Watchlist Ronnie Philips, 2018-11-09 **We are the only Stock Journal to offer tracking of emotion on each day!** The Professional's Stock Watch Journal is a labor of love with an interesting history. For twenty years, I watched my husband track his watch list, buys, sells and emotional moods on scraps of paper, napkins and business cards. While there were plenty of apps available to track these things, none of them ever gave him the options that he needed. Most were too robust, and none had any emotional tracking available. Hence, The Professional's Stock Watch Journal was born to capture the things most important to a man who trades for the love of trading, not as a full time job. The Watchlist captures the day, date and up to 20 stocks, along with Entry, Exit and Analysis space for each. It also has open space for capturing notes or thoughts. The Buys page captures the Stock, Entry, Stop and Target for each. Most importantly, each Buys page allows you to capture your emotional mood that day -Bearish, Neutral or Bullish. Use these mood ratings, along with your tracking to look back and reflect on why you made the purchases you did, and learn how your emotions can impact your stock purchases and decisions. I am confident that The Professional's Stock Watch Journal will help you in your stock market journey. As Yvan Byeajee said, Freedom from blind reactivity begins with self-awareness. Watchlist Journal Features include: 150 pages designed to track day & date, Watchlist, Notes, Buy List, Emotional Tracker for feeling Bullish, Neutral or Bearish and Thoughts for Today. A quick and easy way to track stocks you are interested in, whether you are a seasoned trader or just learning. Great way to track stocks over a long period of time and receive introspective on your mood and impact in making good stock decisions. Take a look inside! Easy to read pages include: WATCHLIST which tracks: TICKER, ENTRY, EXIT, AND ANALYSIS, notes and thoughts. Take a look at the BUY page: Tracks: Ticker, Entry, Stop, Target & Emotional Tracker: Bullish, Bearish or Neutral! 6 x 9 size fits in your briefcase, pocket, or jacket. 150 pages. Glossy cover and soft spine. Watchlist makes a perfect gift for men and women who are interested in trading stocks, reviewing their successes, keeping accountable to their choices and determining if they are making good investments. Can easily be used with any online Stock Trading app. Perfect companion for stock market investing for beginners! Stay on track with this easy to use journal.

Price-Forecasting Models for J. Jill Inc JILL Stock Ton Viet Ta, 2020-11-06 Do you want to earn up to a 815065% annual return on your money by two trades per day on J. Jill Inc JILL Stock? Reading this book is the only way to have a specific strategy. This book offers you a chance to trade JILL Stock at predicted prices. Eight methods for buying and selling JILL Stock at predicted low/high prices are introduced. These prices are very close to the lowest and highest prices of the stock in a day. All methods are explained in a very easy-to-understand way by using many examples, formulas, figures, and tables. The BIG DATA of the 924 consecutive trading days (from March 9, 2017 to November 5, 2020) are utilized. The methods do not require any background on mathematics from readers. Furthermore, they are easy to use. Each takes you no more than 30 seconds for calculation to obtain a specific predicted price. The methods are not transient. They cannot be beaten by Mr. Market in several years, even until the stock doubles its current age. They are traits of Mr. Market. The reason is that the author uses the law of large numbers in the probability theory to construct them. In other words, you can use the

methods in a long time without worrying about their change. The efficiency of the methods can be checked easily. Just compare the predicted prices with the actual price of the stock while referring to the probabilities of success which are shown clearly in the book (click the LOOK INSIDE button to read more information before buying this book). Depending on the number of investors who are interested in this book, the performance of the methods from the publication date will be added to the book after one year, and will be stated here in the description of the book too. You will then see that the methods in this book are outstanding or not. The book is very useful for Investors who have decided to buy the stock and keep it for a long time (as the strategy of Warren Buffett), or to sell the stock and pay attention to other stocks. The methods will help them to maximize profits for their decision. Day traders who buy and sell the stock many times in a day. Although each method is valid one time per day, the information from the methods will help the traders buy/sell the stock in the second time, third time or more in a day. Beginners to JILL Stock. The book gives an insight about the behavior of the stock. They will surely gain their knowledge of JILL Stock after reading the book. Everyone who wants to know about the U.S. stock market.

My Trading Journal Sasha Evdakov, 2014-03-20 A trading journal is a way for you to keep track of your trades. It's a way for you to manage your business, and it helps you become better by seeing what marks you are hitting and what you are missing. It is only a reflection of yourself and does not judge or criticize. Often times I hear beginners saying, well why can't I use Excel or a computer to record my progress? The problem with this theory is that while you can, it is usually unfeasible when trading because you are focused on the charts and stocks. By opening new files and documents it becomes a distraction and often times you stop recording and writing in the journal over time... ***This is the blue cover version ***

High Returns from Low Risk Pim van Vliet, Jan de Koning, 2017-01-17 Believing high-risk equals high-reward is holding your portfolio hostage High Returns from Low Risk proves that low-volatility, low-risk portfolios beat high-volatility portfolios hands down, and shows you how to take advantage of this paradox to dramatically improve your returns. Investors traditionally view low-risk stocks as safe but unprofitable, but this old canard is based on a flawed premise; it fails to see beyond the monthly horizon, and ignores compounding returns. This book updates the thinking and brings reality to modelling to show how low-risk stocks actually outperform high-risk stocks by an order of magnitude. Easy to read and easy to implement, the plan presented here will help you construct a portfolio that delivers higher returns per unit of risk, and explains how to achieve excellent investment results over the long term. Do you still believe that investors are rewarded for bearing risk, and that the higher the risk, the greater the reward? That old axiom is holding you back, and it is time to start seeing the whole picture. This book shows you, through deep historical simulation, how to reap the rewards of smarter investing. Learn how and why low-risk, low-volatility stocks beat the market Discover the formula that outperforms Greenblatt's Construct your own low-risk portfolio Select the right ETF or low-risk fund to manage your money Great returns and lower risk sound like a winning combination – what happens once everyone is doing it? The beauty of the low-risk strategy is that it continues to work even after the paradox is widely known; long-term investment success is possible for anyone who can shake off the entrenched wisdom and go low-risk. High Returns from Low Risk provides the proof, model and strategy to reign in your exposure while raking in the profit.
