Experience-Based Language Acquisition Brian E. Pangburn, 2002-12 Almost from the very beginning of the digital age, people have sought better ways to communicate with computers. This research investigates how computers might be enabled to understand natural language in a more humanlike way. Based, in part, on cognitive development in infants, we introduce an open computational framework for visual perception and grounded language acquisition called Experience-Based Language Acquisition (EBLA). EBLA can watch a series of short videos and acquire a simple language of nouns and verbs corresponding to the objects and object-object relations in those videos. Upon acquiring this protolanguage, EBLA can perform basic scene analysis to generate descriptions of novel videos. The general architecture of EBLA is comprised of three stages: vision processing, entity extraction, and lexical resolution. In the vision processing stage, EBLA processes the individual frames in short videos, using a variation of the mean shift analysis image segmentation algorithm to identify and store information about significant objects. In the entity extraction stage, EBLA abstracts information about the significant objects in each video and the relationships among those objects into internal representations called entities. Finally, in the lexical acquisition stage, EBLA extracts the individual lexemes (words) from simple descriptions of each video and attempts to generate entity-lexeme mappings using an inference technique called cross-situational learning. EBLA is not primed with a base lexicon, so it faces the task of bootstrapping its lexicon from scratch.

The Future of the Profit Split Method Gabriella Cappelleri, Robert Danon, Vikram Chand, 2020-11-23 The Future of the Profit Split Method Edited by Robert Danon, Guglielmo Maisto, Vikram Chand & Gabriella Cappelleri Among the various transfer pricing methods, the profit split method (PSM) is under the spotlight after the OECD's Base Erosion and Profit Shifting (BEPS) project. However, both expert analysis and experience indicate that this method is not straightforward either for taxpayers to apply or for tax administrations to evaluate. In this thorough and detailed commentary – the first book to analyse this increasingly adopted transfer pricing method – notable scholars and practitioners working in the international tax community express their views on the method, answering some unresolved questions and highlighting issues that are still open and pending, especially in light of the digitalization of the economy. Crucial issues covered by the contributors include the following: choice of the appropriate splitting factors, their relative weights, and valuation of the contributions; uncertainties and outcomes potentially not aligned with the arm's-length standard; possible role of assessments made by the European Commission on State aid; nexus with the work done by the EU Joint Transfer Pricing Forum; impact of profit split on indirect taxes (VAT/customs tax/excise tax); and application to digital business models and, in general, to the digitalized economy. Moreover, relevant experience of applying this method in France, Germany, Italy, Spain, Switzerland, the United Kingdom, and the United States is provided. A concluding chapter also deals with selected industry experiences. Due to a high level of uncertainty in alignment with international guidance in the application of the PSM – and to the underdeveloped nature of current literature on the subject – there is a need for this book because both tax administrations and taxpayers, going forward, will apply the PSM extensively. The book is highly relevant for policymakers, tax administrations, practitioners and academics engaged in the areas of international taxation, transfer pricing and tax policy.

The Empire's Lion Nathan Tudor,2022-01-21 This book wowed me. —Michael McClellan, bestselling author of The Sand Sea She left a slave. She returns a conqueror. As an Adept, Reiva blasts fire from her hands and leaps over walls. But when her first solo mission leaves her half-dead amidst a heap of massacred allies, she gets just one chance at redemption. The Empire orders her to crush the one kingdom she thought she would never see again: Talynis, the land of her birth, the land she left in chains. Standing in her way is the Wolf, a vicious assassin hellbent on killing Adepts—and a single cut from his cursed blade will destroy Reiva's magic forever. Even if she can survive, victory may come at a price too high to pay...

Zohar for All Rav Michael Laitman PhD,2024-04-14 Laitman Kabbalah Publishers is proud to present the second volume of Zohar for All: The Book of Zohar with the Sulam Commentary. This new rendition of The Zohar offers an accessible and coherent explanation to the fundamental and primary composition in the wisdom of Kabbalah. The Sulam [Ladder] commentary is the most profound and elaborate commentary on The Book of Zohar, and was written by the greatest kabbalist of the 20th century, Rav Yehuda Leib HaLevi Ashlag. Zohar for All smoothly merges the original text of The Zohar with the lucid explanations of Rav Yehuda Ashlag to create a streamlined text that is both clear and true to the source.

