Aaaarrgghh, Spider! Lydia Monks,2007 A rip-roaring read-aloud (shout-aloud) picture book about a spider who wants to be the family pet from the internationally acclaimed illustrator of Julia Donaldson's *What the Ladybird Heard*. Spider wants to be a family pet. But the family whose house he lives in are terrified of him. Whenever he tries to show them what a great pet he would make, they simply cry: "AAAARRGGHH, Spider!" Spiders! Laurence Pringle,2017-10-10 This latest installment in the popular *Strange and Wonderful* series introduces readers to spider species from all over the world—from the common garden spider to the elusive black widow. Pringle's comprehensive, lively, and informative text includes an overview of the many thousands of species in the world and describes spiders' habitats, physiology, mating habits, web-making, what and how they eat, and how they protect themselves from predators. It also explores why people are so frightened by spiders and shows that those fears are largely unfounded. Common Spiders of North America Richard A. Bradley,2019-11-12 Spiders are among the most diverse groups of terrestrial invertebrates, yet they are among the least studied and understood. Group keys enable identification by web type and other observable details, and species descriptions include identification tips, typical habitat, geographic distribution, and behavioral notes. This book is a critical resource for curious naturalists who want to understand this ubiquitous and ecologically critical component of our biosphere.

Spider Silk Leslie Brunetta,Catherine L. Craig,2010-06-08 Spiders, objects of eternal human fascination, are found in many places: on the ground, in the air, and even under water. Leslie Brunetta and Catherine Craig have teamed up to produce a substantive yet entertaining book for anyone who has ever wondered, as a spider rappelled out of reach on a line of silk, "How do they do that?" The orb web, that iconic wheel-shaped web most of us associate with

spiders, contains at least four different silk proteins, each performing a different function and all meshing together to create a fly-catching machine that has amazed and inspired humans through the ages. Brunetta and Craig tell the intriguing story of how spiders evolved over 400 million years to add new silks and new uses for silk to their survival “toolkit” and, in the telling, take readers far beyond the orb. The authors describe the trials and triumphs of spiders as they use silk to negotiate an ever-changing environment, and they show how natural selection acts at the genetic level and as individuals struggle for survival.

The Private Life of Spiders P. D. Hillyard, 2008 Presents an illustrated guide to the anatomy, behavior, social organization, reproduction, hunting techniques, and web construction of a variety of spiders from around the world.
