Tatum doesn't like change no matter its form: not with her good friend Aaron, who seems to believe her fib that they're secretly boyfriend and girlfriend. And not with her mom either, who, to cope with a separation from her dad, is performing in community theater, of all things! Amy Fellner Dominy composes an equally heartwarming and hilarious story of how holding tight to the status quo can mean missing out on the future—and how often times the best way to move forward is by going solo.

The Laws of Subtraction: 6 Simple Rules for Winning in the Age of Excess Everything Matthew E. May, 2012-10-26 Winner of a 2013 Small Business Book Award for Economics The world is more overwhelming than ever before. Our work is deeper and more demanding than ever. Our businesses are more complicated and difficult to manage than ever. Our economy is more uncertain than ever. Our resources are scarcer than ever. There is endless choice and feature overkill in all but the best experiences. Everybody knows everything about us. The simple life is a thing of the past. Everywhere, there's too much of the wrong stuff and not enough of the right. The noise is deafening, the signal weak. Everything is too complicated and time-sucking. Welcome to the age of

excess everything. Success in this new age looks different and demands a new skill: Subtraction. Subtraction is defined simply as the art of removing anything excessive, confusing, wasteful, unnatural, hazardous, hard to use, or ugly . . . or the discipline to refrain from adding it in the first place. And if subtraction is the new skill to be acquired, we need a guide to developing it. Enter The Laws of Subtraction. Through a dozen of the most compelling stories of breakthrough innovation culled from 2,000 cases and bolstered by uniquely personal essays contributed by over 50 of the most creative minds in business today, The Laws of Subtraction outlines six simple rules for winning in the age of excess everything, and delivers a single yet powerful idea: When you remove just the right things in just the right way, something very good happens. The Laws of Subtraction features contributions by over 50 highly regarded thinkers, creatives, and executives.
