Subtitling Jorge Díaz Cintas, Aline Remael, 2020-12-29 Subtitling: Concepts and Practices provides students, researchers and practitioners with a research-based introduction to the theory and practice of subtitling. The book, inspired by the highly successful Audiovisual Translation: Subtitling by the same authors, is a new publication reflecting the developments in practice and research that mark subtitling today, while considering the way ahead. It supplies the core concepts that will allow its users to acquaint themselves with the technical, linguistic and cultural features of this specific yet extremely diverse form of audiovisual translation and the many contexts in which it is deployed today. The book offers concrete subtitling strategies and contains a wealth of examples in numerous languages for dealing with specific translation problems. State-of-the art translation technologies and their impact on the profession are explored along with a discussion of the ways in which they cater for the socio-political, multicultural and multilingual challenges that audiovisual productions and their translations must meet today. A truly multimedia package, Subtitling: Concepts and Practices comes with a companion website which includes a wide range of exercises with answer keys, video clips, dialogue lists, a glossary of concepts and terminology used in the industry and much more. It also provides access to a professional desktop subtitle editor, Wincaps Q4, and a leading cloud-based subtitling platform, OONA.

Translating Film Subtitles into Chinese Yuping Chen, 2019-02-01 This book examines three metafunction meanings in subtitle translation with three research foci, i.e., the main types of cross-modal interrelation, the primary function of semiotic interplay, and the key linguistic components influencing the subtitles. It goes beyond traditional textual analysis in translation studies; approaches subtitle translation from a multimodality standpoint; and breaks through the linguistic restraints on subtitling research by underscoring the role of semiotic interplay. In the field of

multimodality, this book bridges subtitling and multimodality by investigating the interweaving relationships between different semiotic modes, and their corresponding impacts on subtitle translation.

Subtitling Norms for Television Jan Pedersen, 2011 In most subtitling countries, those lines at the bottom of the screen are the most read medium of all, for which reason they deserve all the academic attention they can get. This monograph represents a large-scale attempt to provide such attention, by exploring the norms of subtitling for television. It does so by empirically investigating a large corpus of television subtitles from Scandinavia, one of the bastions of subtitling, along with other European data. The aim of the book is twofold: first, to provide an advanced and comprehensive model for investigating translation problems in the form of Extralinguistic Cultural References (ECRs). Second, to empirically explore current European television subtitling norms, and to look into future developments in this area. This book will be of interest to anyone interested in gaining access to state-of-the-art tools for translation analysis, or in learning more about the norms of subtitling, based on empirically reliable and current material.

The Semiotics of Subtitling Zoe De Linde, Neil Kay, 2016-04-08 Subtitling serves two purposes: to translate the dialogue of foreign language films for secondary audiences (interlingual) and to transform the soundtrack of television programmes into written captions for deaf and hard-of-hearing viewers (intralingual). While both practices have strong linguistic roots, often being compared to text translation and editing, this book reveals the complex influences arising from the audiovisual environment. Far from being simply a matter of linguistic equivalence, the authors show how the effectiveness of subtitles is crucially dependent upon the hidden semiotic relations between text and image; relations which affect the meaning of the visual-linguistic message and the way in which that message is ultimately received. Focusing primarily on intralingual subtitling, *The Semiotics of Subtitling* adopts a holistic approach, combining linguistic theory with empirical eye-movement analysis in order to explore the full depth of the medium and the reading behaviour of viewers.

Listening to Subtitles Anna Matamala, Pilar Orero, 2010 This book is the first monographic study on subtitles for the deaf and hard of hearing from a multidisciplinary perspective, from engineering to philology. The book departs from studies, analyses, tests, validations, resulting data, and their application from the nation-wide research on accessibility and usability of subtitles carried out in Spain. Tests and further analysis were carried out paying attention to users' hearing profiles, the many formal features of subtitles - size, font, colour, position, etc. -, and the syntax of the subtitle. The book also contains articles which discuss present and future research on subtitles for the deaf and hard of hearing carried out in Canada and across Europe: Belgium, Denmark, Italy, Poland, Spain, and UK. It provides an outlook for the implementation of the European Guidelines on Media Accessibility.

Captioning and Subtitling for d/Deaf and Hard of Hearing Audiences Soledad Zárata, 2021-01-14 Captioning and Subtitling for d/Deaf and Hard of Hearing Audiences is a comprehensive guide to the theory and practice of captioning and subtitling, a discipline that has evolved quickly in recent years. This guide is of a practical nature and contains examples and exercises at the end of each chapter. Some of the tasks stimulate reflection on the practice and reception, while others focus on particular captioning and SDH areas, such as paralinguistic features, music and sound effects. The requirements of d/Deaf and hard of hearing audiences are analysed in detail and are accompanied by linguistic and technical considerations. These considerations, though shared with generic subtitling parameters, are discussed specifically with d/Deaf and hard of hearing audiences in mind. The reader will become familiar with the characteristics of d/Deaf and hard of hearing audiences, and the diversity - including cultural and linguistic

differences – within this group of people. Based on first-hand experience in the field, the book also provides a step-by-step guide to making live performances accessible to d/Deaf and hard of hearing audiences. As well as exploring all linguistic and technical matters related to the creation of captions, aspects related to the overall set up of the captioned performance are discussed. The guide will be valuable reading to students of audiovisual translation at undergraduate and postgraduate level, to professional subtitlers and captioners, and to any organisation or venue that engages with d/Deaf and hard of hearing people.

Patient Protection and Affordable Care Act or Obamacare, is a United States federal statute which, at the same time, represents the complete reform of the American health care system conducted by the former president Barack Obama. The main goal of this act was to drive better health outcomes, lower costs, and improve accessibility to health services. The whole system was designed to increase health insurance quality and affordability, lower the uninsured rate by expanding insurance coverage and reduce the costs of healthcare. In March 2017 the Republican Party, which opposed Obamacare, released its plan to replace it.

Beyond the Subtitle Mark Betz, 2009 Examining European art films of the 1950s and 1960s, Mark Betz argues that it is time for film analysis to move beyond prevailing New Wave historiography, mired in outdated notions of nationalism and dragged down by decades of auteurist criticism. Focusing on the cinemas of France and Italy, Betz reveals how the flowering of European art films in the postwar era is inseparable from the complex historical and political frameworks of the time.
