*Staff Engineer* Will Larson,2021-02-28 At most technology companies, you'll reach Senior Software Engineer, the career level for software engineers, in five to eight years. At that career level, you'll no longer be required to work towards the next promotion, and being promoted beyond it is exceptional rather than expected. At that point your career path will branch, and you have to decide between remaining at your current level, continuing down the path of technical excellence to become a Staff Engineer, or switching into engineering management. Of course, the specific titles vary by company, and you can replace Senior Engineer and Staff Engineer with whatever titles your company prefers. Over the past few years we've seen a flurry of books unlocking the engineering management career path, like Camille Fournier's *The Manager's Path*, Julie Zhuo's *The Making of a Manager*, Lara Hogan's *Resilient Management* and my own, *An Elegant Puzzle*. The management career isn't an easy one, but increasingly there are maps available for navigating it. On the other hand, the transition into Staff Engineer, and its further evolutions like Principal and Distinguished Engineer, remains challenging and undocumented. What are the skills you need to develop to reach Staff Engineer? Are technical abilities alone sufficient to reach and succeed in that role? How do most folks reach this role? What is your manager's role in helping you along the way? Will you enjoy being a Staff Engineer or you will toil for years to achieve a role that doesn't suit you? Staff Engineer: Leadership beyond the management track is a pragmatic look at attaining and operating in these Staff-plus roles.

*Managing Social Service Staff for Excellence* Nancy Summers,2011-02-17 An essential guide for those charged with supervision of nonclinical staff in programs, agencies, and units within social service organizations. As someone who has worked in social service agencies, consulted with hundreds of them, and who teaches social service professionals, Ms. Summers knows the issues faced by agencies firsthand. From this experience she has compiled a thoughtful and well-organized text that identifies the principles of effective supervision. —Samuel Knapp, EdD Director of Professional Affairs, Pennsylvania Psychological Association From the Foreword The care of patients and clients of social service agencies is increasingly being performed by paraprofessionals or professionals with little experience. While there are many books written about giving quality clinical supervision, there is very little on supervising the least experienced frontline nonclinical and clinical staff to teach and promote positive and effective interaction with clients, and provide staff support and training that elevates quality care, improves job satisfaction, and minimizes staff turnover. Based on author Nancy Summers' many years of working with troubled social service agencies, *Managing Social Service Staff for Excellence: Five Keys to Exceptional Supervision* fills this need and offers numerous ideas for securing the best care for those served by social service agencies. Common problems faced by agencies are examined with regard to employee behavior and wellness, including staff teamwork, how to build healthy staff/client relationships, and the identification and prevention of routine disrespect of clients and their needs. Diagnostic techniques are presented for identifying these problems, as well as remedies and prevention programs that can be put in place without great expense. Filled with interviews and numerous case examples, *Managing Social Service Staff for Excellence* offers a step-by-step process for: creating good preventive measures to counteract negative practices that can occur; developing robust commitment and enthusiasm; and getting back on the right track after unfortunate incidents have taken place.

**Re-imagining Academic Staff Development** Lynn Quinn,2012-11-01 Re-imagining Academic Staff Development: Spaces for Disruption, a book with a strong commitment to social transformation, is a welcome addition to the field of academic development studies. South Africa may have unique social challenges, but in highlighting higher education's central role in responding to them, this book reminds academic developers everywhere of the intrinsic politicalness of our work. In a series of theoretically diverse chapters, all written by members of the Centre for Higher Education Research, Teaching and Learning at Rhodes University, we are provoked to reconsider the meaning of our practice and why we do it. An enlivening read! ? Barbara Grant, The University of Auckland, New Zealand.

Command and General Staff Officer Education for the 21st Century Examining the German Model Major Luke G. Grossman USAF,2015-11-06 Education has been the foundational cornerstone to every profession and continues to be so in the 21st Century. As a profession, the military is obligated to conduct not only training but also education of the keepers of the profession, the officer corps. Since the rise of large military bodies enabled by the levee en masse and industrialization, armies have required educated officers skilled in both command and staff functions. The Prussian-German model of staff officer education embodied in the Kriegsakademie of the Nineteenth and first half of the Twentieth Century's, was highly regarded and much copied. The education officer received at the Kriegsakademie directly contributed to an efficiently organized and employed Prussian-German Army at the tactical and operational levels. The investment in Kriegsakademie officer education paid huge dividends at Gravelotte-St Privat and Sedan 1870, Tannenberg 1914, Battle of Poland 1939, and the Battle of France 1940, critical first battles. With the rearming of Germany in 1955 came the need for the fledgling Bundeswehr to educate general staff officers. This need was met by establishing the Führungsakademie (German Armed Forces Command and Staff College). The Führungsakademie was created with the same time honored principles that had served general staff officer training previously: careful selection of the most highly qualified and promising officers and a broad based education rigorously applied. However, little information on the current Führungsakademie Education System is available in the English language. This monograph attempts to address this void. The author conducted research and interviews with the faculty, staff, and students at the Führungsakademie in Hamburg, Germany in order to understand and assess the education given to German general staff officer aspirants. The central general staff officer's education course is the National General/Admiral Staff Officers Course.

The Staff Engineer's Path Tanya Reilly,2022-09-20 For years, companies have rewarded their most effective engineers with management positions. But treating management as the default path for an engineer with leadership ability doesn't serve the industry well—or the engineer. The staff engineer's path allows engineers to contribute at a high level as role models, driving big projects, determining technical strategy, and raising everyone's skills. This in-depth book shows you how to understand your role, manage your time, master strategic thinking, and set the standard for technical work. You'll read about how to be a leader without direct authority, how to plan ahead to make the right technical decisions, and how to make everyone around you better, while still growing as an expert in your domain. By exploring the three pillars of a staff engineer's job, Tanya Reilly, a veteran of the staff engineer track, shows you how to: Take a broad, strategic view when thinking about your work Dive into practical tactics for making projects succeed Determine what good engineering

Its practical flavour and real understanding will also be welcomed by general management. The guidelines and detailed checklists will help cut the direct costs of recruiting and the often astonishingly high indirect costs of rapid staff turnover.

*License to Spill: How Do We Discuss Spillovers in Article IV Staff Reports* Jelle Barkema,Borislava Mircheva,Mr. Mico Mrkaic,Yuanchen Yang,2021-05-07 This paper dives into the Fund’s historical coverage of cross-border spillovers in its surveillance. We use a state-of-the-art deep learning model to analyze the discussion of spillovers in all IMF Article IV staff reports between 2010 and 2019. We find that overall, while the discussion of spillovers decreased over time, it was pronounced in the staff reports of some systemically important economies and during periods of global spillover events. Spillover discussions were more prominent in staff reports covering advanced and emerging market economies, possibly reflecting their role as sources of global spillovers. The coverage of spillovers was higher in the context of the real, financial, and external sectors. Also, countries with larger economies, higher trade and capital account openness and lower inflation are more likely to discuss spillovers in their Article IV staff reports.