Klaus Vogel on Double Taxation Conventions Ekkehart Reimert,Alexander Rust,2022-01-18 Klaus Vogel on Double Taxation Conventions is regarded as the international gold standard on the law of tax treaties. This article-by-article commentary has been completely revised and updated to give you a full and current account of double tax conventions (DTCs). DTCs form the backbone of international taxation, but they raise many interpretational questions. This market leading work will provide you with the answers. Based on the OECD/G20 Multilateral Instrument, the OECD MC and Commentary published in 2017 and the most recent amendments to the UN MC, the book also includes relevant case law and scholarly literature upto and including 2020. Previous editions of the Vogel have been routinely relied on by courts around the world including Australia, Canada, Germany, India, South Africa, the Netherlands and United Kingdom. What's new in this edition? There have been many important developments in this area since the last edition in 2015. The authors discuss these developments and the effect they will have upon practitioners working in this area. They also provide a wealth of new and revised case law, along with the DTCs of emerging countries. You'll find: Reports about major features in the DTC practice of many leading jurisdictions, such as: the DTC practice of Austria, Canada, France, Germany, India, the

Netherlands, Switzerland, the UK and the US Sections on divergent country practice covering their national models and networks of bilateral DTCs Thorough analysis of the OECD and UN model, as well as the implementation of these models in practice Amendments of bilateral DTCs, textual or in substance, on the basis of the 2017 Anti-BEPS Multilateral Instrument Coverage of a full range of the latest tax treaties around the world, including important treaties between OECD and BRICS countries This new Fifth Edition of Klaus Vogel on Double Taxation Conventions continues to reflect the unchallenged role of the OECD. The OECD MC, accompanied by the official Commentary, guidelines, reports and other recommendations, has sustained its position as the most important legal instrument in the area of DTCs. On occasion, the UN MC and Commentary diverge from the OECD texts. When this happens, the authors deal with the specifics of the UN MC in separate annotations and analyses, explaining and making sure you understand the differences. How this will help you: All the information you need to confidently advise on issues such as the taxation of income, taxation of capital and the elimination of double taxation Know that your advice to clients is based on the most up-to-date and respected information available, from an outstanding team of editors and authors The editors, Professors Ekkehart Reimer and Alexander Rust, have worked with the late Professor Vogel as well as an international team of top experts to completely update and enhance the content. Principles of International Taxation Lynne Oats, 2021-09-30 The book provides a clear introduction to international taxation and presents its material in a global context, explaining policy, legal issues and planning points central to taxation issues, primarily from the viewpoint of a multinational group of companies. It uses examples and diagrams throughout to aid the reader's understanding and offers more in-depth material on many important areas of the subject. Traditionally published every 2 years in both print and digital formats, this content is a core requirement for student reading lists at both undergraduate and post graduate level. Fully updated to cover all new tax legislation and developments in light of the OECD BEPS project implementation, key areas to be included in this new edition are: - changes proposed by BEPS 2.0 in relation to taxation and the digital economy, including Pillar Two and the proposed new UN Model Article 12B; - further progress on the implantation of OECD Base Erosion and Profit Shifting implementation, including: -- an update on the implementation of BEPS recommendations including artificial avoidance of permanent establishment status and prevention of treaty abuse; -- the implementation of transfer pricing documentation and country-by-country reporting; -- multilateral instrument implementation; - the impact of Covid-19 on international taxation; - further developments in European direct taxation including the transparency package, directives on anti-tax avoidance and the common corporate tax base and state aid cases (Apple in particular) and updates to the Directive on Administrative Cooperation, and the new communication on Business Taxation for the 21st Century. - Proposals in relation to the taxation of digital business, in particular the OECD's unified approach and the UN modifications to the Model Double Taxation Convention. - Proposals for a global minimum corporate tax rate to curb base erosion and tax competition.

