**The S. W. F. Club** Caroline Emilia  
Jacobs, 2013-08-14 Pauline dropped the napkin she  
was hemming and, leaning back in her chair, stared  
soberly down into the rain-swept garden. Overhead,  
Patience was having a clarin' up scrape in her  
particular corner of the big garret, to the tune  
of There's a Good Time Coming. Pauline drew a quick  
breath; probably, there was a good time coming—any  
number of them—only they were not coming her way;  
they would go right by on the main road, they  
always did. 'There's a good time coming,' Patience  
insisted shrilly, 'Help it on! Help it on!' Pauline  
drew another quick breath. She would help them on!  
If they would none of them stop on their own  
account, they must be flagged. And—yes, she would  
do it—right now. Getting up, she brought her  
writing-portfolio from the closet, clearing a  
place for it on the little table before the  
window. Then her eyes went back to the dreary,  
rain-soaked garden. How did one begin a letter to

an uncle one had never seen; and of whom one meant to ask a great favor? But at last, after more than one false start, the letter got itself written, after a fashion.

Strategic Sovereign Wealth Fund (SWF)  
Investments as a Possible Solution in the War of Resources Marcel C. Tiemann, 2012 This publication examines Europe's strong dependency on importing essential minerals and metals for their industries and if a strategic European Union Sovereign Wealth Fund (EUSWF) is a possible solution for investing directly in producing countries in order to maximize the security of supply. This would be advanced measures for the Raw Materials Initiative (RMI) which has been launched by the European Commission in 2008 to react to the future development of minerals and metals which faced a scarcity based on natural limitation and increasing prices. Both are driven by a global shift from western economies to eastern economies based on booming economies and their high demand to satisfy the growth. The publication states that

countries with a state capitalism have direct access to these relevant minerals and metals neither through their state-owned enterprises in their own economies nor through strategic foreign direct investments (FDI) in these elements by Sovereign Wealth Funds (SWFs) or state-owned enterprises, too. The results of the survey show that these economies are going to have or already have an advantage attributable to this behaviour and that the European Union (EU) missed this opportunity decades ago. Moreover does this way of political behaviour not coincide with the idea of a capitalist economic system, which is based on a free and fair trade. Finally, the EU seems to cooperate in this issue less than they should or might be able to. Indications were found related to the Europe 2020 strategy that the EU could overcome this weakness.
