**In the Studio** Todd Hignite, 2007-09-21 Nine critically acclaimed cartoonists and graphic novelists invite us into their studios to discuss their art and inspirations. These studio visits with some of today's most popular and innovative comic artists present an unparalleled look at the cutting edge of the comic medium. The artists, some of whom rarely grant interviews, offer insights into the creative process, their influences and personal sources of inspiration, and the history of comics. The interviews amount to private gallery tours, with the artists commenting, now thoughtfully, now passionately, on their own work as well as the works of others. The book is generously illustrated with full-color reproductions of the artists' works, including some that have been published and others not originally intended for publication, such as sketchbooks and personal projects. Additional illustrations show behind-the-scenes working processes of the cartoonists and particular works by others that have influenced or inspired them. Through the eyes of these artists, we see with a new clarity the achievement of contemporary cartoonists and the extraordinary possibilities of comic art.

**Cézanne in the Studio** Carol Armstrong, 2004-11-01 In the last years of his life Paul Cézanne produced a stunning series of watercolors, many of them still lifes. *Still Life with Blue Pot* is one of these late masterpieces that is now in the collection of the Getty Museum. In *Cézanne in the Studio: Still Life in Watercolors*, Carol Armstrong places this great painting within the context of Cézanne's artistic and psychological development and of the history of the genre of still life in France. Still life—like the medium of watercolor—was traditionally considered to be “low” in the hierarchy of French academic paintings. Cézanne chose to ignore this hierarchy, creating monumental still-life watercolors that contained echoes of grand landscapes and even historical paintings in the manner of Poussin—the “highest” of classical art forms. In so doing he changed his still lifes with new meanings, both in terms of his own notoriously difficult personality and in the way he used the genre to explore the very process of looking at, and creating, art. Carol Armstrong's study is a fascinating exploration of the brilliant watercolor paintings that brought Cézanne's career to a complex, and triumphant, conclusion. The book includes new photographic studies of the Getty's painting that allow the reader to encounter this great watercolor as never before, in all of its richness and detail.

**Contemporary Practice in Studio Art Therapy** Christopher Brown, Helen Omand, 2022  
Contemporary Practice in Studio Art Therapy discovers where studio practice stands in the profession today and reflects on how changing social, political and economic contexts have influenced its ethos and development. This is the first UK volume devoted to studio art therapy and the writers explore what is meant by a studio approach and how they are adapting art-based practices in radical new ways and settings. It comprises three parts: 'Frames of Reference' explores how particular social, cultural and political contexts have led to the discourses within practice; 'Models of Practice' gives accounts of current studio art therapy practice, describing rationale for working methods and providing a resource for practitioners; 'Curating, Exhibiting and Archiving' considers how the display and disposal of artworks, particularly relevant to studio approaches, may be thought about and implemented. The book includes chapters from North American authors who illustrate a trajectory of practice that has the potential to point to future developments. The book will be essential reading for practitioners and students who are interested in taking a fresh perspective on art therapy and will be encouraged by new ways of thinking about the studio approach in today's changing world--

**Chasing Sound** Susan Schmidt Horning, 2015-12-01 How technically enhanced studio recordings revolutionized music and the music industry. In Chasing Sound, Susan Schmidt Horning traces the cultural and technological evolution of recording studios in the United States from the first practical devices to the modern multi-track studios of the analog era. Charting the technical development of studio equipment, the professionalization of recording engineers, and the growing collaboration between artists and technicians, she shows how the earliest efforts to capture the sound of live performances eventually resulted in a trend toward studio creations that extended beyond live shows, ultimately reversing the historic relationship between live and recorded sound. Schmidt Horning draws from a wealth of original oral interviews with major labels and independent recording engineers, producers, arrangers, and musicians, as well as memoirs, technical journals, popular accounts, and sound recordings. Recording engineers and producers, she finds, influenced technological and musical change as they sought to improve the sound of records. By investigating the complex relationship between sound engineering and popular music, she reveals the increasing reliance on technological intervention in the creation as well as in the reception of music. The recording studio, she argues, is at the center of musical culture in the twentieth century.

**The Genius of the System** Thomas Schatz, 1988 Film historian Thomas Schatz focuses on four representative companies--Warner Brothers, MGM, Universal, and Selznick International--tracing their distinctive house styles and studio operations from the 1920's through the 1950's.--Jacket.

**Studio Studies** Ignacio Farías, Alex Wilkie, 2015-10-14 Consider the vast array of things around you, from the building you are in, the lights illuminating the interior, the computational devices mediating your life, the music in the background, even the crockery, furniture and glassware you are in the presence of. Common to all these objects is that their concrete, visual and technological forms were invariably conceived, modelled, finished and tested in sites characterised as studios. Remarkably, the studio remains a peculiar lacuna in our understanding of how cultural artefacts are brought into being and how 'creativity' operates as a located practice. Studio Studies is an agenda setting volume that presents a set of empirical case studies that explore and examine the studio as a key setting for aesthetic and material production. As such, Studio Studies responds to three contemporary concerns in social and cultural thought: first, how to account for the situated nature of creative and cultural production; second, the challenge of reimagining creativity as a socio-materially distributed practice rather than the cognitive privilege of the individual; and finally, to unravel the parallels, contrasts and interconnections between studios and other sites of cultural-aesthetic and technoscientific production, notably laboratories. By enquiring into the operations,

topologies and displacements that shape and format studios, this volume aims to demarcate a novel and important object of analysis for empirical social and cultural research as well to develop new conceptual repertoires to unpack the multiple ways studio processes shape our everyday lives.