Fundamentals of International Transfer Pricing in Law and Economics Wolfgang Schön, Kai A. Konrad, 2012-02-15 The taxation of multinational corporate groups has become a major concern in the academic and political debate on the future of international taxation. In particular the arm's length standard for the determination of transfer prices is under increasing pressure. Many countries and international bodies are now taking a closer look at the use of transfer prices for profit shifting and are exploring alternative mechanisms such as formulary apportionment for the allocation of taxing rights. With regard to this topic, this volume is the first to offer a concise analysis of transfer pricing in the international tax arena from an interdisciplinary legal and economic point of view. Fundamentals such as the efficient allocation of resources within multi-unit firms and distortions between different goals of transfer pricing as well as different aspects of it in tax and corporate law, the traditional OECD approach and practical aspects concerning intangibles, capital and risk allocation are covered by outstanding authors.

The Zohar Michael Laitman, 2009-01-01 The wisdom of Kabbalah teaches us how to perceive and live in the reality that spreads before us. It is a systematic method that has evolved over thousands of years, nurtured by individuals whose task was to ensure that the true wisdom would be given to those ready to receive it. The Book of Zohar (The Book of Radiance) is an ageless source of wisdom and the basis for all Kabbalistic literature. Since its appearance nearly 2,000 years ago, it has been the primary, and often only, source used by Kabbalists. Written in a unique and metaphorical language. The Book of Zohar enriches our understanding of reality and expands our worldview. However, this text should not be read in an ordinary fashion. We should patiently and repeatedly read and think about each sentence as we try to penetrate the author's feelings. We should read it slowly and try to extract the nuances of the text. Although the text deals with one subject only-how to relate to the Creator-it approaches it from different angles. This allows each of us to find the particular phrase or word that will carry us into the depths of this profound and timeless wisdom.

Knowledge-Based and Intelligent Information and Engineering Systems Rossitza Setchi, Ivan Jordanov, 2010-09-07 The 14 International Conference on Knowledge-Based and Intelligent Information and Engineering Systems was held during September 8-10, 2010 in Cardiff, UK. The conference was organized by the School of Engineering at Cardiff University, UK and KES International. KES2010 provided an international scientific forum for the presentation of the - sults of high-quality research on a broad range of intelligent systems topics. The c- ference attracted over 360

submissions from 42 countries and 6 continents: Argentina, Australia, Belgium, Brazil, Bulgaria, Canada, Chile, China, Croatia, Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong ROC, Hungary, India, Iran, Ireland, Israel, Italy, Japan, Korea, Malaysia, Mexico, The Netherlands, New Zealand, Pakistan, Poland, Romania, Singapore, Slovenia, Spain, Sweden, Syria, Taiwan, - nisia, Turkey, UK, USA and Vietnam. The conference consisted of 6 keynote talks, 11 general tracks and 29 invited s- sions and workshops, on the applications and theory of intelligent systems and related areas. The distinguished keynote speakers were Christopher Bishop, UK, Nikola - sabov, New Zealand, Saeid Nahavandi, Australia, Tetsuo Sawaragi, Japan, Yuzuru Tanaka, Japan and Roger Whitaker, UK. Over 240 oral and poster presentations provided excellent opportunities for the presentation of interesting new research results and discussion about them, leading to knowledge transfer and generation of new ideas. Extended versions of selected papers were considered for publication in the Int- national Journal of Knowledge-Based and Intelligent Engineering Systems, Engine- ing Applications of Artificial Intelligence, Journal of Intelligent Manufacturing, and Neural Computing and Applications.

