How to Watch TV News Neil Postman, Steve Powers, 2008-06-24 A scathing and prescient look at television news' now updated for the new tech-savvy generation Television news : genuine information or entertainment fodder? Fifteen years ago, Neil Postman, a pioneer in media education and author of the bestselling *Amusing Ourselves to Death*, and Steve Powers, an award-winning broadcast journalist, concluded that anyone who relies exclusively on their television for accurate world news is making a big mistake. A cash cow laden with money from advertisers, so-called news shows glut viewers with celebrity coverage at the cost of things they really should know. Today, this message is still appallingly true but the problems have multiplied, along with the power of the Internet and the abundance of cable channels. A must-read for anyone concerned with the way media is manipulating our worldview, this newly revised edition addresses the evolving technology and devolving quality of America's television news programming.

We Now Disrupt This Broadcast Amanda D. Lotz, 2018-04-13 The collision of new technologies, changing business strategies, and innovative storytelling that produced a new golden age of TV. Cable television channels were once the backwater of American television, programming recent and not-so-recent movies and reruns of network shows. Then came *La Femme Nikita*, *OZ*, *The Sopranos*, *Mad Men*, *Game of Thrones*, and *The Walking Dead*. And then, just as "prestige cable" became a category, came *House of Cards* and Netflix, Hulu, Amazon Video, and other Internet distributors of television content. What happened? In *We Now Disrupt This Broadcast*, Amanda Lotz chronicles the collision of new technologies, changing business strategies, and innovative storytelling that produced an era termed "peak TV." Lotz explains that changes in the business of television expanded the creative possibilities of television. She describes the costly infrastructure rebuilding undertaken by cable service providers in the late 1990s and the struggles of cable channels to produce (and pay for) original, scripted programming in order to stand out from the competition. These new programs defied television conventions and made viewers adjust their expectations of what television could be. *Le Femme Nikita* offered cable's first antihero, *Mad Men* cost more than advertisers paid, *The Walking Dead* became the first mass cable hit, and *Game of Thrones* was the first global television blockbuster. Internet streaming didn't kill cable, Lotz tells us. Rather, it revolutionized how we watch television.

Cable and network television quickly established their own streaming portals. Meanwhile, cable service providers had quietly transformed themselves into Internet providers, able to profit from both prestige cable and streaming services. Far from being dead, television continues to transform.

How to Watch Television, Second Edition Ethan Thompson,Jason Mittell,2020-03-31 A new edition that brings the ways we watch and think about television up to the present We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it "good" or "bad." Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television, Second Edition brings together forty original essays—more than half of which are new to this edition—from today's leading scholars on television culture, who write about the programs they care (and think) the most about. Each essay focuses on a single television show, demonstrating one way to read the program and, through it, our media culture. From fashioning blackness in Empire to representation in Orange Is the New Black and from the role of the reboot in Gilmore Girls to the function of changing political atmospheres in Roseanne, these essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast, streaming, and cable. Addressing shows from TV's earliest days to contemporary online transformations of the medium, How to Watch Television, Second Edition is designed to engender classroom discussion among television critics of all backgrounds. Internet Television Eli M. Noam, Jo Groebel, Darcy Gerbarg, 2003-09-12 Internet TV is the quintessential digital convergence medium, linking television, telecommunications, the Internet, computer applications, games, and more. Soon, venturing beyond the convenience of viewer choice and control, Internet TV will enable and encourage new types of entertainment, education, and games that take advantage of the Internet's interactive capabilities. What Internet TV is today and can be in the future forms the context for this book. Arising from collaboration between the Columbia Institute for Tele-Information (CITI) and the European Institute for the Media (EIM), this volume investigates the advent of widely available individual broadband Internet communications and their impact on the development of Internet TV. Editors Eli Noam, Jo Groebel, and Darcy Gerbarg have collected seminal papers by leaders from the U.S. and European media and technology industries that offer a critical look at the impact of interactivity on television content, and address the need for media organizations to create interactive programming in this untapped realm with unclear consumer interest and desires. Each section of the volume fleshes out key issues and concepts of television and the Internet: *Part I, Infrastructure Implications of Internet TV, discusses questions about the required network capacity for various quality grades to deliver individualized broadband to homes. *Part II, Network Business Models and Strategies, addresses the business challenges of making Internet TV a financial success. *Part III, Policy, examines policy issues, including copyright and regulation. *Part IV, Content and Culture, reviews available content, those creating it, and how consumers view Internet TV content. *Part V, Future Impacts, considers future global prospects for Internet TV content creation and distribution. Internet Television is an essential resource for professionals and scholars in new technology and media studies, media policy, telecommunication, broadcasting, and related areas.
