership franchises of Mercedes-Benz, Honda, Nissan and Mazda. As a tribute to his father, Here Comes Sim adorned the front of every car he sold. Among many other honors, he has been listed in Black Enterprise Magazine as one of the top 100 Black Businesses in the country. Co-writing with author Susan Phelps Harvey, Sim tells his story with candor. Sometimes funny, sometimes awkward, but always honest and true, Sim tells it like it is, revealing his teenage escapades, his encounters with famous athletes, and his constant drive to succeed to honor his father's name. As Sim gained success, he realized that he hadn't done it all on his own. God had blessed him. He began to study his Bible as intently and carefully as he had done everything else in his life. Along the way, he developed a new and deeper relationship with God, and discovered Bible truths that challenged him to make profound changes in the way he ran his business. His struggles with his conscience and the miraculous way God blessed his decisions to do the right thing are at the heart of this story. Sim Fryson continues to strive to live his life in a way that honors the memory of

his earthly father, and, every day, he gives all the glory and praise to his heavenly Father.

Secondary Ion Mass Spectrometry SIMS V Alfred Benninghoven, Richard J. Colton, David S.

Simons, Helmut W. Werner, 2012-12-06 This volume contains the proceedings of the Fifth International Conference on Secondary Ion Mass Spectrometry (SIMS V), held at the Capitol Holiday Inn, Washington, DC, USA, from September 30 to October 4, 1985. The conference was the fifth in a series of conferences held biennially. Previous conferences were held in Münster (1977), Stanford (1979), Budapest (1981), and Osaka (1983). SIMS V was organized by Dr. R.J. Colton of the Naval Research Laboratory and Dr. D.S. Simons of the National Bureau of Standards under the auspices of the International Organizing Committee chaired by Prof. A. Benninghoven of the Universität Münster. Dr. Richard F.K. Herzog served as the honorary chairman of SIMS V. While Dr. Herzog is best known to the mass spectrometry community for his theoretical development of a mass spectrometer design, known as the Mattauch-Herzog geometry, he also made several early and important contributions to SIMS. In 1949, Herzog and Viehbock published a description of the first instrument designed to study secondary ions produced by bombardment from a beam of ions generated in a source that was separated from the sample by a narrow tube. Later at the GCA Corporation, he brought together a team of researchers including H.J. Liebl, F.G. Riidenauer, W.P. Poschenrieder and F.G. Satkiewicz, who designed and built, and carried out applied research with the first commercial ion microprobe.