Towards a Neutral Formulary Apportionment System in Regional Integration Shu-Chien Chen, 2023-03-09 International tax regimes and practices are heavily criticized for failing to fairly levy corporate tax on giant multinational taxpayers in the current globalized and digitalized world. This important and far-seeing book demonstrates how formulary apportionment (FA) - an approach by which a multinational corporation pays each jurisdiction's corporate tax based on the share of its worldwide income allocated to that jurisdiction - can achieve the much-sought goal of aligning value creation and taxation. The author, through an intensive analysis of the European Union's (EU's) Common Consolidated Corporate Tax Base (CCCTB) Directive Proposal(s) and comparison to the United States (US's) formulary apportionment experience, shows how the perceived problems with an FA system can be overcome and lays out the necessary elements for its feasibility. With detailed attention to the debates around formulary apportionment and its theoretical foundations, the book provides a blueprint for rebuilding the normative framework for the EU's tax reform by clearly analysing the implications of the following and more: theorising public benefits to be represented by taxation; reorganising different economic theories about tax neutrality and tax justice; advancing the comparative legal research methodology to analyse law reform by combining the functional approach and the problem-solving approach; designing the logical formulary apportionment system for digital economy; ensuring the removal of the incentive for multinationals to shift reported income to low-tax locations; reducing the tax system's complexity and the administrative burden it imposes on firms; eliminating transfer pricing complexity for intra-firm transactions; achieving equal weighting of the sales factor, the labour factor, and the asset factor in the formula; application of 'destination-based' rule for attributing the sales factor; and replacing the traditional permanent establishment nexus with a 'factor presence nexus'. The presentation incorporates extensive comparison between the EU's formulary apportionment tax reform option and FA systems existing in the United States (US) at state level, including reference to relevant US case law and legislation. As a possible option to address the problem of base erosion and profit shifting (BEPS), formulary apportionment is gaining increasing acceptance and attention. This book will prove invaluable to taxation authorities, tax practitioners, and scholars in its deeply informed and systematic guidance on good practices and prevention of problematic experiences in establishing and implementing an effective and market-neutral FA system.

Eye-Tracking Kathy Conklin, Ana Pellicer-Sánchez, Gareth Carrol, 2018-03-15 Eye-tracking is quickly becoming a valuable tool in applied linguistics research as it provides a 'real-time', direct measure of cognitive processing effort. This book provides a straightforward introduction to the technology and how it might be used in language research. With a strong focus on the practicalities of designing eye-tracking studies that achieve the standard of other well-established experimental techniques, it provides valuable information about building and designing studies, touching on common challenges and problems, as well as solutions. Importantly, the book looks at the use of eye-tracking in a wide variety of applied contexts

including reading, listening and multi-modal input, writing, testing, corpus linguistics, translation, stylistics, and computer-mediated communication. Each chapter finishes with a simple checklist to help researchers use eye-tracking in a wide variety of language studies. Discussion is grounded in concrete examples, which will allow users coming to the technology for the first time to gain the knowledge and confidence to use it to produce high quality research.

Tax Transfer Pricing Andrea Musselli,2022-09-15T00:00:00+02:00 The book pays attention to the tax treatment of transfer pricing in a single perspective of analysis since the most important principles (the arm's length -ALP- i.e. conditions that independent parties would share, and the sale country) are agreed worldwide. They must be applied in the same way regardless of the economic sector or industry. A country survey overlooks the most important issue of the fiscal problem, that is, the ability to project a unitary policy in compliance with the ALP (or with the sale country principle) and that should be audited by one sole (only theoretically) existing tax authority. The practical part and examples disclose how rules should be/have been applied, how legal proceedings can arise/arose regarding their application , how they were decided if litigation truly occurred, and finally the author's motivated opinion with special focus on which is "the breaking point" of a specific analysis. The term "breaking point" is used to explain which can be the factual and/or the interpretative change that is able to modify such analysis and thus the solution. Extract from the preface of prof. Reuven Avi-Yonah: "this book is a must read for any serious student of the topic and an important contribution to understanding how the ALP is applied today as well as to how it should be applied. It is an invaluable contribution and should be read widely by both tax lawyers and accountants and by tax policy makers".
